NETGEAR's Dual Speed hubs—

highly capable and very compact

10/100 Mbps Dual Speed Hub

DS104 DS106 DS108 DS116

NETGEAR's DS100 Series 10/100 Mbps Dual Speed Stackable Hubs connect PCs to share e-mail, Internet access, printers, and files. Their exceptional adaptability enables you to mix and match 10 and 100 Mbps PCs, servers, and peripherals on the same network with ease and without any configuration required. Every hub in the DS100 family offers multiple capabilities in a very compact and affordable unit, particularly designed for small business use.

ALERT

Auto-sensing dual-speed ports individually sense and adjust to run at 10 or 100 Mbps, allowing you to upgrade your network speed effortlessly.

SELF-RELIANT

Every port automatically operates at the proper speed, while the built-in 10 to 100 Mbps bridge automatically discovers where each user is and filters or forwards traffic accordingly.

EXPLICIT

Network ports with built-in LEDs provide clear and intuitive status for instant feedback on hub connections and of network activity.

DS104/DS108 shown

MIX & MATCH

All devices on the same network—whether connected at 10 Mbps or 100 Mbps—operate at maximum performance.

NEAT

Compact metal case design gives you an uncluttered desktop and enables wall-mount installation.

Help is there when you need it!

NETGEAR provides free, 24x7 telephone and e-mail technical support in English with selected local language support during office hours.
