

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Hand Switch Magnetic Bases

These magnetic bases reduce experimental set-up time by allowing free positioning and instant clampdown of optical components with the turn of a switch. They are the ideal accessories for all laboratories with ferromagnetic work surfaces such as optical tables or breadboards.

- Ideal for quick setups
- On/Off hand switch with strong holding forces
- Available with kinematic top plate for repeatable positioning
- Non-magnetic mounting surfaces with versatile hole patterns

Features

Standard Magnetic Base

The MB-2 Magnetic Base provides a single 1/4-20 (M6) tapped hole ideal for mounting VPH or MPH Series Post Holders.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Model MB-2

Compact Magnetic Base

The Model MB-3 Magnetic Base features an aluminum mounting plate, which provides two significant advantages compared to other economy bases: a generous array of tapped mounting holes, plus decoupling from the base's magnetic field.

Model MB-3

Magnetic and Kinematic Combined

Newport's unique Model 110 Kinematic Magnetic Base combines a space-efficient magnetic base with a kinematic base that lets you remove components and replace them with repeatable precision. Components may be attached directly to the base, or the unique kinematic top plate lets you remove components and replace them with repeatable precision.
Model 110 may also be attached to tables on its side. The kinematic top plate is equipped with spring-steel clamping hooks that hold the kinematic plates together. Alternatively, two bolts may be used to clamp the plates together. This provides secure clampdown of cantilevered or rod-mounted loads.
