Analog Input Modules for Compact FieldPoint and FieldPoint

NEW

NI [c]FP-AI-100, NI [c]FP-AI-102, NI [c]FP-AI-110, NI [c]FP-AI-111

- 8 or 16 voltage or current inputs
 - ± 120 V input range, maximum
 - 0 to 20, 4 to 20 mA input ranges
- Built-in signal conditioning
 - 50, 60, and 500 Hz noise rejection
- 12 and 16-bit resolution
- Software-configurable input ranges per channel
- 2,300 V_{rms} bank isolation for transient overvoltage protection
- Hot-swappable with autoconfiguration
- -40 to 70 °C operating range

Module	Input Channels	Resolution	Input Type	Input Ranges	50/60 Hz Noise Filter	All-Channel Update Rate
				(Software Configurable per Channel)		
[c]FP-AI-100	8	12 bits	Voltage Current	± 1 V, ± 5 V, ± 15 V, ± 30 V, 0 to 1 V, 0 to 5 V, 0 to 15 V, 0 to 30 V 0 to 20 mA, 4 to 20 mA, ± 20 mA	–	360 Hz
[c]FP-AI-102	8	12 bits	Voltage	± 20 V, ± 60 V, ± 120 V, 0 to 20 V, 0 to 60 V, 0 to 120 V	–	360 Hz
[c]FP-AI-110	8	16 bits	Voltage Current	± 60 mV, ± 300 mV, ± 1 V, ± 5 V, ± 10 V, 0 to 1 V, 0 to 5 V, 0 to 10 V 0 to 20 mA, 4 to 20 mA, ± 20 mA	✓ (software selectable)	5 Hz to 0.66 Hz (rate varies with filter settings)
[c]FP-AI-111	16	16 bits	Current	0 to 20 mA, 4 to 20 mA, ± 20 mA	✓ (software selectable)	3 Hz to 0.83 Hz (rate varies with filter settings)

Overview

The National Instruments [c]FP-AI-1xx devices are versatile analog input modules for Compact FieldPoint and FieldPoint that can be used to measure voltages ranging from the millivolt level to the 120 V high-voltage level in applications such as battery-pack monitoring, fuel-cell testing, and general measurement from transducers. These modules can also measure 0 to 20 or 4 to 20 mA current loops from industrial sensors and transmitters. All the modules include overranging and onboard diagnostics to ensure trouble-free installation and maintenance. The modules measure and linearize signals on-board to return scaled values to your control or monitoring software. The [c]FP-AI-1xx modules come with NIST-traceable calibration certificates, ensuring accurate and reliable analog measurements.

Smart I/O Modules

With [c]FP-AI-1xx analog input modules, you can directly connect to your industrial sensors or units under test and get high-accuracy measurements. The I/O modules filter, calibrate, and scale raw sensor signals to engineering units, as well as performing self-diagnostics to

look for problems with the module or the wiring. With FieldPoint modules, your software application reads a linearized, calibrated, and scaled value from the I/O module, eliminating the error-prone step of converting binary values to voltage or current values. For increased accuracy and noise rejection, the [c]FP-AI-110 and [c]FP-AI-111 use a 16-bit delta-sigma ADC with an integrated lowpass filter on each channel, which you can configure for 50 Hz, 60 Hz, or no rejection. With high-accuracy 12-bit ADCs or 16-bit delta-sigma ADCs on the I/O modules, you also get instrument-quality measurements on an industrially rugged, distributed, embedded system.

[c]FP-AI-1xx modules offer a variety of update rates to fit your application, ranging from 0.66 to 360 Hz. These rates vary based on the module used and on the noise filter settings selected on the module. Overall data throughput depends on software loop speeds and network speeds. With overranging and underranging, the [c]FP-AI-1xx analog input modules can measure inputs or sensors that are not calibrated to standard ranges. For example, when configured for an input range of 4 to 20 mA, the modules actually measure inputs from 3.5 to 21 mA.

Analog Input Modules for Compact FieldPoint and FieldPoint

Isolation

[c]FP-AI-1xx modules feature optical bank isolation with 2,300 V_{rms} of breakdown isolation. In addition, the [c]FP-AI-100, [c]FP-AI-102, and [c]FP-AI-110 modules provide double insulation for up to 250 V_{rms} of operational isolation. Compact FieldPoint can safely be used in applications where hazardous voltages are present with the cFP-CB-1 connector block. FieldPoint can safely be used in applications where hazardous voltages are present with the FP-TB-x terminal base. These Compact FieldPoint and FieldPoint modules do not have channel-to-channel isolation.

Field I/O Connections

Compact FieldPoint and FieldPoint modules include a built-in power distribution bus that provides multiple power connections on the module. A field-wired power supply connected to the voltage (V) and common (C) terminals is internally connected to a power distribution bus that provides additional breakout terminals for voltage supply (V_{SUP}) and common (COM). These terminals provide a convenient way to distribute power to field devices that require external power.

Each input channel on the AI-100 and AI-110 has four terminals:

1. Voltage input (V_{IN})
2. Current input (I_{IN})
3. Common (COM)
4. Power connection to power field devices or loop powered current loops (V_{SUP})

The AI-111 has:

- 16 current input terminals (I_{IN})
- 8 common terminals (COM)
- 8 power connections for field devices or current loops (V_{SUP})

The AI-102 module has:

- 8 voltage input terminals (V_{IN})
- 16 common terminals (COM)
- 8 power connections to power field devices (V_{SUP})

Isolation Voltage

Maximum isolation voltage	250 V _{rms} , Installation Category II
Channel-to-channel isolation	No isolation between channels
Transient overvoltage	2,300 V _{rms}

Physical Characteristics

LED indicators	
POWER (green)	Power on and self-test passed
READY (green)	Module configured and ready
Dimensions (including terminal base)	10.9 by 10.9 by 9.1 cm (4.3 by 4.3 by 3.6 in.)
Weight	
[c]FP-AI-110, [c]FP-AI-111	136 g (4.8 oz)
[c]FP-AI-100, [c]FP-AI-102	145 g (5.1 oz)

Power Requirement

Power from network module	
[c]FP-AI-110, [c]FP-AI-111	350 mW
[c]FP-AI-100, [c]FP-AI-102	400 mW

Environment

Operating temperature	-40 to 70 °C
Storage temperature	-55 to 85 °C
Relative Humidity	10 to 90%, noncondensing

Shock and Vibration

These specifications apply only to Compact FieldPoint. NI recommends Compact FieldPoint if your application is subject to shock and vibration.

Operating vibration, random	
(IEC 60068-2-64)	10 to 500 Hz, 5 g _{rms}
Operating vibration, sinusoidal	
(IEC 60068-2-6)	10 to 500 Hz, 5 g
Operating shock	
(IEC 60068-2-27)	50 g, 3 ms half sine, 18 shocks at 6 orientations; 30 g, 11 ms half sine, 18 shocks at 6 orientations

Safety

This product is designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 3121-1, UL 61010C-1
- CAN/CSA C22.2 No. 1010.1

For UL, hazardous location, and other safety certifications, refer to the product label or to ni.com

Electromagnetic Compatibility

CE, C-Tick, and FCC Part 15 (Class A) Compliant

Emissions

Immunity

For EMC compliance, operate this device with shielded cabling.

CE Compliance

This product meets the essential requirements of applicable European Directives, as amended for CE Marking, as follows:

Low-Voltage Directive (safety)

Electromagnetic Compatibility

Directive (EMC)

Refer to the Declaration of Conformity (DoC) for this product for any additional regulatory compliance information. To obtain the DoC for this product, visit ni.com/hardref.nsf/ and search by model number or product line.

Module	Filter Settings	Update Rate (All Channels)	Input Bandwidth (-3 dB)
[c]FP-AI-100, [c]FP-AI-102	–	2.8 ms	170 Hz
[c]FP-AI-110	50 Hz	1.470 s	13 Hz
	60 Hz	1.230 s	16 Hz
	500 Hz	0.173 s	130 Hz
[c]FP-AI-111	50 Hz	1.230 s	13 Hz
	60 Hz	1.050 s	16 Hz
	500 Hz	0.290 s	130 Hz

Global Services and Support

NI has the services and support to meet your needs around the globe and through the application life cycle – from planning and development through deployment and ongoing maintenance – and tailored for customer requirements in research, design, validation, and manufacturing. We have direct operations in more than 37 countries and distributors in another 12 locations. Our local sales and support representatives are degreed engineers, ready to partner with you to find solutions that best fit your needs.

Local Sales and Technical Support

In offices around the globe, our staff is local to the country so that you have access to field engineers who speak your language and are available to consult on your unique needs. We also have a worldwide support organization staffed with Applications Engineers trained to quickly provide superior technical assistance. Use our online Request Support interface (ni.com/support) to define your question, then speak to or e-mail an Applications Engineer, or access more than 14,000 worldwide measurement and automation professionals within NI Developer Exchange Discussion Forums. ni.com/support also provides immediate answers to your questions through self-help troubleshooting, product reference, and application development resources. For advanced technical support and software maintenance services, sign up for Premier Support, a program that provides expanded hours of support availability and expedited phone/e-mail response time (typically four business hours).

Training and Certification

NI recognizes that both initial instruction and ongoing education contribute to your success. NI provides a variety of training alternatives, from self-paced tutorials and interactive CDs, to worldwide hands-on courses taught by experienced instructors – all designed so that you can choose how to learn about our products. Further, NI offers certifications acknowledging individual expertise in working with NI products and technologies. Visit ni.com/training for more information.

Professional Services

Our Professional Services team consists of National Instruments Applications Engineers, NI Consulting Services, and the worldwide National Instruments Alliance Partner Program (a network of 600 independent consultants and integrators). Our Professional Services team can offer services ranging from basic start-up assistance and collaborative development with your engineers, to turnkey system integration and maintenance of your system.

In addition to our NI Alliance Partners, we have developed global relationships with many industry partners that range from computer software and hardware companies, such as Microsoft, Dell, Siemens, and Tektronix. By collaborating with these companies, you receive a complete spectrum of solutions – from components to turnkey systems. Find the Alliance Partner directory at ni.com/alliance

Product Services

NI hardware products are warranted against defects in workmanship and material for one year from the date of shipment. To help you meet project life-cycle requirements, NI offers extended warranties for an additional charge. NI provides complete repair services for our products. Express repair and advanced replacement services are also available. Or, order your software and hardware installed in PXI and PXI/SCXI™ systems with NI Factory Installation Services.

Ordering Made Easy

Visit ni.com/products to browse product specifications, make comparisons, or access technical representatives via online chat or telephone. Worldwide customers can use a purchase order or credit card to buy in local currency and receive direct shipments from local NI offices. Our North American Customer Service Representatives are available Monday through Friday between 7 a.m. and 7 p.m. Central Time. Outside North America, please contact the NI office in your country.

Order Status and Service Requests

National Instruments brings you real-time status on current orders at ni.com/status. Similarly, find out the status of open technical support incidents or hardware repair requests at ni.com/support/servicereq
