Model 1015 DS

Endpoint Detection for Low Exposed Area Plasma Etch

The Model 1015 DS (Dual Sensor) Plasma Endpoint Controller uses proprietary optical background correction, combined with dynamic signal processing techniques to accurately detect endpoint processing in the plasma etch process.

Benefits:

- More reliable control of the process
- Increased throughput
- Reduced rework
- Improved product quality
- Shorter process characterization time
- Detection of chamber contamination

Features:

- Extended storage capabilities of a single process run (up to 54 minutes)
- Automatic storage of endpoint data, endpoint times and recipe parameters on built-in floppy disk drive
- Transfer of recipe via floppy disk to other etchers equipped with 1015 DS Controllers

A single detector version of the 1015 DS (Model 1015) is also available.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment
