Top Adjust Gimbal Mirror Mounts

With both drives accessible from the top side, VGM Series top-adjust gimbal mounts are ideal for applications where adjustments must be performed without obstructing the beam path, such as laser-cavity mirrors, output couplers and beamsplitters.

- Adjustment without obstructing the beam path
- True gimbal motion
- Exchangeable actuators
- Low stress mirror mounting mechanism

See All Features

Compare	Model
	**VGM-2AJS** Gimbal Optical Mount, Vertical Drive, 2.0 in., AJS Adjustment Screws
	**VGM-2BM** Gimbal Optical Mount, Vertical Drive, 2.0 in., Standard Micrometers
	**VGM-2N** Gimbal Optical Mount, Vertical Drive, 2.0 in. Diameter, No Actuators

Features

Keep Your Hands Out of Harms Way

Top adjust mounts have their adjustment screws located above where the optic is held so that your hands never have to cross into the beam path area.

Your Choice of Actuator - Or Not

With the VGM series Top-Adjust Gimbal Mounts, you have a choice of three types of actuators: adjustment screw, standard micrometer or differential micrometer. For applications requiring a user-supplied actuator, VGM mounts can be ordered without actuators. Models VGM-1N and -2N are sold without actuators.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment
