OPTION 130

Dual Output, 0-20mA/ 4-20 mA Current D/A Converter

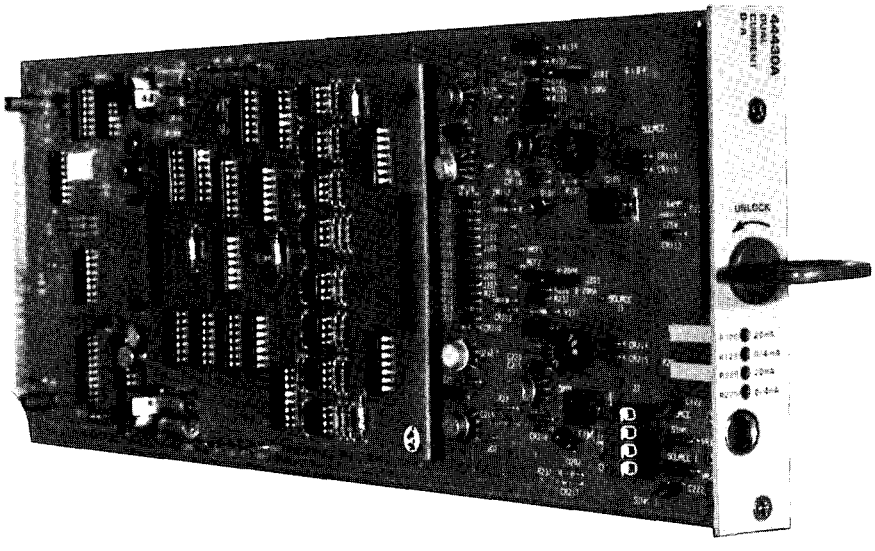

Description

The Option 130 assembly provides two 0- 20 mA or 4 - 20 mA programmable current sources. Each source can be configured to operate in a 0-20 mA range or a 4-20 mA range.

Each current source is isolated from the other and from ground which breaks possible ground loops and permits control of devices floated up to 170 volts above ground.

Applications

The Option 130 assembly, especially when the 4 - 20 mA range is used, can be used as a transmitter in an industrial current loop. Each output will drive an industrial current loop with up to 600 ohms of total loop resistance.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment
