4.2.2 MVME702 Disk Interface Module

The MVME702 Disk Interface Module is a double-high VMEmodule that is designed to function as an extension of the MVME320 Disk Controller Module. The MVME702 performs signal switching and provides standard disk cable connections for different drives.

4.2.2.1 MVME702 Standard VERSAdos Configuration. Figure 4-3 illustrates the jumper header locations of the MVME702 Disk Interface Module. Table 4-3 lists the MVME702 jumper settings required to operate VERSAdos with the MVME702. Refer to the MVME702 Disk Interface Module User's Manual (MVME702) to compare these settings with the factory-set configuration.
