J2912B STM-1/OC-3 Module for the Keysight Advisor

Description

The Keysight J2912B helps network professionals isolate and resolve network problems quickly.

- Service turn-up is done with confidence -- pre-written tests allow for full bandwidth simulation, policing, and simultaneous monitoring for all types of ATM traffic
- Full-rate capture and analysis of packet over SONET/SDH for IETF and Cisco HDLC variants
- Isolates maintenance issues -- statistics and charting of network loading show peak utilization and isolate users by network layer address
- Optical power meter verifies signal levels
- Pinpoints physical layer service interruptions -- line status indicators show physical layer problems and timestamp any interruption in service
- Accuracy when you need it -- 100 percent data capture and analysis at full line rate with 100 ns resolution on all traffic analysis
- Automatic audit of ATM services -- gathers all active VPI/VCIs and their associated adaptation layer encapsulation and services to show which circuits are in use , and how
- Continuity testing -- pings verify connectivity and check timing of round trip delay
  Physical layer integrity -- SONET/SDH and ATM-layer BERT (bit error rate tests) confirm Layer 1 integrity
- Easy-to-use interface -- the Windows® 98 user interface lets you choose the function by pointing and clicking on an icon

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions
