Industrial Camera Advisor

National Instruments NI 1776 Smart Camera

- 1.6 GHz Intel Atom
- Monochrome 1600 x 1200 CCD image sensor
- Built-in lighting controller
- Program with LabVIEW Real-Time Module or configure with Vision Builder AI
- Includes Vision Builder AI

The NI 1776 Smart Camera features a monochrome Sony CCD image sensor with 1600x1200 (2 MP) resolution at 15 fps. It is one of the high-performance NI Smart Cameras that use a powerful Intel Atom 1.6 GHz processor for automated inspection applications. The rugged mechanical design, including IP67 housing, M12 connectors, and lens cover, protects the cameras against the harmful ingress of water (up to 1 m immersion) and dust.

NI Compatible Products

NI - Cable P/N	
197818-05	NI 17xx 5m Pigtail breakout cable

Note to IE Users: If camera files are opening as text in your browser, you can cause them to instead download with an option to save as a file by associating .icd files in Windows to open in a program like Notepad. This will save you from having to copy text in the browser and manually create and save the file. Here are instructions to do this:

create a text file on your desktop and rename it to have the .icd extension (you may be alerted about the file type - just click Yes to continue)

right-click on your new file, select **Open**, and choose the option to "Select from a list of programs"

choose Notepad from the list of programs, select the option to "Always use the selected program to open this kind of file", and open the file

Windows will now associate that file type with Notepad, and clicking Camera File links will download and save as desired
