

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

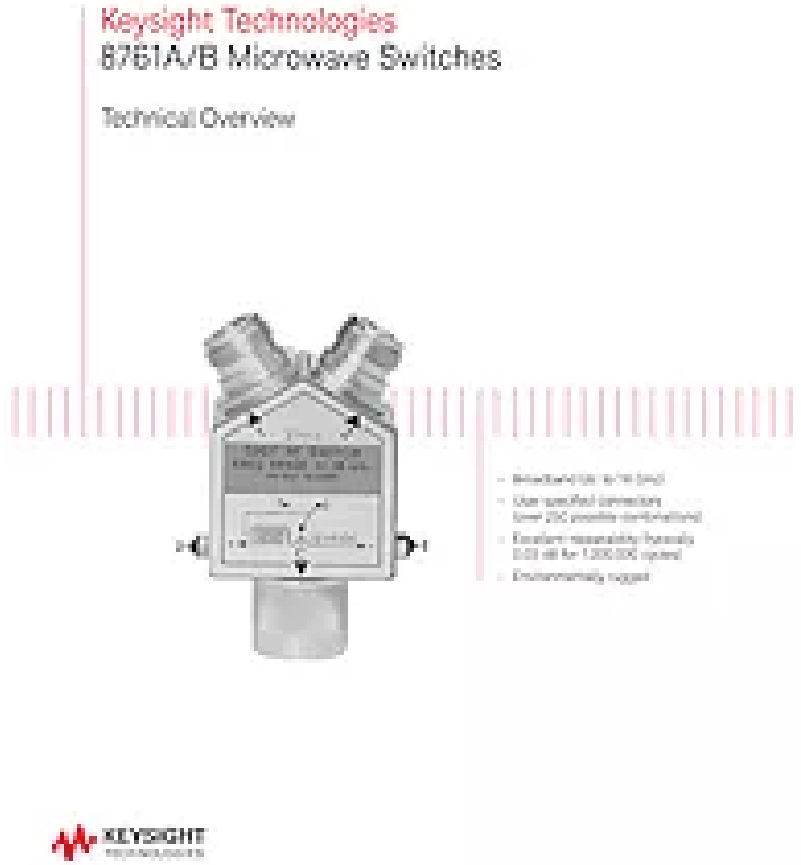

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

8761A/B Microwave Switches

Data Sheets

Product Description

The Keysight Technologies, Inc. 8761A and 8761B are single-pole, double-throw coaxial switches with excellent electrical and mechanical characteristics for 50-ohm transmission systems operating from dc to 18 GHz. Both switches feature broadband operation, long life, low SWR, excellent repeatability, and magnetic latching solenoids. The 8761A and 8761B switches are small and lightweight, making them ideal for applications where space is limited. Because of their versatility and excellent electrical performance, they are well suited for automated testing and systems applications. The A version is for 12 to 15 VDC operation, and the B version uses 24 to 30 VDC solenoid drive voltage.
The Keysight 8761A/B Series can be custom configured with any combination of Type-N, SMA, and precision 7-mm connectors, thus enabling the user to “custom design” a connector arrangement and eliminate the need for connector adapters.

Electrical Performance

These switches have proven reliable in Keysight microwave instrumentation, special purpose test equipment, and many other applications. They have been optimized for broadband operation, high isolation, minimal insertion loss, low SWR, and high repeatability.
