➤ MOPSlcdLX

500 MHz @ 0.9W
AMD processor

- Extreme low power fanless PC/104plus, 500MHz AMD LX800
- PC/104plus card for ISA and PCI IO card expansion
- With full 16Bit I/O and memory support
- FULL Featured embedded SBC (USB, COM, LAN, etc.)

Product Overview

The MOPSLcdLX (Minimized Open PC System) with its 500 MHz AMD LX800™ processor offers high reliability and performance at low power consumption – only passive cooling if at all – no moving parts. The PC/104-Plus (ISA & PCI signals) enables applications with wide choice ISA I/O or high PCI I/O performance requirements. The MOPSLcdLX is a high integrated CPU board which includes in addition to the standard interfaces a PCI graphic, a 10/100 MBit Ethernet and 2x USB interfaces. A watchdog timer and a realtime clock are standard. The SO-DIMM socket enables this board to be equipped with up to 1 GByte of DDR-RAM.

The lower socket is used as JILI (LVDS) interface for connecting LCD flatpanels. The on chip Graphics+ Controller supports CRT & TFT. A Kontron chipDISK (IDE compatible flash disk) with capacity up to 1GB can be plugged directly onto the 2.5" harddisk interface. All MOPS PC/104 boards are Plug&Work compatible, which considerably reduces the time to market. All MOPS PC/104 provide the same pinout for keyboard, COM1 and COM2, 44pin IDE, 2xUSB, LPT as well as LAN. This is the common MOPS-family feature, which eases the upgradeability enormously within the Kontron MOPS PC/104-products.
