665 Dosimat – the universal instrument for liquid handling

665 Dosimat – the solution to every dispensing task

- In the **DOS** dispensing mode, the balance connection allows direct calculation and display of the sample content. The 665 Dosimat accepts the sample weight directly and incorporates it automatically in the calculation formula.
- The built-in **RS 232C** interface allows the direct printout of the results.
- The **CNT** mode is used for the automatic preparation of solutions of specified content.
- In the preparative laboratory, the **DIS C** mode is used for continuous dispensing. Two 665 Dosimats in tandem operation can be controlled via PC and thus allow uninterrupted dispensing.
- High accuracy of the dispensing and chemical resistance of the materials used allow universal deployment of the 665 Dosimat.
- Efficient and precise pipetting or diluting in the **PIP** or **DIL** mode.
- Remote control of the 665 Dosimat via PC, Metrohm Titrinos, Metrohm 726 Titroprocessor or the Metrodata TiNet 2.
- Easy operation of the 665 Dosimat via the external keypad.
- Usable for standard addition with the 692 pH/Ion Meter.

Dispensing is universal

Precise handling of liquids is a fundamental operation in every:

- Analytical laboratory
- Electroplating laboratory
- Environmental laboratory
- Food laboratory
- Petrochemical laboratory
- Pharmaceutical laboratory
- Plant laboratory
- Plastics laboratory
- Preparative organic synthesis laboratory
- Textile laboratory
- Synthesis laboratory
- Synthesis laboratory
- Pilot plant.
