OPTION 020

Relay Multiplexer Assembly with Thermocouple Compensation

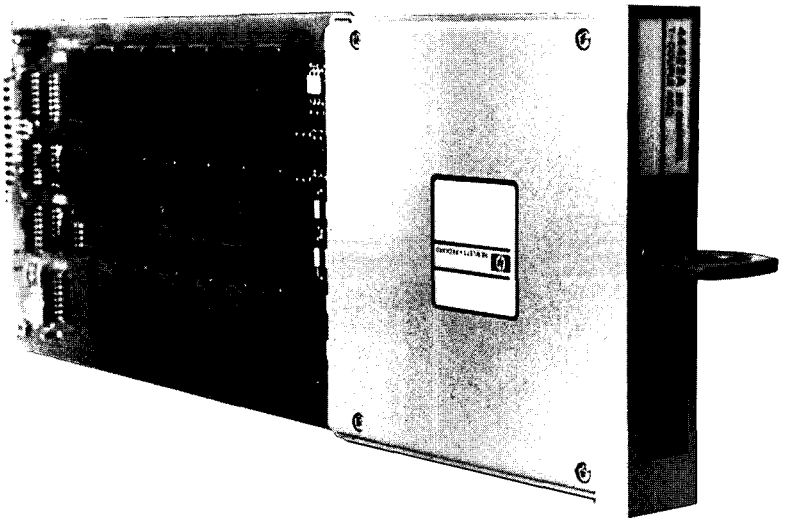

Description

The Option 020 Assembly uses the same relay multiplexer assembly as the Option 010, but adds a special isothermal connector block for thermocouple compensation to eliminate unwanted measurement errors when measuring thermocouple voltages.

The Option 020 assembly uses both hardware or software compensation techniques. Hardware compensation is limited to one thermocouple type per assembly. Software compensation can be used with any mixture of thermocouples, but requires a computer program to convert voltages measured to the associated temperatures.

Applications

Use the Option 020 assembly with hardware compensation to measure the output of up to 20 B,E,J,K,R,S or T type thermocouples (one type per assembly). Use the Option 020 assembly with software compensation to measure the output of up to 19 thermocouples (any mixture of these types).

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
