OPTION 115

8 Channel High Voltage Actuator Assembly

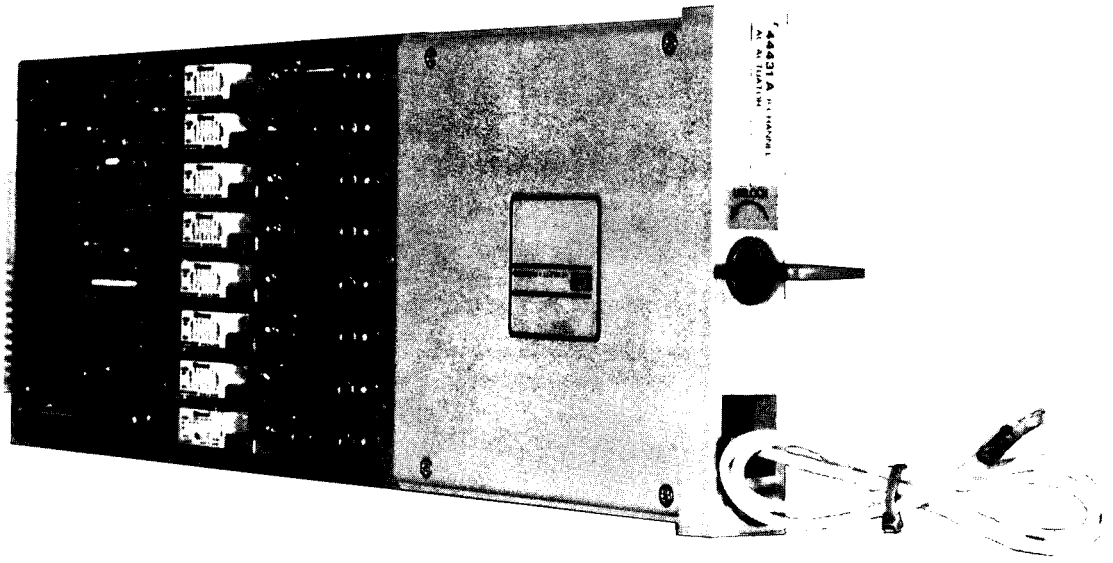

Description

Option 115 is an eight channel high voltage actuator which can be used to switch voltages up to 357 volts peak and currents up to 2 amps peak. Each channel consists of a normally open dry relay.

Each channel can be closed individually or any combination of channels can be closed simultaneously. The assembly contains a readback circuit so that the status of each channel can be determined.

Applications

Use the Option 115 Assembly to switch power line voltages to small motors, alarm bells and lights, motor starters and solenoids.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com
