Powered CAMAC Crates

CAMAC Equipment

CAMAC, Computer Automated Measurement And Control, is an IEEE-standard (583), modular, high-performance, realtime data acquisition and control system concept.

Since 1969, CAMAC has been used in many thousands of scientific, industrial, aerospace, and defense test systems around the world.

FEATURES

- Mandatory voltage (+24, +6, -6, -24) available, all models
- All units also provide ±12 V outputs
- Input voltage range selections on 1502
- Voltage and current metering on 1502 and 1572

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

KineticSystems

GENERAL DESCRIPTION

This series of powered CAMAC crates fully complies with CAMAC specification IEEE-583. Crates include the CAMAC Dataway with an 86-contact PC edge connector at each station. All units include one or more self-contained blowers as well as a power supply which converts the ac source to the mandatory DC CAMAC Dataway voltages (±6 V and ±24 V) and also provide the optional ±12 V outputs.

TYPE SUMMARY

Model	Description
1502	25-station crate (52 A shared on ± 6 V)
1572	Similar to 1502, but with separate power supply

All crates in this series are arranged for 19-inch relay rack mounting and include module mounting holes for CAMAC only. NIM holes are only available on certain options (refer to ORDERING INFORMATION).

The Model 1502 is a full-featured, 25-station CAMAC crate. It includes a rear-mounted power supply and a front-removable fan tray. The crate can deliver up to 525 W of power. The power supply features ±6 V outputs shared to 52 A and ±24 V outputs shared to 9 A. The front panel of the fan tray includes an over-temperature warning LED, a switch-selected digital meter for monitoring all voltages and currents, and removable air-intake filters. Options are available with a rear I/O mounting bar for affixing 36-contact PC edge connectors and with a status bit on a rear LEMO connector. The Model 1572 is similar to the 1502 crate except that the power supply is mounted separately.

SERIAL PORT OPTIONS (ORDER SEPARATELY)

Model	+24 V	-24 V	Shared to	+12 V	-12 V	Shared to	+6 V	-6V	Shared to
1502/72	6 A	6 A	9 A	3 A	3 A	6 A	52 A	52 A	52 A

NOTES:

1. On the 1502 and 1572, the ±12 V supplies are derived from the ±24 V sources; therefore the +12 V load must be considered part of the +24 V load and the -12 V load part of the -24 V load.
2. All models provide current foldback limiting and overvoltage crowbar protection for all output voltages.
3. All power supplies are of the linear type.

ACCESSORIES

Model 5962-Z1A	Adapter Kit for 36-contact Rear I/O Connectors (five sets of adapter blocks)
Model 1950-001 or -002	Rack Mount Support Brackets for 1510 (pair)

SPARES - CRATES SUBASSEMBLIES

Model 1502-110	Fan Unit
Model 1502-200	Power Supply
Model 1502-310	Crate
