Cylindrical Laser Mounts

ULM-TILT

ULM

- **Accurate beam placement over long distances**
- **Holds cylindrical laser heads ranging from 1–1.75 in. (25.4–44.5 mm)**
- **Laser beam centerline lines up over table holes**
- **English and Metric compatible**
- **±4.5° tip and tilt**

ULM Series Cylindrical Laser Mounts attach to 340-RC and 370-RC Rod Clamps and provide a convenient way to attach any 1–1.75 in. (25.4–44.5 mm) diameter cylindrical laser to Newport positioners and tables. To prevent wobble, the laser head is held securely by a nylon thumbscrew against two full-length contacts formed by a V-groove.

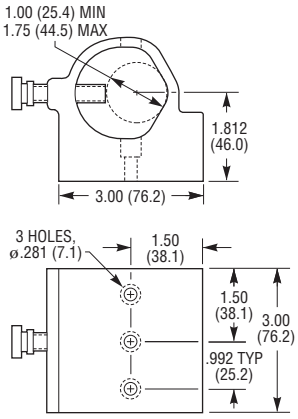

Model ULM-TILT provides two axes of precision angular adjustment using a stable kinematic three-point design for drift-free pointing of laser heads and other cylindrical objects.

Model ULM is a fixed, non-adjustable laser mount that may be bolted to other components via three horizontal clearance holes.

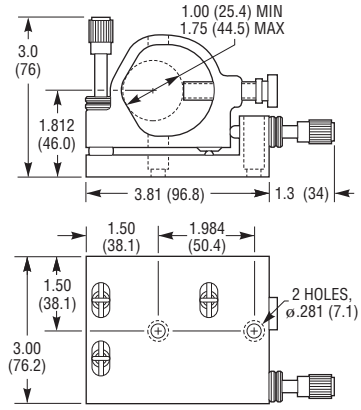

Ordering Information

Model	Description
ULM	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, Fixed
ULM-TILT	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, High-Resolution AJS Adjusters
ULM-TILT-M	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, SM-13 Micrometers
