Optical Post Clamps

Optical post clamps come in a variety of designs to provide attachment of 0.5 in. posts to each other, or directly to optical mounts, at various angles. Most clamp designs lock posts in place with a thumb-turned screw and feature 8-32 (M4) threaded hole for attaching mounts.

- Clamp posts together at various angles
- Fixed 90-degree and adjustable versions
- Compatible with 0.5 in. diameter optical posts

Ordering Information

Compare	Model	Drawings, CAD & Specs	Availability	Price
(/p/9911)	**9911 (/p/9911)** Post Clamp, 8-32 (M4) Thru-Hole, 0.5 in. Posts		In Stock	$20.00
(/p/9917)	**9917 (/p/9917)** Post Clamp, 0.5 in. Diameter Posts, 8-32 Thread		In Stock	$20.00
(/p/9917-M)	**9917-M (/p/9917-M)** Post Clamp, 12.7 mm Diameter Posts, M4 Thread		In Stock	$20.00

(/p/CA-T)	**CA-T (/p/CA-T)** In-Line T Post Clamp, 0.5 in. Optical Posts		In Stock	$12.00

Features

Multiple Right Angle Clamp Designs

Models CA-1 , CA-T, and Right-Angle Optical Post Clamps mount two 1/2 inch optical posts, respectively, at 90° to each other. The clamping screws permit fast, secure post mounting by hand. Our model 9935 right-angle post clamps allow for a cantilever a post at 90° to the table or mount two 1/2 inch posts at right angles to each other. Models 9917 and 9911 optical post clamps have 8-32 (M4) threaded holes for mounting optical components, which in turn tightens the clamp to the optical post.

Adjustable Angle Clamps for Custom Mounting Angles

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Model CA-2 Adjustable-Angle Post Clamps hold two 1/2 inch optical posts at an adjustable angle between them. Both posts are tightened simultaneously with the knurled knob. Model 9930 clamps have two separate clamping and mounting screws, while Model 9936 swivel optical post clamps allow you to orient two posts at any rotated angle to one another. These 9930 Post Clamp fastens a mount at any angle to a post with separate adjustment and clamp screws to allow repositioning of an attached mount without loosening the post clamp. The Model 9930 has an 8-32 threaded hole for fastening a mount with a clearance hole.
