Flipper Mount, Motorized, 1.0 in., Allen-Key Adjustment, 8-32

Overview

The 8892-K Motorized Flipper Mount allows you to remotely flip a 1.0 inch (25.4 mm) diameter optic in and out of your beam path with a transit time of less than half a second. Originally designed for demanding commercial applications, the Model 8892-K motorized Flipper mount offers excellent stability and repeatability. Optic tilt is adjusted with our precision 80 pitch Allen-key screws, and locking nuts preserve your settings during flips. The Flipper mount's included hand pad lets you control it from a distance with your thumb, or you can control it even more remotely via its TTL interface. 8-32 tapped mounting holes.

Technical Specs

Connector Type	4 Pin	**Drive Type**	Motorized
Type	Flipper Mount	**Angular Range**	±2 °
Optic Diameter	25.4 mm
