

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

3U CHASSIS

GX7300
20-SLOT PXI *SMART* CHASSIS

- 20 slots supporting a 3U PXI controller (embedded or remote) and 19 3U PXI or cPCI instruments
- Built-in peripherals (hard disk drive, floppy disk drive, and a DVD-RW drive) for embedded controller configurations
- Industry-leading 1100W of system power
- Innovative forced-air cooling configuration provides excellent thermal management in a compact, 4U package
- Integral *Smart* functions provide per-slot temperature monitoring, system power supply monitoring, and PXI trigger mapping

The GX7300 Series mainframes are 20-slot PXI chassis that can accommodate up to 19 instruments and a PXI controller (an embedded CPU or a PXI bus expander interface such as the GX7990 or MXI-4). The 3U form-factor delivers a compact test system foot print and provides users with the flexibility to employ both PXI and CompactPCI 3U modules. The GX7300 series is available in multiple models, including a slave chassis (GX7310) and chassis with a hinged front panel for mass interconnect applications (GX7302 & GX7312).

GX7300
20-Slot PXI Smart Chassis

GX7310
3U, 20-Slot Smart PXI Slave Chassis

GX7302
GX7300 with a hinged front panel for mass interconnect applications

GX7312
GX7310 with a hinged front panel for mass interconnect applications

GX7302-MP
GX7310 with a MAC Panel SCOUT receiver

GX7600
9-SLOT PXI EXPRESS *SMART* CHASSIS

- Supports a 3U (embedded or remote) PXI Express controller, 2 PXI Express hybrid slots, 5 PXI slots, and a PXI Express system timing slot
- Built-in peripherals (hard disk drive, and a DVD-RW drive) for embedded controller configurations
- Compact footprint is ideal for bench top or portable applications
- Integral *Smart* functions provide per slot temperature monitoring and system power supply voltage monitoring
- 560 W power supply

The GX7600 Series mainframes are compact, 9-slot PXI chassis that can accommodate up to 8 instruments as well as an embedded single slot PXI Express controller such as the GX7940 or a PXI Express external bus controller such as the x1 or x4 MXI - PXI Express interface. The GX7600's compact 3U form-factor occupies only 9x18 inches of bench space, making it ideal for benchtop or space constrained applications. And when combined with 8 peripheral slots, integral Smart functions, and the bandwidth of PXI Express, the GX7600 represents a new level of performance, capabilities and value for PXI mainframes.

GX7600
9-Slot PXI Express Smart Chassis

GX7610
9-Slot, Smart PXI Express Slave Chassis
