KEITHLEY

Model 2400 Software Emulation
USB Flash Drive Information

Keithley Instruments, Inc.
28775 Aurora Road
Cleveland, Ohio 44139
1-888-KEITHLEY
http://www.keithley.com

Introduction

This document provides information about the Model 2400 Software Emulation USB Flash Drive. This drive is an accessory for all of the Series 2600B System SourceMeter® instruments and it contains the Model 2400 software emulation personality script.

The Series 2600B instruments use the Test Script Processor (TSP) command language. The Model 2400 instruments use the language called Standard Commands for Programmable Instrumentation (SCPI).

The Model 2400 software emulation allows you to upgrade to the modern functionality provided with Series 2600B instruments without converting existing SCPI code. Specifically, the Model 2400 software emulation personality script allows you to use SCPI commands on Series 2600B instruments.

You can also use this drive to load scripts on the instrument and save data from the instrument.

Using the drive

Do not format the drive because formatting the drive will erase the Mode 2400 software emulation personality script. For additional information about using this drive, refer to Appendix G in the Series 2600B Reference Manual that came with your instrument.

Obtaining a copy of the emulation script

The Model 2400 software emulation personality script is available for download from the Keithley Instruments website (*http://www.keithley.com*).

If you accidentally delete the emulation personality script, you can reload the emulation script. If you lose the drive, you can load the emulation script on a new drive.

To locate and download the Model 2400 software emulation software personality script from the Keithley website:

1. Browse to the Keithley Instruments website (*http://www.keithley.com*).
2. Select the **Support** tab.
3. In the model number box, type **2600B**.
4. From the list, select **Software** and click the search icon. The website displays the following files where: "r" is the latest revision.
   - The emulation personality script, `2600B-800r.tsp`
   - The readme file, `2600B-800r-readme.html`
5. Select `2600B-800r.tsp`.
6. Copy the emulation personality script to the drive.

To replace a lost or damaged drive:

1. Obtain a USB flash drive. Other data on the flash drive will not impact the product.
2. Download the emulation script as described previously.

PA-1083 Rev. A / September 2012

Artisan Technology Group is an independent supplier of quality pre-owned equipment
