Service Autronica GL-100 and AutroCargo 2000

AutroCargo 2000 is a radar system for measuring liquid level in the tanks. In addition, you can connect analog pressure and temperature sensors and the integration of control functions such as start charge pumps, opening / closing valves bus like. The instruments radar mounted on top of the tank, and none of the components is not exposed to direct contact with dangerous cargo, making susceptibility system damage is minimized.

The system offers the following main measurements and calculations:

- level
- headspace of the tank
- liquid temperature
- pressure inert gas
- steam pressure
- dipping
- volume
- volume as a function of temperature
- tilt and trim

Service antenna

Test results are displayed via a dedicated graphical user interface. Software visualization NL-300 based on Intouch solutions is installed on a standard PC under Windows and provides a clear insight into all the readings of the system during loading / unloading operations and during the journey. Properly calibrated Autrocargo system for accurate measurement of the liquid level of about 2 mm in the range of 0 to 40 m.
