QC-3200

High powered 2D and relational capabilities

The QC-3200 is a 2 axis, microprocessor based digital readout designed to perform complex geometric measurements with unprecedented speed and ease of use. Its low cost, high powered capabilities, including programmability, on-screen help, constructions, automatic feature storage and probe support make the QC3200 the optimal retrofit for anyone stepping into multiple axis measurements.

The flexibility to add options such as optical edge detection and an electronic protractor will further expand the usefulness of your current measurement equipment.

Some of the QC-3200's Features include:

- High measurement speed
- Video Readout Display
- On-Screen help
- Versatile Absolute Datum settings
- All multipoint features, up to 50 points each
- Simplified programmability using "Record" mode
- User defined soft keys
- Presets and constructions
- Supports many types of probes
- Automatic full and directional probe compensation
- Linear Error Correction
- Time and Date clock
- Versatile tolerancing printouts

Extensive Form Data:

- Parallelism
- Perpendicularity
- Roundness

Optional add-ons:

- Optical edge detector
- Electronic Protractor
- Non-Linear Error Correction
- Seven function remote keypad
- Footswitch
- Offline programming station
- Integrated SPC

Plus.....

Parts Tolerancing

- RFS, True Position or Cartesian
- MMC (Maximum Material Condition)
- LMC (Least Material Condition)
- Parallelism
- Perpendicularity
- Circular Runout

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
