Models 7037-D and 7037-DT

Introduction

The Models 7037-D and 7037-DT are alternate configurations of the Model 7037 Single-Pole Relay-Digital I/O Card. The Model 7037 consists of a scanner card and a connector card in a sandwich. The configurations are as follows:

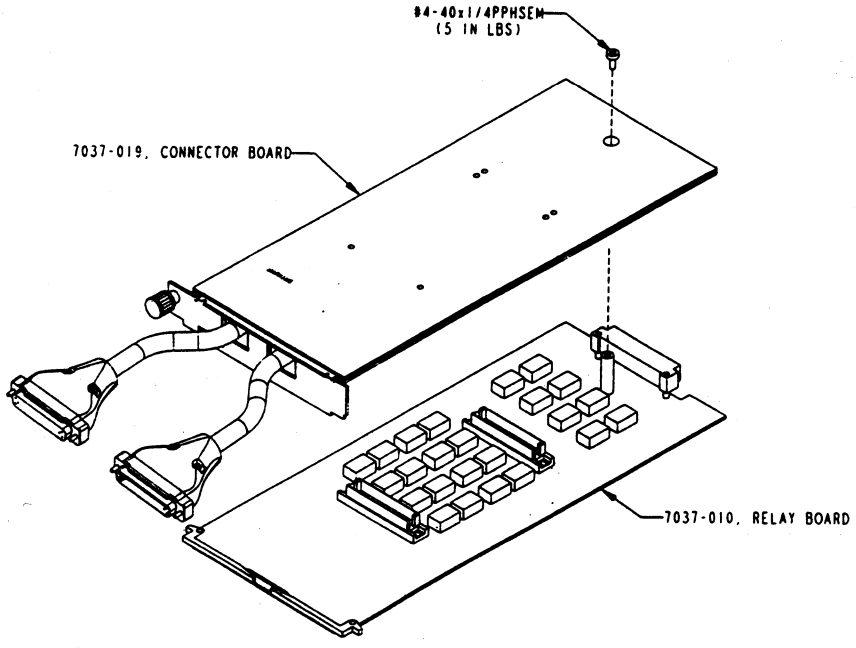

- Model 7037 - Scanner card and mass-terminated card with 96-pin male DIN connector.
- Model 7037-D - Scanner card and mass-terminated card/cable with 50-pin male and female D-Sub connectors.
- Model 7037-DT - Spare mass-terminated card/cable with 50-pin male and female D-Sub connectors.

The Model 7037 is described in its own manual (part number 7037-901-01). This addendum describes additions to that manual for the Models 7037-D and 7037-DT.

Internal connections

The two PC-boards that plug together are secured by a 4-40 screw (see Figure 1).

Input/output connections

WARNING

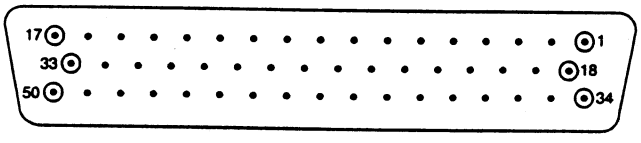

Connection and installation procedures are to be performed by qualified service personnel. Failure to recognize and observe standard safety precautions could result in personal injury or death.

Connections to external circuitry are made at the 50-pin D-Sub connectors. Connector pinouts are shown in Table 1. Figure 2 shows the solder-side view of a mating connector.
