Product Bulletin for
16 Series Single-Pole
Detachable Plugs

LEVITON®
Commercial/Industrial

16 Series Inline Single-Pole Cam-Type Detachable Plugs

Type 3R Rated for Outdoor Use for Applications Up to 400A / 600V

Leviton Single-Pole Detachable Plugs are designed to provide superior service and durability, even under the most severe operating conditions. Featuring solid brass contacts and high-performance TPV insulators, these devices are ideal for use with equipment associated with concerts, sound stages, movie-making, television production and many other power distribution applications.

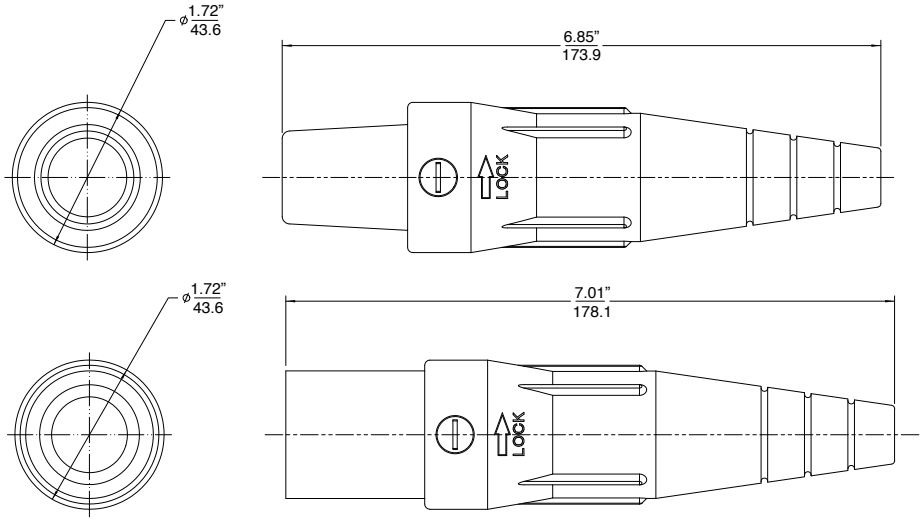

When used in-line, the newly redesigned profile of the 16 Series insulators reduces the likelihood of plugs getting snagged on other cables and equipment. The solid plastic, non-conducting retaining screw provides strength and durability.

The entire line of Leviton 16 Series Single-Pole Detachable Plugs and accessories are completely interoperable and interchangeable with any competitive cam-type plugs and receptacles.

Other features include:

- Single or Double Set Screw, or Crimped Termination
- Reusable sleeves and contacts for easy assembly and disassembly without special tools
- Self compensating for wear
- Color-coded insulators for easy phase identification
