Posi-Trap® Vacuum Trap

Single Stage Vacuum Inlet Trap

- Positive Flow
- No “blow-by”
- Variety of elements
- Positive trapping
- Easy changing and cleaning

CALL TODAY

The flow of the effluent gas is directed through the inlet port to the filter elements. Unlike other traps, the filter elements of the POSI-TRAP® are sealed at both the inlet and the exhaust ends, eliminating blow-by and maintaining a positive flow through the elements. This means all contaminants must pass through the filter medium.

Choose from stainless steel gauze, copper gauze, molecular sieve, Soda Lime, activated charcoal, and PolyPro (2, 5, and 20 microns). One (4” Posi-Trap) or four (8” Posi-Trap) filter elements are required per trap.

Other filter media is available. We can also customize filters for your specific application. For more information on filter media and applications, click **here**.

SPECIFIATIONS | **INSTALLATION DRAWING** | **ORDERING INFORMATION** | **FILTER MEDIA**

Construction	Stainless steel
Seals	Buna N O-rings
Dimensions	Refer to Installation Drawings
MV Products offers several interchangeable inserts:	
Type	**Description**
Copper gauze	Large surface area traps condensable particles and oil vapors
Stainless steel gauze	Same as copper gauze, but with added corrosion protection
Molecular sieve	Reduces mechanical pump backstreaming and traps water vapor
Soda Lime	Minimizes migration of corrosive chemicals and neutralizes acidic vapors
Activated charcoal	Removes organic vapors
PolyPro 2µm	Traps high volumes of solids and particulates as small as 2 microns; available in 3 sizes
PolyPro 5µm	Same as above
PolyPro 20µm	Same as above

Artisan Technology Group is an independent supplier of quality pre-owned equipment
