OPTION 140

Breadboard Card Assembly

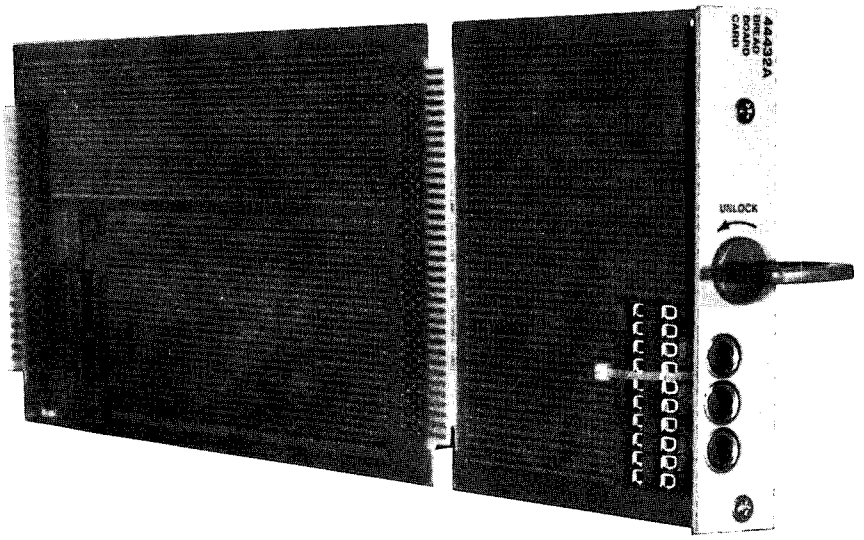

Description

In contrast to the other plug-in assemblies, Option 140 provides a ''breadboard'' for the design engineer or technician to custom design circuits for use with the 3497A or 3498A.

The board has three grid networks to mount components and power supply and ground buses. Two of the grids are labeled ANALOG SECTION and DIGITAL SECTION. The ANALOG SECTION grid contains two power supply buses and two ground buses. The DIGITAL SECTION grid contains a power supply bus and a ground bus.

Applications

Use Option 140 when you have a specialized measurement or control application which can't be satisfied by using manufactured plug-in assemblies.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com
