Mountain Engineering & Technology

ME-1001/2/3/4/5 Available Options

Option 1: Bench-Top Chassis

Option 2: 19" Rack-Mount Chassis

Option A: 120V Main Power

Accepts 105V to 130V power input at 45Hz to 66Hz.

Option B: 240V Main Power

Accepts 210V to 250V power input at 45Hz to 66Hz.

Option J: 100V Main Power

Accepts 90V to 110V power input at 45Hz to 66Hz.

Option C: Battery Back-Up

Keeps the internal memory alive while main power is OFF. At power ON, the ME-1001/2/3/4/5 returns to its operating state prior the last power OFF. Memory shelf-life is approximately 2 years.

Option D: Noise Mixer (More Info)

Auxiliary inputs on rear of ME-1001/2/3/4 (BNC and Bantam) accept noise impairment signal input. The noise signal is resistively attenuated -18dB and additively mixed to the main signal input on the front of the ME-1001/2/3/4. This allows Interference Margin testing and is compatible with CCITT G.703 p.6.3.4 testing requirements. Noise port input impedance equals front panel selected line impedance (100Ω, 120Ω, or 75Ω).
