sbRIO-9505

C Series Motor Drive Module

Non-Enclosed, Full H-Bridge Brushed DC Servo C Series Motor Drive Module—The sbRIO-9505 module includes a built-in encoder interface and current sensor, and it provides direct connectivity to actuators such as fractional horsepower brushed DC servo motors, relays, lamps, solenoids, and valves. With its low power consumption and small size, combined with the reconfigurability and performance of the FPGA, you can create intelligent, energy-efficient control systems. You can also use data from the current sensor for flexible sampling time and filtering of the motor current.
Non-enclosed modules are designed for OEM applications.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
