AS01396 DeviceNet Analog I/O for a VME card cage (formerly CDN396R)

Robust and reliable design is intended for use in factory automation and process control applications cPCI and VME form factors allow easy integration of the cards into cPCI and VME style racks. For a complete solution these cards are integrated into a card cage with customer defined signal distribution. A variety of models are available with a mix of digital I/O, interlocks, analog inputs, and analog outputs. All I/O and network signals are distributed through P2 connector

Main Features Include:

- Bi-directional ,isolated digital channels with built in over current and over temperature protection.
- Multi range analog inputs and outputs suitable for high capacitive loads.
- Safety compliant input and outputs.
- High Speed.
- Compliant with latest ODVA requirements.
