

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

If you were designing a state-of-the-art cell sorter, which features would you need?

- ☐ Four parameter sorting—including two fluorescence, two scatter, fluorescence polarization, and two-parameter ratios
- ☐ Microcomputer-controlled sorting, with convenient keyboard operation of programmed functions
- ☐ Two-laser fluorescence analysis and sorting (as an option)
- ☐ Compensation for dual-fluorescence emission overlap
- ☐ Cell volume for analysis and sorting (as an option—forthcoming)
- ☐ Floppy disc mass data storage (as an option)
- ☐ Rapid recording of up to four parameters per cell, enabling analysis upon recall from storage (as an option)
- ☐ User programmability for analysis (as an option)
- ☐ Isometric correlated data display, as well as updating two-parameter dot plot and profile histograms
- ☐ Single knob fluid control with orifice and sample backflush
- ☐ Autoclavable and temperature-controllable sample handling
- ☐ Fluorescence sensitivity to 3,000 molecules; scatter sensitivity to 0.3 micron diameter
- ☐ Sorting to 5,000 cells per second
- ☐ Purities to 99%; recoveries to 90%

☐ **ALL OF THE ABOVE**

Introducing FACS IV

FACS IV...for per-cell analysis of fluorescence and size parameters used as criteria for physically isolating distinct, viable subpopulations. Worldwide FACS applications include research in:

- Cell kinetics
- Immunologic function
- Enzyme reactions
- Chromosome analysis
- Immune response
- DNA, RNA and protein
- Live/dead cell discrimination
- Cell surface structures

For additional information, including an extensive bibliography, call or write B-D FACS Systems.

If it isn't a Napco® you may be reading the temperature in the water jacket ...not the chamber.

The Napco 7000 series are the only water jacketed automatic CO_2 incubator that actually tells you the temperature of the chamber, where your important experiment is taking place.

All other water jacketed automatic CO_2 incubators read the *temperature of the water,* not the chamber environment. If your research is temperature sensitive, reading the exact temperature of the chamber is critical.

For accuracy and reliability, insist on the Napco 7000 models. They are the most advanced incubators on the market. Available in single or space saving vertical models. There's much more. Write for brochure.

If you should ever have an equipment breakdown...

a Heinicke/Napco Minute Man will be on his way to you in 48 hours.

You'll seldom need the Minute Man service, because Heinicke and Napco instruments are built to work. But if you do, dial toll-free 800-327-9783.

Napco® water jacketed automatic CO_2 incubator. U.S. patent #3848569

National Appliance Company

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.

Learn more!

Visit us at **artisantg.com** for more info on price quotes, drivers, technical specifications, manuals, and documentation.

Artisan Scientific Corporation dba Artisan Technology Group is not an affiliate, representative, or authorized distributor for any manufacturer listed herein.

We're here to make your life easier. How can we help you today?
