Simple setup using the handheld controller

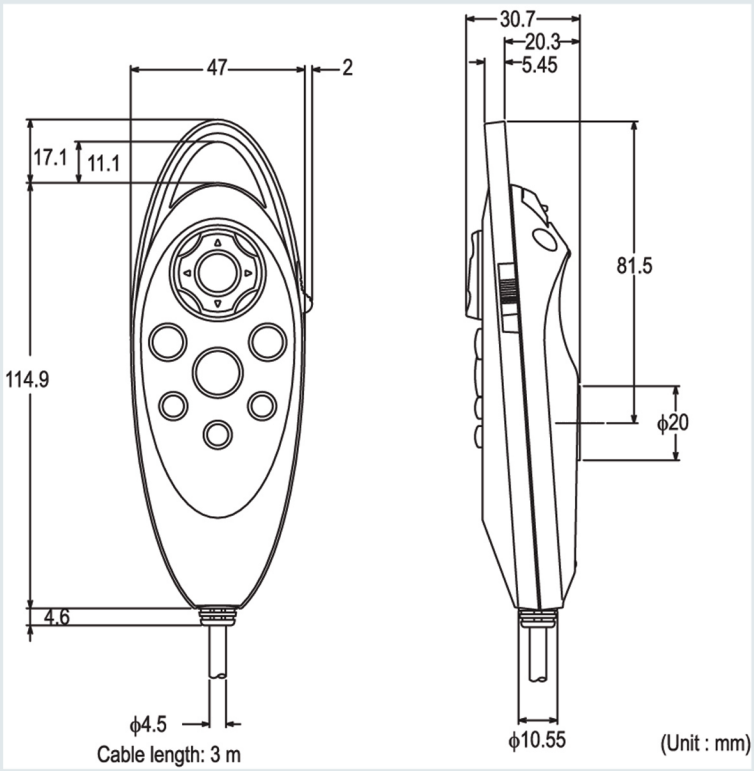

Creation of a program can be done on-line using the handheld controller. After creation, verification and editing can be conducted to increase the inspection accuracy without stopping the line using the 'Online Re-Test' function during operation. This allows the re-testing of stored images even during operation based on images saved to the internal buffer or to an FTP server. Program changes can be tested on-site without influencing the current production.

Remote Control Console (OP-84231)

Handheld Controller	• By using the optional OP-84231 (OP-84236 blank version) direct interaction with the controller and program settings is possible. • Buttons can be assigned individual operations • Buttons can be activated/deactivated based on user groups

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com
