- **NI recommends the USB-8486.**
- Life-cycle status: maintenance with a last-time-buy date of March 31, 2016
- Runs as Link Master or Basic Device
- Includes NI-FBUS Communications Manager software for Windows and OPC 2.0 compliant server
- Also supports NI-FBUS Configurator, Monitor; works with LabVIEW graphical programming
- H1 (31.25 kb/s) interface

View Support Resources (http://sine.ni.com/psp/app/doc/p/id/psp-285/lang/en)

Overview | Specifications | Services | Resources

NI recommends the USB-8486.

The PCI-FBUS/2 connects FOUNDATION Fieldbus devices to standard desktop or industrial PCs. This interface, which connects to H1 (31.25 kb/s) networks, is a 2-port configuration. NI-FBUS Communications Manager (CM) software for Windows is included with each interface. NI-FBUS CM provides a high-level interface to FOUNDATION Fieldbus devices without requiring in-depth knowledge of lower-level Fieldbus protocols. HMI and DCS applications can use NI-FBUS CM for data collection and control on the Fieldbus. With the PCI-FBUS/2, a PCI bus computer can act as the host in a FOUNDATION Fieldbus system.
