44 Series

The MAC 44 Series is a direct solenoid operated 4-way – 10mm – poppet valve. A direct operated 4-way of this size with such high flow is unique to MAC due to patented design innovations. It features an oval armature in the solenoid, a balanced poppet and conical seats. These features translate into high shifting forces, fast consistent response times, high flow in a small package and long life. For information regarding certifications (such as UL, CSA, RoHS and CE) please visit the Get Support pages on our website.

Cv (Max): 0.10

Port Sizes: M5-#10-32

Configurations: Inline – Manifold: Plug-in/Non Plug-in
