OPTION 120

Dual Output, 0 to ± 10 V Voltage D/A Converter

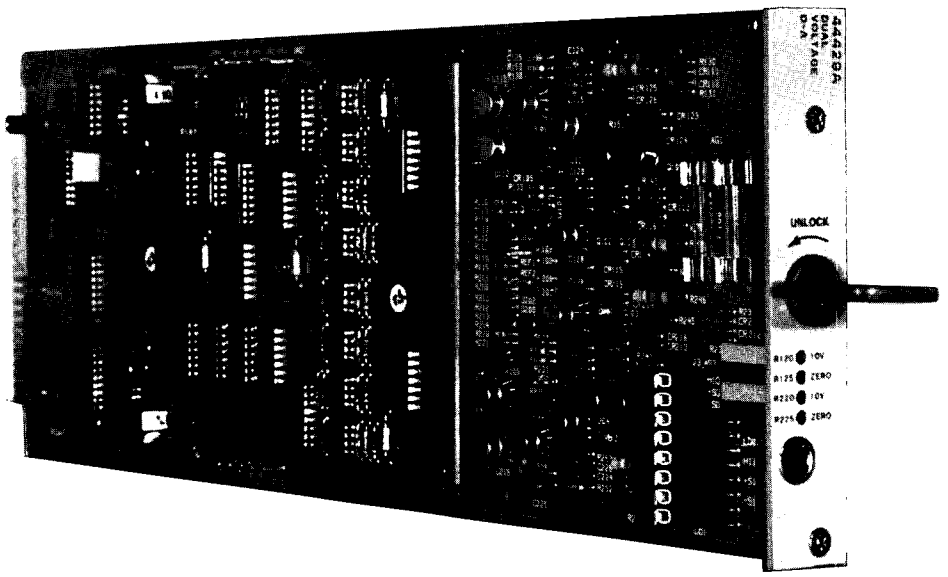

Description

The Option 120 assembly consists of two 0 to ± 10V programmable voltage sources (two channels). Each channel outputs a DC voltage with programmable range from -10.2375 volts to +10.2375 volts in increments of 2.5 millivolts.

Each voltage source is isolated from the other and from ground which breaks possible ground loops and permits control of devices floated up to 170 volts above ground.

Applications

Use the Option 120 assembly to control voltage programmed devices such as power supplies and VCOs.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.
