ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

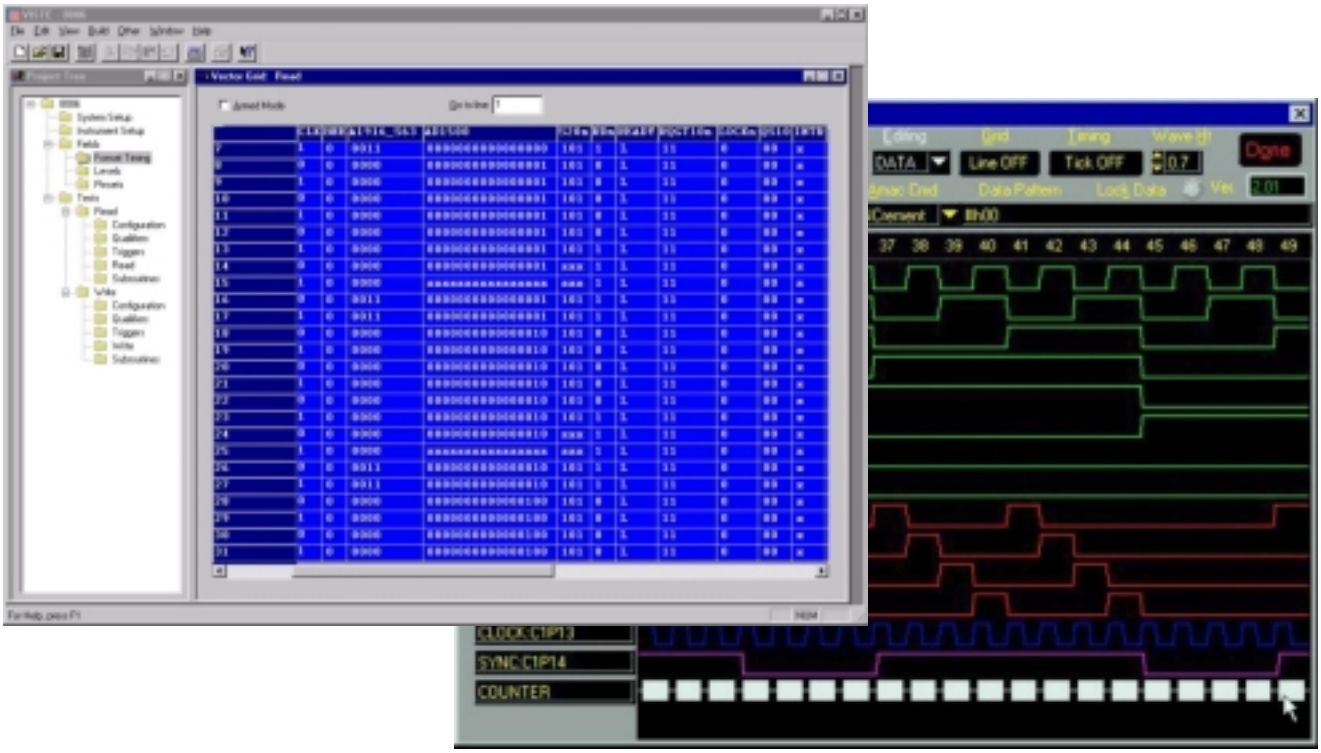

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

VisTE
Visual Test Editor

- Quickly Develop SR2500 and SR5000 Test Programs Off-line
- Clean, Intuitive User Interface
- Pattern Editor Shows Multiple Pins and States On One Screen
- Timing Setup Menu Graphically Shows Timing Relationships Between Signals
- Edit Patterns and Test Sequence Commands on the Same Screen
- Generates SCPI Test Commands and Data Files
- Load Test Files via WaveEdit Plug & Play Soft Panels
- Reuse Test Patterns
- Copy Test Programs and Subroutines
- Copy Patterns Across Tests and Across Subroutines
- Create Test Pattern Overlays
- Create Test Patterns Quickly With Common Fill Functions
- Cut/Copy/Insert Digital Test Patterns
- Generate Cross-Referenced Listings of Test Parameters
- Print Menus and Test Patterns

The Visual Test Editor (VisTE) software tool provides users of the Interface Technology's SR2500 and SR5000 a simple and intuitive environment for developing digital test programs online or off-line, without the use of the SR2500 or SR5000. Test programs are partitioned into projects. Each project represents all the parameters necessary for testing a particular device. Projects are further partitioned to represent information in the most logical format.

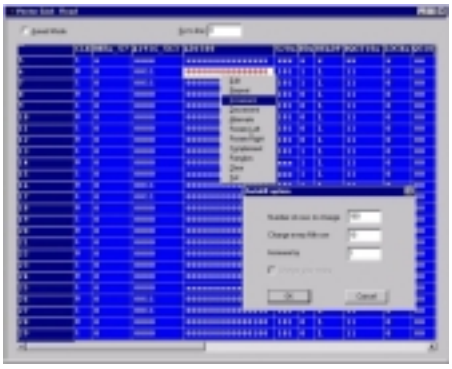

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Organize tests into projects. Programs in a project share system, setup, and timing parameters, but contain their own stimulus and response patterns. Add tests, delete tests or copy tests quickly and easily.

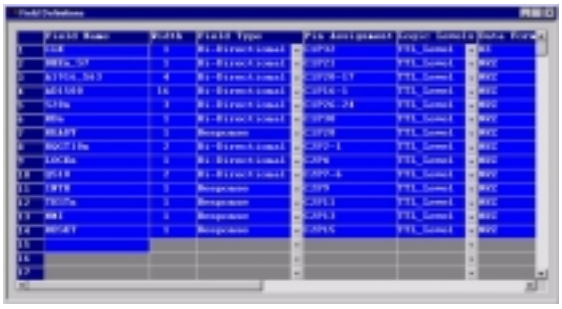

Pinsets map the logical pin to the physical pin. Simply drag the mouse pointer over the pins you want the fields mapped to.

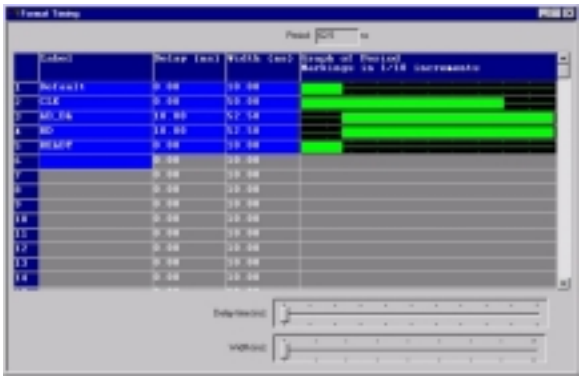

Fill functions simplify the arduous task of entering repetitive data and common test patterns. Create long, complex patterns with a few simple mouse clicks and keyboard entries.

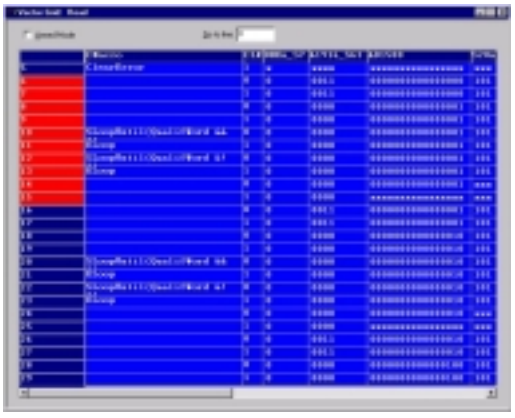

Global test parameters need to be entered only once per project. Each test program acquires the conditions and values defined.

Fields, or pin groupings, are defined once per project. All test programs use the same common labels.

Timing values are entered numerically or graphically. Relationships are easily determined and easily adjusted.

Test patterns are entered in a spreadsheet format. A large viewing area simplifies aligning data across many channels. Cut, Copy, Paste and Insert functions make quick work of pattern editing.
