Work Surface

The work surface is stationary and is designed to remain securely in place. The work surface provides a convenient work shelf utility area at the front of the rack. It can be used as a writing space or to hold accessories.

Consider purchasing the steel ballast (C2790AC) to use with the work surface. The ballast provides anti-tip capability.

Figure 18. 46298SZ work surface

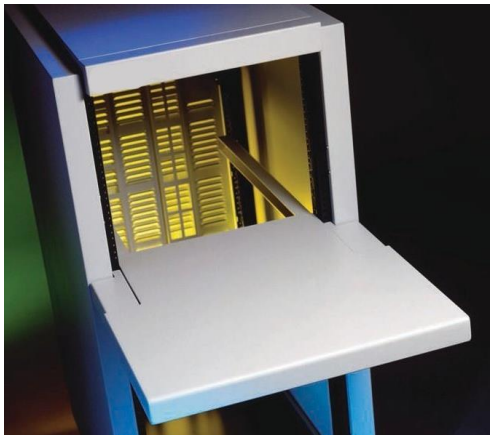

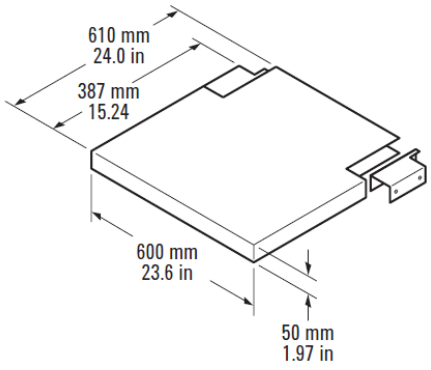

Figure 19. Work surface installed in a rack

Work Surface Characteristics and Specifications

46298SZ Work Surface Characteristics		Work Surface Dimensions
Material	Cold-rolled steel	
Weight	12.7 kg (28 lbs)	
Color	Quartz gray	
EIA units	2	
Load capacity	22.7 kg (50 lbs)	

Ballast

The ballast kit includes a 30-pound weight to provide anti-tip protection. Ballast deters the cabinet from tipping forward if heavy slide-mounted devices are extended from the rack.

Keysight rack cabinets include a standard, pull-out anti-tip foot that can be extended temporarily for servicing. Ballast provides an extra margin of safety to counteract the extra weight incurred when an accessory extends from the rack, such as a work surface.

Ballast features:

- Each ballast kit contains a 30 lb. ballast and mounting hardware.
- The ballast mounts on the rear columns of the rack and provides a counterweight for equipment that extends out from the front of the rack.

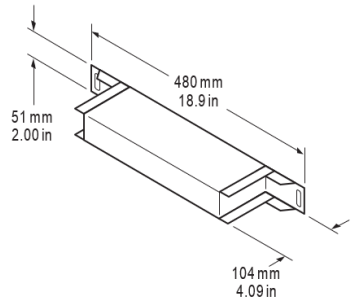

Ballast should be employed when using the following rack accessories:

- Slide mounted instruments
- Work surface
- Monitor
- Keyboard

Rack Configuration Hint

Always mount ballast in the rear of the rack. Racks should not be shipped with ballast installed.

Ballast Characteristics and Specifications

C2790AC Ballast Characteristics		Ballast Dimensions
Material	Cold-rolled steel	
Weight	13.6 kg (30 lb)
