Clamping Fork, 1.0 in. Diameter Pedestals, Captive 1/4-20 Screw, Short Slot

Overview

The 9916 stainless steel clamping fork is unique because the cap-head screw is held captive in the slot of the fork so that it can't fall out. Think about how many times and how much time you have spent looking for the exact screw to clamp the forks in your experiment - you will quickly understand the value these forks provide. 9916 clamping fork has a 1.0 in. standard slot to provide complete positioning range.

Technical Specs

Type	Short Pedestal Clamping Fork w/ Screw
