Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Accessory and Cable Selection Guide

**Step 1.** Find your selected signal source in Table 1, 2, or 3 below.

**Step 2.** From that table, determine which accessories are available for use with your selected signal source (Table 4 provides a brief description of accessories and page numbers for more detailed information).

**Step 3.** Next, pinpoint the appropriate cables for use with your selected source based on the accessory you have chosen.

---

1. With the CA-1000, you must also purchase either the SCB-68 or the CB-68LPR. See page 341 for more details on configuring a CA-1000.
2. With the CA-1000, you must also purchase the CB-50LP. See page 341 for more detail on configuring a CA-1000.
I/O Connector Blocks

BNC-2110 Connector Block (see Figure 1)
The BNC-2110 is a shielded connector block with signal-labeled BNC connectors for easy connectivity of your analog output, digital I/O, and counter/timer signals to your simultaneous analog output device.
Dimensions – 20.3 by 11.2 by 5.5 cm (8.0 by 4.4 by 2.2 in.)
BNC-2110 .............................................................777643-01

SCB-68 Shielded I/O Connector Blocks (see Figure 2)
The SCB-68 is a shielded I/O connector block giving you rugged, very low-noise signal termination. The SCB-68 also houses silk-screened component locations for easy addition of simple signal conditioning circuitry for your analog output channels.
Dimensions – 19.5 by 15.2 by 4.5 cm (7.7 by 6.0 by 1.8 in.)
SCB-68 ........................................................................776844-01

CA-1000 Custom Connectivity Enclosure (see Figure 3)
The CA-1000 is a configurable enclosure that gives you user-defined connectivity and flexibility through customized panelettes. Each enclosure can accommodate up to 9 panelettes. See page 341 for more information on the CA-1000.
Dimensions – 30.7 by 25.4 by 4.3 cm (21.1 by 10.0 by 1.7 in.)

TBX-68 I/O Connector Block with DIN-Rail Mounting (see Figure 4)
Termination accessory with 68 screw terminals for easy connection of field output signals to 68-pin DAQ devices. Includes one 68-pin male connector for direct connection to 68-pin cables. The TBX-68 is mounted in a protective plastic base with hardware for mounting on a standard DIN rail. Dimensions – 12.50 by 10.74 cm (4.92 by 4.23 in.)
TBX-68 ........................................................................777141-01
CB-68LP and CB-68LPR I/O Connector Blocks (see Figures 5 and 6)
Low-cost termination accessory with 68 screw terminals for easy connection of field output signals to analog output devices. Includes one 68-pin male connector for direct connection to 68-pin cables. The connector blocks include standoffs for use on a desktop or for mounting in a custom panel. The CB-68LP has a vertical mounted 68-pin connector. The CB-68LPR has a right-angle mounted connector, and is used with the CA-1000.
CB-68LP dimensions – 14.35 by 10.74 cm (5.65 by 4.23 in.)
CB-68LPR dimensions – 7.62 by 16.19 cm (3.00 by 6.36 in.)
CB-68LP ....................................................................................................777145-01
CB-68LPR ..................................................................................................777145-02

CB-50 I/O Connector Block with DIN-Rail Mounting (see Figure 7)
Termination accessory with 50 screw terminals for easy connection of field output signals. Includes one 50-pin header for direct connection to 50-pin cables. The CB-50 includes a protective plastic base and hardware for mounting on either a standard DIN-rail, or flush on a wall or panel. Dimensions – 13.5 by 7.3 cm (5.3 by 2.9 in.)
CB-50 ........................................................................................................776164-90

CB-50LP I/O Connector Block (see Figure 8)
Termination board with 50 screw terminals for easy connection of field output signals. Includes one 50-pin header for direct connection to 50-pin cables. The CB-50LP includes metal standoffs for use on a desktop or for mounting on a custom panel.
Dimensions – 13.26 by 7.19 cm (5.22 by 2.83 in.)
CB-50LP ....................................................................................................777101-01
CB-27 I/O Connector Block [see Figure 9]
Portable connector block with 28 screw terminals for easy connection of field output signals to the DAQCard-AO-2DC. Includes one 30-pin header for direct connection to a PR27-30F or R30-30 cable. The CB-27 is housed in a protective plastic enclosure.

CB-27 ........................................................................................................777100-01

Arbitrary Waveform and Frequency Generator Cables

SMB 110 Cable [see Figure 10]
SMB male to BNC female, 50 W coaxial cable for use with the NI 5431.

1 m ............................................................................................................763405-01

SMB300 Cable [see Figure 11]
SMB male to alligator clip for use with the NI 5401, NI 5411, and NI 5431.

1 m ............................................................................................................763388-01

SHC50-68 Cable [see Figure 12]
Digital cable for connection to generic 68-pin accessories. Use the SHC50-68 to connect the NI 5411 and NI 5431 to the SCB-68 and TBX-68 connector blocks.

50 cm ..................................................................................................184748-0R5
1 m ............................................................................................................184748-01
2 m ............................................................................................................184748-02
Signal Sources Accessories and Cables

RTSI Bus Cables (see Figures 13 and 14)
Use RTSI cables to connect timing and synchronization signals among measurement, vision, motion, and CAN boards. For systems with long and short boards working together, use the extended RTSI cable.

- 2 boards ........................................................... 776249-02
- 3 boards ........................................................... 776249-03
- 4 boards ........................................................... 776249-04
- 5 boards ........................................................... 776249-05
- Extended, with 5 connectors.......................... 777562-05

Shielded I/O Cables
SH68-68-EP (see Figure 15)
Shielded 68-conductor cable terminated with two 68-pin female 0.050 series D-type connectors. Features individually shielded analog twisted pairs for reduced crosstalk with high-speed devices. This cable works with all NI 671x Family devices.

- 1 m................................................................................. 184749-01

SH68-68R1 (see Figure 16)
Similar to SH6868 except one end terminates with a right-angle 68-pin female 0.050 series D-type connector.

- 1 m................................................................................. 185785-01
SH68-68-D1
Similar to the SH6868 cable but dedicated for use with the NI 670x analog output devices.
1 m..........................................................183432-01
2 m..........................................................183432-02

SHC68-68-EP [see Figure 17]
Shielded cable for connecting and latching the NI 6715 to standard 68-pin accessories.
Latching screws secure the shielded connector to the DAQCard itself for stability. Use the
SHC68-68-EP for a DAQCard located in the bottom PCMCIA slot of a laptop.
50 cm ............................................................................................................186838-0R5
1 m ............................................................................................................186838-01

SHC68U-68-EP
Same as SHC68-68-EP, except the DAQCard side connector is inverted to allow two
latching DAQCards to be used concurrently. Use this cable with a DAQCard inserted in the
upper PCMCIA slot in your laptop.
50 cm ............................................................................................................186838-0R5
1 m ............................................................................................................186838-01

PSH27-50F-D1 [see Figure 18]
Shielded cable that connects to a DAQCard-AO-2DC and is terminated with a 50-pin
female connector that attaches directly to 50-pin accessories.
50 cm ............................................................................................................776989-0R5
1 m ............................................................................................................776989-01

Ribbon I/O Cables
R6868 Ribbon Cable [see Figure 19]
68-conductor flat ribbon cable terminated with two 68-pin connectors. Use this cable to
connect the NI 670x and NI 671x analog output devices to low-cost 68-pin accessories.
1 m ............................................................................................................182482-01

PR27-30F [see Figure 20]
Ribbon cable that connects to a DAQCard-AO-2DC and is terminated with a 30-pin female
connector that attaches directly to a 30-pin accessory, such as the CB-27.
50 cm ..........................................................777131-005
1 m ..........................................................777131-01
Artisan Technology Group is an independent supplier of quality pre-owned equipment.

Gold-standard solutions
Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment
Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We’ll give it a new home.
