NI FP-AI-112

16-Channel Analog Voltage Input Module for NI FieldPoint

- Scheduled for obsolescence - last buy date is July 1, 2012
- 16 voltage inputs
- Measures 60 mV to 10 V signals -- unipolar and bipolar
- 16-bit resolution; 50/60 Hz noise rejection
- Input range and filter software configurable per channel
- -40 to 70 °C operating range; HotPnP (plug-and-play) operation

Overview

Important Note: The product is scheduled for obsolescence and has a last buy date of July 1, 2012. Repair warranty will continue for 5 years afterward until July 1, 2017. For new designs, National Instruments recommends CompactRIO.

The NI FP-AI-112 is a 16-channel input module for direct measurement of millivolt and low-voltage signals from a variety of sensors and transducers. It offers filtered low-noise analog inputs with 16-bit resolution and features overranging, HotPnP (plug-and-play) operation and onboard diagnostics to ensure trouble-free installation and maintenance. The module comes with a NIST-traceable calibration certificate to ensure accurate, reliable analog measurements.

Services

Extended Warranties

National Instruments designs and manufactures all products to minimize failures, however unexpected failures can still occur. Extended warranties provide a fixed economical price at the time of system purchase, covering any repair costs for up to three years. In addition, they offer the following benefits:

- Significant cost savings compared to individual repair incidents
- Fault location, diagnostics, and repair by NI any time the system product fails
- All parts and labor costs covered as well as any adjustments needed to restore the hardware to manufacturing specifications
