ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

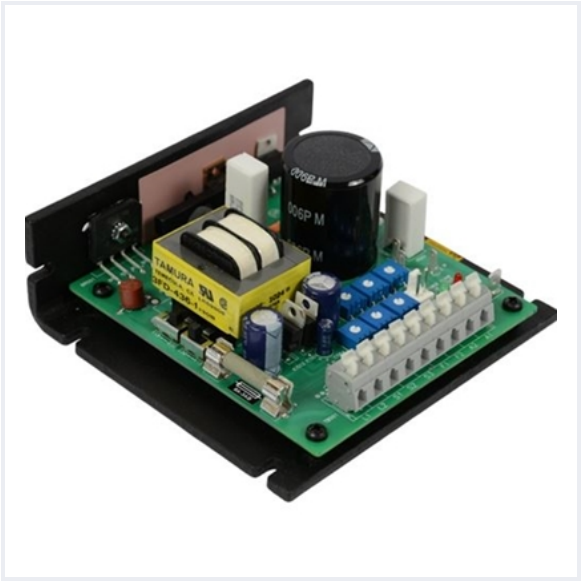

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

XL3025A

XL Series

Minarik Drives' XL3025A filtered pulse-width-modulated (PWM) variable speed DC drive provides exceptional performance. It outputs nearly pure DC power to brush-type motors ranging from 1/20 to 1/2 HP. The drive accepts 120 or 240AC input to output 0-130 or 240VDC, respectively; resulting in higher speeds from standard 90 or 180VDC SCR duty motors. This innovative technology lets users operate many low voltage motors with only minor calibration adjustments.

MOSFET power devices switch at 22kHz, which is above the audible range, to provide fast circuit response and a constant 1.05 form factor over the entire 100:1 speed range. Highly efficient XL3025A drive provides cool,quiet motor operation with extended brush life and low maintenance. For convenience, the drives have a cage-clamp terminal block to make wiring easy.

Potentiometer Kit 202-0003 is included with a purchase of the XL3025A
