Pedestal Base Clamping Forks

Pedestal Base Clamping Forks provide maximum flexibility in optical system construction by securely mounting 1 in. (25.4 mm) optical pedestals and pedestal-base post holders anywhere on an optical table or breadboard. The forks' slotted design allows for versatile mounting at any distance from an optical table's mounting hole, and captive screw versions avoid the need for finding a separate screw to secure.

- Secure optical pedestals anywhere on optical tables
- Slotted for mounting flexibility
- Versions with encapsulated screws
- Stainless steel construction

Compare	Model	Availability	Price
	**9916** Clamping Fork, 1.0 in. Diameter Pedestals, Captive 1/4-20 Screw, Short Slot	In Stock	$15
	**9909** Clamping Fork, 1.0 in. Diameter Pedestals, Captive 1/4-20 Screw, Long Slot	In Stock	$16
	**PS-F** Clamping Fork, 1.0 in. Diameter Pedestals, 1/4-20 (M6) Slot	In Stock	$9.25
	**PS-F-PK** Clamping Fork 10 Pack, 1.0 in. Diameter Pedestals, 1/4-20 (M6) Slot	In Stock	$86
	**9916-M** Clamping Fork, 25.4 mm Diameter Pedestals, Captive M6 Screw, Short Slot	In Stock	$15
	**9909-M** Clamping Fork, 25.4 mm Diameter Pedestals, Captive M6 Screw, Long Slot	In Stock	$16
	**PS-C-SET** Pedestal Clip Set, Two Clips, Two 1/4-20 Screws	In Stock	$15
	**M-PS-C-SET** Pedestal Clip Set, Two Clips, Two M6 Screws	In Stock	$15

Features

Flexible Positioning of Optical Pedestals

Pedestal Base Clamping Forks allow you to mount 1 in. (25.4 mm) optical pedestals and pedestal base post holders with the most flexibility in positioning on any optical table or breadboard. The slotted design allows the positioning of mounting screws over a range of distances and orientations relative to any single mounting hole. All of these clamping forks are made from solid stainless steel for the most stable hold of optical posts. The PS-F model clamping fork features a 1/4-20 slot for mounting to an optical table.

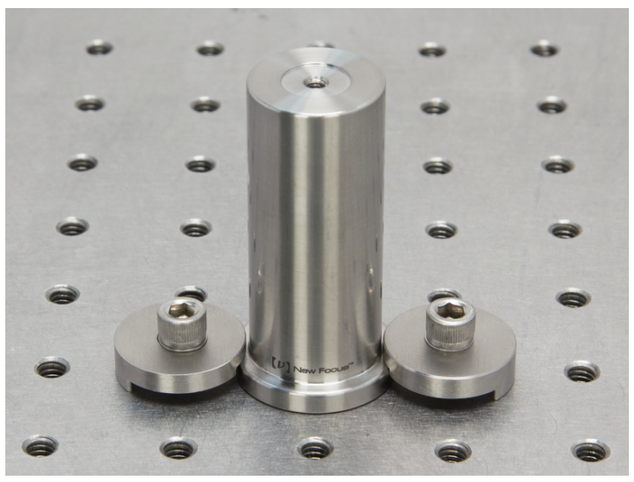

Captive Screw Versions

Model 9916 features an encapsulated 1/4-20 screw to avoid the need for locating a screw separately. Model 9909 offers a long adjustment slot, also with an encapsulated 1/4-20 screw. Metric version with M6 encapsulated screws are also available.

Standard Clamping Forks

The PS-F Clamping Fork secures a 1 inch (25.4 mm) diameter optical pedestal anywhere on an optical table. This stainless steel clamping fork provides positioning flexibility with a 1/4-20 slot and secure mounting for optical pedestals.

Pedestal Clips for Tight Mounting Space

The stainless steel PS-C-SET Pedestal Base Clipping Bridles decrease the amount of occupied table space needed for mounting, compared to standard clamping forks. These clips create a symmetrical clamping force around the center of the post. This even force prevents one-sided post deflections when tightening a post. The set includes 1/4-20 mounting screws and washers, or M6 screws and washers for the metric version.
