Fax: (828)625-4700

Connect HP Computers and ATE to Centronics Printers

Connect HP Computers and ATE to Centronics Printers
The solution you've been waiting for - an affordable way to use an inexpensive printer with your Hewlett-Packard computer or test equipment. Print text with practically any printer with a parallel interface; print graphics with any HP-compatible ink jet or laser printer. MicroPrint 45CH converters are transparent to your operating system and require no software changes or additions. MicroPrint 45CH is address selectable and can be configured for "Listen Only."**The MicroPrint 45CH** offers four features not found on converters from other manufacturers. Variable Resolution allows you to automatically adjust the graphics image size when printing to HP DeskJets in portrait orientation and LaserJets in portrait and landscape orientations. Variable Resolution eliminates the problem of too-small or off-the-page graphics. HP-GL Mode enables LaserJets and DeskJet Models 2250 and 2500C+ to be used as plotters for many test instrumentation applications. Color Mode allows ATE color printing to most color DeskJets. Faster data transfer- data rate greater than 40 Kbytes/sec.

Small and Easy to Install - An UnBeatable Combination

MicroPrint 45CH is only 5.75" x 3.6" x 1.1". It comes complete with a wall-mount power supply, manual, and 10' parallel cable. Connect an HP-IB cable to one end, a parallel cable to the other, plug it in, and you're ready to begin printing or plotting.
