IP Telecommuter System Package			W1

Notes:

- Meridian 9617 USB Phones must be ordered separately. They are included in Nortel Networks' Consumer Products Product Catalog. Versions compatible with Meridian IP Telecommuter software are NT2N49AA/A0774004 (Chameleon Grey) and NT2N49AB/A0774005 (Black).
- MAT Release 6.5 or later required and must be ordered separately.
- MAT Alarm Management Module must be ordered to receive SNMP alarms for the ITG card.
- The IP Line Card occupies 2 slots on the IPE shelf.
- Requires X11 Release 22 or greater.
- One Liberaton CTI Headset (NTA149BM/A0757152) is included in each Meridian IP Telecommuter Package. It is primarily intended for validating correct installation of the IP Telecommuter application. Additional CTI headsets for use with the Meridian IP Telecommuter soft client must be ordered separately. For example, the Liberation CTI Headset is included in Nortel Networks' Meridian Business Sets Catalog.

Description	System Compatibility	Product compatibility	W/S
32MB DRAM SIMM Upgrade Kit			W1

Notes:

- This memory Upgrade Kit contains one (1) 32MB SIMM, installation documentation, faceplate labels and anti-static transportation bag.
- This kit supports DRAM memory upgrade of any existing memory configuration of Call Processor 68040 (NT9D19), Call Processor 68060 (NT5D10) or Call Processor 68060E (NT5D03) to one of the following memory configurations: 96 MB (32 flash, 64 DRAM), 112 MB (32 flash, 80 DRAM), 128 MB (64 flash, 64 DRAM), 144 MB (64 flash, 80 DRAM), 160 MB (64 flash, 96 DRAM). Some of the "resulting" memory configuration may not be available; availability depends upon the existing memory configuration of the call processor to be upgraded.
- It may be necessary to purchase more than one (NTZC75AA) kit to accomplish the DRAM memory upgrade.
- It may be necessary to purchase the 32 MB Flash memory upgrade kit (NTZC76AA) to accomplish the Flash portion of the memory upgrade.
- Consult the Meridian Configurator Upgrades System to determine the number of the number of DRAM Memory Upgrade Kits (NTZC75AA) and Flash Memory Upgrade Kits (NTZC76AA) required to upgrade a specific call processor memory configuration to the target memory configuration.
- Concurrent upgrade of one or more DRAM SIMMs and Flash Memory modules is supported by the installation documentation.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Description	System Compatibility	Product compatibility	W/S
Meridian Mail Release 4 to Release 13 Software Migration, GP to Modular GP		Meridian Mail GP R4	W1

Notes:

- The North American Master Tape is included in this package. A maximum of four languages are available per system, if additional languages are required, order the appropriate Release 13 language tapes.
- This package can only be used in conjunction with a hardware/software migration to a Modular Option GP when accompanied by an U706X or U707X hardware migration package.
- This package contains one Enhanced MMP40 processor upgrade. An Enhanced MMP40 upgrade is required for each node, order additional Enhanced MMP40 upgrades as required.
- Systems with Flashback Tape Drives must upgrade to a Tandberg Tape Drive.
- Systems with 155MB disk drives must upgrade to 2GB disk drives.
- Systems not running ACCESS Enable Option or AdminPlus can convert to Meridian Mail Release 8 on the way to Meridian Mail Release 13, without 2.5MB memory card. Systems with ACCESS Enable Option or AdminPlus must have 2.5MB memory card temporarily installed during the upgrade to Meridian Mail Release 8 on the way to Meridian Mail Release 13.
- The Meridian Mail Serial number is required when ordering this code.

Description	System Compatibility	Product compatibility	W/S
Meridian Mail Release 3 to Release 13 Software Migration, from Options to Modular Option		Meridian Mail Options (S, ST/RT, NT/XT, X) R3	W1

Notes:

- The North American Master Tape is included in this package. A maximum of four languages are available per system, if additional languages are required, order the appropriate Release 13 language tapes.
- If Integrated Mailbox Administration is to be used, X11 Release 19.23 or later software is required.
- This package is used for Migrations from a ST/RT, NT/XT, S, X Cabinet to a Modular Option Release 13 and must be accompanied by a U701X Modular Option hardware migration package.
- This package contains one Enhanced Processor upgrade. An Enhanced Processor upgrade is required for each node, order additional NTZD75BA Enhanced Processor upgrades as required.
- Systems with Flashback Tape Drives must upgrade to a Tandberg Tape Drive.
- Systems with 155MB disk drives must upgrade to 2GB disk drives.
- Systems not running ACCESS Enable Option, AdminPlus or HVS can convert to Meridian Mail Release 8 on the way to Release 13, without a 2.5MB memory card.
- The Meridian Mail Serial number is required when ordering this code.

Meridian Mail Modular Option Enhanced Processor 1 to 2 Node Expansion Package AC		Meridian Mail Modular Option	W1

Notes:

- The Enhanced Processor requires Meridian Mail Release 12.13 or higher. At Release 12.13, all processors in a system must be Enhanced Processors to use this package. With Release 13, a mixture of MMP40s and Enhanced Processors are supported on the same system.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- Two node Release 9 and later systems support from 16-24 ports.
- Expansions can only be performed on MMP40 or Enhanced Processor based systems.
- Order SERV0020 Meridian Mail Key Code Service (at no charge).
- Zero (0) ports are included in this package. Full and Basic Port Voice Processing Packages must be ordered separately to support the configuration.
- The Meridian Mail Serial number is required when ordering this code.

Notes:

- The Enhanced Processor requires Meridian Mail Release 12.13 or higher. At Release 12.13, all processors in a system must be Enhanced Processors to use this package. With Release 13, a mixture of MMP40s and Enhanced Processors are supported on the same system.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- Five node Release 9 and later systems support from 52-64 ports.
- Expansions can only be performed on MMP40 or Enhanced Processor based systems.
- Order SERV0020 Meridian Mail Key Code Service (at no charge).
- Zero (0) ports are included in this package. Full and Basic Port Voice Processing Packages must be ordered separately to support the configuration.
- The Meridian Mail Serial number is required when ordering this code.

OIVR 2 x Hardware - MRS/Tower or MRS/ Rack Disk Drive (1.05GB)	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Open IVR	W1

Notes:

- Compatible with OPEN IVR 2.X hardware running OPEN IVR 2.X software.
- The 1.05GB drive can accommodate approximately 96 hours of voice storage at a sampling rate of 24 kbs.
- These disks do not have operating system software installed on them. This is the reason for the difference in storage between the base system disk drives and these optional drives.
- The MRS/Tower and MRS/Rack can have any combination of disks up to a maximum of four. The base system includes one hard disk.
- This package is used only for disk storage expansion and sparing and is compatible with OPEN IVR 2.01 and 2.5 systems, including those upgraded to OPEN IVR 4.0.
- It cannot be used in conjunction with disk mirroring.

NAC Connectivity for Meridian MAX Release 9 Software	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX-IPE; Meridian MAX-IPEE; Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- This option can only be applied to Meridian MAX-IPE, Meridian MAX-IPEE, Meridian MAX-SNN, or Meridian MAX-SNNE Release 9 Enhanced or Virtual Software.
- This package requires permanent assignment of one asynchronous I/O port for connection to NAC.
- Customer must also order Meridian MAX Release 9 Reproduction/Keycode (P0885111). Keycode is provided with this package to use with customer's existing Meridian MAX Release 9 software tapes.
- The Meridian 1 Serial number must be provided when ordering this code.

Multiple Queue Assignment (MQA) Reporting for Meridian MAX Release 9 Software	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX-IPE; Meridian MAX-IPEE; Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- MQA requires X11 Release 21 or later with SW0230A Multiple Queue Assignment.
- Once MAX Multiple Queue Assignment (MQA) for Meridian MAX Release 9 option is enabled, it cannot be disabled.
- MAX Multiple Queue Assignment (MQA) for Meridian MAX Release 9 option can only be applied to Meridian MAX-IPE, Meridian MAX-IPEE, Meridian MAX-SNN, or Meridian MAX-SNNE Release 9 Enhanced or Virtual software, or equivalent.
- Use caution when ordering MQA. The way in which information is displayed when MQA is installed is different than when it is not. If agents will not be logging into multiple queues, Nortel recommends that MQA not be ordered.
- Customer must also order Meridian MAX Release 9 Reproduction/Keycode (P0885111). Keycode is provided with this package to use with customer's existing Meridian MAX Release 9 software tapes.
- The Meridian 1 Serial number must be provided when ordering this code.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

100-Agent Increment for Meridian MAX-SNN/SNNE Release 9 Software	21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- Required for Meridian MAX Release 9 agent expansions.
- Required to add agents in 100 agent increments beyond what is included in Base system software packages.
- Because base software includes support for 200 agents and the maximum capacity is 1200 agents, a maximum number of ten (10) of S0005906 can be ordered for one Meridian MAX-SNN or MAX-SNNE system.
- Customer must also order Meridian MAX Release 9 Reproduction/Keycode (P0885111). Keycode is provided with this package to use with customer's existing Meridian MAX Release 9 software tapes.
- The Meridian 1 Serial number must be provided when ordering this code.

10-Agent Increment for Meridian MAX-IPE/IPEE Release 9 Software	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX-IPE; Meridian MAX-IPEE	S3

Notes:

- Requires X11 Release 17 or later for Option 21-81. Requires X11 Release 16 or later for Option 11.
- Because Meridian MAX 9 base software includes support for 20 agents and the maximum capacity is 300 agents, a maximum number of twenty-eight (28) S0005907 can be ordered for one Meridian MAX 9 system.
- Customer must also order Meridian MAX Release 9 Reproduction/Keycode (P0885111). Keycode is provided with this package to use with customer's existing Meridian MAX Release 9 software tapes.
- The Meridian 1 Serial number must be provided when ordering this code.

8-Channel Asynchronous I/O Support for Meridian MAX Release 9 Software	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX-IPE; Meridian MAX-IPEE; Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- The base software packages for MAX-SNN and MAX-SNNE systems each contain support for 8 I/O channels. Since each new MAX-SNN and MAX-SNNE hardware platform can accommodate a maximum of forty (40) asynchronous I/O channels, a maximum quantity of four (4) each of S0005908 can be ordered for one system.
- Required when adding additional ports to the Meridian MAX Release 9 SNN or SNNE systems.
- Enables operation of one (1) VME322XT 8-Channel Asynchronous I/O Card (A0376918). This card is part of the NT6D98AA kit.
- Customer must also order Meridian MAX Release 9 Reproduction/Keycode (P0885111). Keycode is provided with this package to use with customer's existing Meridian MAX Release 9 software tapes.
- The Meridian 1 Serial number must be provided when ordering this code.

SYMPOSIUM WebResponse Server Installation Service			W0

Notes:

- A Nortel-EN/Field Services Technical Specialist will provide at least (2) two pre-installation conference calls to assist the end user/Distributor in readying the customer provided Windows NT Server, the end user's LAN/WAN/Internet environment and the client PCs for use with SYMPOSIUM WebResponse Server. Complete SYMPOSIUM WebResponse Server installation activities will be performed by a fully trained Nortel-EN/Field Services Professional Services Engineer. The on-site installation service includes a maximum of five (5) days of labor on the end user's premises to verify that the customer supplied Windows NT Server has a working TCP/IP network connection. A Nortel Professional Services Engineer will then load and configure the Sybase software and the SYMPOSIUM WebResponse Server software onto the customer supplied Windows NT Server. Installation also includes the loading and configuring of approximately five (5) client end users with the SYMPOSIUM WebResponse Server client software, the Sybase client software and then develop 1 (one) basic Web form. The end user/Distributor is responsible for the configuring of additional SYMPOSIUM WebResponse Server clients. On the Web site server, the Nortel Professional Services Engineer will assist the customer as they load and configure the CGI software onto the customer's Web site and also assist the customer as they load and configure the Entrust software. The Nortel Professional Service Engineers will verify that a "Web surfer" can complete the generic form and then verify that this generic form is received as a transaction at the SYMPOSIUM WebResponse Server client PC and that the client PC can process the transaction to closure.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Messenger 2.0/3.0 to 4.0 On-Site Migration Support			W0

Notes:

- Messenger 2.0/3.0 to 4.0 onsite Migration Support. A pre-upgrade conference call will be coordinated by Nortel technical specialists to ensure site readiness for the upgrade. Complete Release 4.0 Messenger server software upgrade activities will be performed by a fully trained Nortel-EN Field Services Professional Services Engineer (PSE). Software upgrade activities include the loading and configuring of the Messenger Release 4.0 server software and the loading and configuring of approximately three (3) client end users with the Release 4.0 Messenger client software. The end user/Distributor is responsible for the addition of subsequent Messenger clients to the Messenger server. This service includes the integrity of all Messenger 2.0/3.0 database information. Training is not included in this service. It can be ordered via SV000251.

SYMPOSIUM Express Call Center Installation and Configuration Service	11C COMPACT; 51C; 61C; 81; 81C		W0

Notes:

- Installation Project Management from receipt of order through scheduling the installation.
- Initial conference call to assist the end user/distributor in understanding the guidelines specified in the Pre-Installation Checklist.
- A Global Customer Services (GCS) Professional Services Engineer will travel to the end user location to provide up to three eight-hour days (normal business hours) of on-site installation activities: -Assist the Distributor's Technician/End User's LAN Administrator in the installation and configuration of the customer provided Windows NT Server as per the loading and configuring specification required for the Express application. -The GCS Engineer will also assist in the installation and configuration of the Express Server/Client application software on the server, the SECC client software on the Client Personal Computer, and configuration of the Meridian 1 and Meridian Mail resource configuration.
- The GCS Engineer will also provide an overview of how to administrate the call center, create user-defined reports, start displays, how to modify the call routing parameters, such as the hours of operation and non-business days, and how to perform daily and full backup.
- The price includes travel for installs within zone 1 (75 miles or less from a Global Customer Service Field Office). Outside of 75 miles, additional charges for travel and living will apply and vary depending on the location. -Zone 1 installations include reasonable travel to and from sites. Additional charges may apply if reasonable travel is not available. -Contact Nortel Global Customer Services Field Services (612-932-8536) for travel and living pricing outside of zone 1 locations.

Meridian MAX MQA Option for Enhanced and Virtual Software (Release 8)	11C X11 R22; 51C X11 R21,22; 61C X11 R21,22; 81 X11 R21,22; 81C X11 R21,22	Meridian MAX-IPE; Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- MQA requires X11 Release 21 or later with SW0230A Multiple Queue Assignment.
- Once this option is enabled, it cannot be disabled.
- This option can only be applied to Meridian MAX-IPE, Meridian MAX-SNN, or Meridian MAX-SNNE Release 8 Enhanced or Virtual software, or equivalent.
- Use caution when ordering MQA. The way in which information is displayed when MQA is installed is different than when it is not. If agents will not be logging into multiple queues, NORTEL recommends that MQA not be ordered.
- The Meridian 1 Serial number must be provided when ordering this code.

Description	System Compatibility	Product compatibility	W/S
8-Channel Asynchronous I/O Software Support for Meridian MAX Releases 6, 7, and 8 (MAX-SNN and MAX-SNNE)		Meridian MAX-SNN; Meridian MAX-SNNE	S3

Notes:

- The base software packages for MAX-SNN and MAX-SNNE systems each contain support for 8 I/O channels. Since each new MAX-SNN and MAX-SNNE hardware platform can accommodate a maximum of forty (40) asynchronous I/O channels, a maximum quantity of four (4) each of SW0081A can be ordered for one system.
- Required when adding additional ports to the Meridian MAX Release 5, 6, 7 or 8 SNN or SNNE systems.
- Enables operation of one (1) VME332XT 8-Channel Asynchronous I/O Card (A0376918). This card is part of the NT6D98AA kit.
- The Meridian 1 Serial number must be provided when ordering this code.

General Business Software Update	11E		S1

Notes:

- Updates are used to: 1) Move a system from one feature set to another (e.g. General Business to Enhanced Business), and 2) move a system from one software issue to another (e.g. from NTAK83AA to NTAK83AH).
- When ordering a software update, you must provide either the Option 11 system serial ID or the following information 1) the current software feature set (e.g. General Business or Enhanced Business); 2) the current terminal number (TN) level (e.g., 200 TNs or 300 TNs; and 3) whether Meridian Mail Card Option is implemented. If so, you must state whether it includes HVS or Networking. Order one of the update numbers, and a new cartridge will be shipped to you.
- A credit equal to the current price of the existing software as listed in the Product Catalog will be issued upon return of the old cartridge.
- The Meridian 1 Serial number must be provided when ordering this code for an existing Meridian 1 system.

Meridian Mail Option 11 Additional Language		Meridian Mail Card Option R8,10,11,12; Meridian Mail EC11 R10,11,12	S1

Notes:

- Order one for each additional language required; maximum of four languages. One language comes standard.
- For Release 8 Card Option systems with HVS, system resources may limit the availability of certain features and capabilities based on the configuration.
- Each additional language reduces storage capacity by three hours.
- One North American Master Tape is shipped with every system. Order additional Master Tape(s) separately, if required, based on language combination. A maximum of four (4) languages are available per system.
- The Meridian Mail serial number must be provided when ordering this code for an existing Meridian Mail. If ordered as part of a new Meridian Mail system for an existing Option 11 the Option 11 Site ID is required.

Meridian Mail Option 11 HVS Software		Meridian Mail Card Option R10,11,12; Meridian Mail EC11 R10,11,12	W1/ S1

Notes:

- HVS documentation is not included and must be ordered separately as required.
- For Release 8 Card Option systems with HVS, system resources may limit the availability of certain features and capabilities based on the configuration.
- Adding HVS software to an installed system requires complete software re-load and database re-build. Nortel recommends adding HVS software when the system is originally purchased if HVS will be required in the future.
- Meridian Mail Card Option HVS requires configuration engineering.
- The required RS232C Service Module (RSM) and its associated cable are available in the HVS Hardware Kit.
- Both hardware and software are required for Meridian Mail Card Option HVS. A VT420 compatible terminal such as the AS7011 DEC Terminal Package must be purchased separately.
- HVS is not compatible with Network Message Services on pre-MM11 systems. HVS quest mailboxes are not supported at Meridian 1 remote systems.
- The Meridian Mail serial number must be provided when ordering this code for an existing Meridian Mail. If ordered as part of a new Meridian Mail system for an existing Option 11 the Option 11 Site ID is required.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Description	System Compatibility	Product compatibility	W/S
Meridian MAX-IPE Release 4 to MAX-IPE Release 6 Base Software Upgrade	11 X11 R16,18,19,20,21,22,23; 11C X11 R16,18,19,20,21,22,23; 11E X11 R16,18,19,20,21,22,23; 21 X11 R17,18,19,20,21,22,23; 21A X11 R17,18,19,20,21,22,23; 21E X11 R17,18,19,20,21,22,23; 51 X11 R17,18,19,20,21,22,23; 51C X11 R17,18,19,20,21,22,23; 61 X11 R17,18,19,20,21,22,23; 61C X11 R17,18,19,20,21,22,23; 71 X11 R17,18,19,20,21,22,23; 81 X11 R17,18,19,20,21,22,23; 81C X11 R17,18,19,20,21,22,23	Meridian MAX; Meridian MAX-IPE; Meridian MAX-IPEE	W1

Notes:

- Requires X11 Release 17 or later for Option 21-81. Requires X11 Release 16 or later for Option 11.
- For X11 Release 17, prerequisites are SW0201B Basic ACD Features, SW0202C Advanced ACD Features, SW0203B ACD Reports Features, SW0204A ACD Load Management, SW0205A ACD Link (MAX) and SW0207A Enhanced ACD Overflow.
- Software Service Transaction Fee SERV0017 must be ordered with this package.
- Option 11: the Enhanced Business Software NTAK57BD (Release 16) or NTAK57BE (Release 18) is required on the Option 11 system to fully use the features for a non-networked call center.
- For X11 Release 18/19/20/21/22/23, prerequisites are SW0221A ACD/Message Processing (Release 18 only), SW0221B ACD/Message Processing (Release 19 only), SW0221C ACD/Message Processing (Release 20 and above), SW0224A Enhanced Call Center Management, and SW0222A Enhanced ACD Overflow.
- In order for Customer Controlled Routing support to function, SW0223A Enhanced ACD Routing (Release 18/19/20/21/22/23) or SW0210A (Release 17) is a prerequisite. Customer Controlled Routing hardware and application software are required for full CCR functionality. CCR is currently not supported on Option 11E and 11C.
- To upgrade an existing Meridian MAX-IPE system running on Release 4.62 to Release 6.
- Only MTE Release 5.31, or later, is supported by this release of MAX software.
- The Meridian 1 Serial number must be provided when ordering this code.

NAC (Release 2) Connectivity Enabler for Meridian MAX Releases 6 and 7	11; 11C; 11E; 21; 21A; 21E; 51; 51C; 61; 61C; 71; 81; 81C	Meridian MAX	S3

Notes:

- Requires Meridian MAX Release 6 software for SNN and IPE Systems.
- Requires Meridian MAX Release 4.30 for Meridian MAX Release 4 systems.
- Requires NAC Release 2 hardware and software packages. For detailed information on system configuration, consult the NAC Release 2 Ordering Procedures for New Systems, Expansions, Migrations and Upgrades.
- The Meridian 1 Serial number must be provided when ordering this code.

Meridian 1 Option 51C System Package AC	51C		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- This package includes sixteen Tip and Ring cables within the IPE module.
- Option 51C requires one Call Processor. The Call Processor is not included in the above package and must be ordered separately. See Call Processor notes to determine which Call Processors meet the Option 51C minimum memory requirements for the current software release.

Description	System Compatibility	Product compatibility	W/S
Meridian Link & CCR-IPEE Module (Option 11)	11C; 11E	Meridian CCR; Meridian Link	W1

Notes:

- Each system must have either a DEC 420 terminal or a HP700/32 equipped as the system console terminal. An appropriate system console terminal cable must also be equipped (NT1R03DB, C, F, P, V straight through M-M or NT1R03EB, C, F, P, V straight through M-F).
- An appropriate length (NT1R03DB, C, F, P, V straight through M-M) cable is required for the Application Module Link (AML) connection.
- An appropriate length (NT1R03DB, C, F, P, V straight through M-M) cable is required for the Serial Data Interface (SDI) connection.
- To use the Host Enhanced Voice Processing feature of Meridian Link Release 4B, an appropriate length (NT1R03DB, C, F, P, V straight through M-M) cable is required for the connection to the Meridian Mail system.
- An appropriate length (NT1R03DB, C, F, P, V straight through M-M) cable is required for the Meridian Link host connection.
- The A0669467 IPEE module occupies 3 consecutive card slots in the IPE Shelf of a Meridian 1, Option 11 main or expansion cabinet.
- For detailed information on system configuration, please consult the Meridian Link and CCR Co-Resident Ordering Procedures Bulletin.
- An appropriate length and gender cable (NT1R03DB, C, F, P, V straight through M-M or NT1R03EB, C, F, P, V straight through M-F) is required for each supervisor terminal, personal computer, and printer connected to a Meridian Link & CCR-IPEE Module.

Enhanced Meridian Mail Modular GP 36-48 Port 45/90/120/180/300/600 Hours Package DC	ATT; DMS-10; DMS-100; NEC; ROLM	Meridian Mail Modular GP	W1

Notes:

- This package contains the new Enhanced Meridian Mail Processor.
- All new Meridian Mail systems require Meridian Mail Base Software (NTZR57CA).
- Zero (0) ports are included in this package. Full and Basic Port Voice Processing Packages must be ordered separately to support the configuration.
- If connecting with an ATT, NEC or Rolm system, SW7061 SMDI/Connections software and the appropriate Connections hardware are required.
- Modular GP systems are only equipped as DC powered systems, an appropriate AC to DC rectifier such as the MFA150 is required and must be ordered separately for use in AC powered applications.

Enhanced Meridian Mail EC11 8-24 Port, 11/24/36/54/100/200 Hour Package		Meridian Mail EC11 R12	W1

Notes:

- This package contains the new Enhanced Meridian Mail Processor.
- A minimum of 8 ports must be ordered.
- All new Meridian Mail EC11 systems require Meridian Mail Base Software (NTZC57BA).
- AML link connectivity is achieved using a port on the NTAK02 (DCH/SDI) card on the Option 11.
- This system is equipped with one Mgate card. Each Mgate supports 16 voice ports. Order additional cards as required.
- The SDI/DCH 4 port cable (NTAK19FB) is used to provide connectivity for the AML link.
- Zero (0) ports are included in this package. Full and Basic Port Voice Processing Packages must be ordered separately to support the configuration.
- A tape drive is not included, if one is required to install or backup the EC11, both the external Tandberg tape drive or the external Viper tape drive are supported.

Meridian NAC, Release 2.5 Base System Hardware Platform, AC		NAC R2	W1

Notes:

- Must be housed in the NT7D18AA Application Equipment Module (AC).
- There must be at least one supervisor terminal and one printer equipped per system.
- Requires SW7426 NAC Release 2.5 Base Software Package.
- For detailed information on system configuration, please consult the NAC Release 2 Ordering Procedures for New Systems, Expansions, Migrations and Upgrades.
- Includes one VME332XT 8 Channel Asynchronous I/O Board, UDS 2440 Modem, a 10 Ft. modem cable, and a 45 Ft. System Console cable.
- There must be at least one system console equipped per system.
- There must be a Network link from NAC Release 2.5 to each Meridian MAX (AM) Release 4.3 or later node. Meridian MAX-IPE/IPEE Release 6, or later, can also be connected to NAC Release 2.5.
- ACD MAX Release 1 through Release 4 and Meridian MAX Release 3 are not supported with NAC Release 2.5.
- Optional Remote Supervisor Login Links can be configured between NAC Release 2.5 and each MAX node.
- Order NT6D98AA 8 Channel Asynchronous Kit, if additional I/O ports are required for Network links, Remote Login Supervisor Links, Supervisor terminals and printers. Up to 40 I/O ports can be configured.
- Order AS1081A or AS1081D Pedestal and Top Cap Assembly as required.
- Order NT9D18AA Module Side Cover as required.
- The modem provided in this package is for remote diagnostics. Order additional modems for Network links, Remote Supervisor login and dial-up supervisors.

Meridian NAC Release 2.5 Base Hardware Upgrade Package, AC			W1

Notes:

- Must be housed in the NT7D18AA Application Equipment Module (AC).
- There must be at least one supervisor terminal and one printer equipped per system.
- Requires SW7426 NAC Release 2.5 Base Software Package.
- For detailed information on system configuration, please consult the NAC Release 2 Ordering Procedures for New Systems, Expansions, Migrations and Upgrades.
- Includes one VME332XT 8 Channel Asynchronous I/O Board, UDS 2440 Modem, a 10 Ft. modem cable, and a 45 Ft. System Console cable.
- There must be at least one system console equipped per system.
- There must be a Network link from NAC Release 2.5 to each Meridian MAX (AM) Release 4.3 or later node. Meridian MAX-IPE/IPEE Release 6, or later, can also be connected to NAC Release 2.5.
- ACD MAX Release 1 through Release 4 and Meridian MAX Release 3 are not supported with NAC Release 2.5.
- Optional Remote Supervisor Login Links can be configured between NAC Release 2.5 and each MAX node.
- Order NT6D98AA 8 Channel Asynchronous Kit, if additional I/O ports are required for Network links, Remote Login Supervisor Links, Supervisor terminals and printers. Up to 40 I/O ports can be configured.
- Order AS1081A or AS1081D Pedestal and Top Cap Assembly as required.
- Order NT9D18AA Module Side Cover as required.
- The modem provided in this package is for remote diagnostics. Order additional modems for Network links, Remote Supervisor login and dial-up supervisors.

Description	System Compatibility	Product compatibility	W/S
Option 61C from A/M/S/MS/L/LE(23,96)/N/NT/ST/STE/RT/21A/21/21E Upgrade Package AC	21; 21A; 21E; A; L; LE (23, 96); M; MS; N; NT; RT; S; ST; STE		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- If upgrading from an Option 21A, one AS1004 Pedestal/Top Cap Assembly must be ordered.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- One NT8D21AA Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used.
- One SuperLoop Network Card, IPE module, power supply, and cable is included in the above package to provide replacement card slot availability for the existing IPE cards contained in the unused NT8D11 Module.
- For upgrades removing the existing CPU and continuing to utilize the CPE/PE cabinet, refer to product bulletin 91014.
- Option 61C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.

Description	System Compatibility	Product compatibility	W/S
Option 61C from A/M/S/MS/L/LE(23,96)/N/NT/ST/STE/RT/21A/21/21E Upgrade Package DC	21; 21A; 21E; A; L; LE (23, 96); M; MS; N; NT; RT; S; ST; STE		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- If upgrading from an Option 21A, one AS1004 Pedestal/Top Cap Assembly must be ordered.
- One NT6D42CC Ringing Generator DC must be added for each IPE module in which analog type peripheral cards are to be used.
- To extend alarm and trip leads from the system monitor to the external power equipment, the appropriate system monitor cable (NT8D46) must be determined and ordered separately.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- One SuperLoop Network Card, IPE module, power supply, and cable is included in the above package to provide replacement card slot availability for the existing IPE cards contained in the unused NT8D11 Module.
- For upgrades removing the existing CPU and continuing to utilize the CPE/PE cabinet, refer to product bulletin 91014.
- Option 61C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.

Option 61C from Option 51 Upgrade Package AC	51		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- If upgrading from an Option 21A, one AS1004 Pedestal/Top Cap Assembly must be ordered.
- This package assumes that the QPC477B10 vintage is installed in the existing Option 51. The B10 vintage is the minimum vintage required for Option 61C.
- This package assumes that the QPC441F vintage is installed in the existing Option 51. The F vintage is the minimum vintage required for Option 61C.
- Option 61C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- One NT8D21AA Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used.

Description	System Compatibility	Product compatibility	W/S
Option 51C from Option 21/21E Cardcage Upgrade Package AC	21; 21E		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package assumes the existing system does not contain more than 3 modules in order to allow for the addition of one IPE module as part of the upgrade. The additional IPE module is required due to the loss of the IPE slots originally provided in the Option 21 or 21E card cage being replaced. If the existing system is already 4 modules high, additional equipment such as pedestal, top cap, blower, etc., must be engineered and ordered to support the new IPE module.
- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- Option 51C requires one Call Processor. The Call Processor is not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes. See Call Processor notes to determine which Call Processors meet the Option 51C minimum memory requirements for the current software release.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- One SuperLoop Network Card, IPE module, power supply, and cable is included in the above package to provide replacement card slot availability for the existing IPE cards contained in the unused NT8D11 Module.

Description	System Compatibility	Product compatibility	W/S
Option 51C from Option 21/21E Cardcage Upgrade Package DC	21; 21E		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package assumes the existing system does not contain more than 3 modules in order to allow for the addition of one IPE module as part of the upgrade. The additional IPE module is required due to the loss of the IPE slots originally provided in the Option 21 or 21E card cage being replaced. If the existing system is already 4 modules high, additional equipment such as pedestal, top cap, blower, etc., must be engineered and ordered to support the new IPE module.
- One NT6D42CD Ringing Generator DC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- Option 51C requires one Call Processor. The Call Processor is not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes. See Call Processor notes to determine which Call Processors meet the Option 51C minimum memory requirements for the current software release.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- One SuperLoop Network Card, IPE module, power supply, and cable is included in the above package to provide replacement card slot availability for the existing IPE cards contained in the unused NT8D11 Module.

Option 61C from Option 51C Upgrade Package AC	51C		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- Option 61C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.
- Memory upgrade kit NTZC75 supports DRAM memory upgrades of commercial call processors. Consult the latest Product Bulletin on Memory Upgrade Requirements.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- Option 61C systems utilizing 68040 call processor requires X11 Release 22 Software Generic 2311.
- Two IODU/C (NT5D61) cards are required. One is included in the package. The second may be provisioned from existing equipment or must be ordered separately.

Description	System Compatibility	Product compatibility	W/S
Option 81C from L/LE(23,96)/N/VL/VLE/XL(24,97)/NT/XN/XT/71 Core and Network Upgrade Package AC	71; L; LE (23, 96); N; NT; VL; VLE; XL; XN; XT		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- For upgrades from an Option 71, this package is compatible only with systems that have been previously upgraded to Option 71, where the common equipment is still cabinet-based. Package U9652 should be used for upgrades from module-based Option 71 systems.
- This package contains two network groups. Network Modules for additional groups, if required, should be ordered using package AS1039A.
- Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or completely in modules. Mixed network configurations are not supported (i.e. network groups in both cabinets and modules).
- This package contains four NTND14 CNI to 3PE cables and eight NT8D76 IGS to IGM Cables for the first two network groups. Cables for additional groups must be ordered separately.
- Inter-Cabinet cables for connection of network equipment in modules to peripheral equipment in cabinets or modules must be determined and ordered separately.
- This package includes four (Qty 4) QPC441 cards (3PE). If additional 3PE cards are required, they must be ordered separately. Vintage must be "F" or later.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- The Junctor requires four QPF36 Terminating plugs for each unequipped network group; these must be ordered separately.
- For upgrades removing the existing CPU and continuing to utilize the CPE/PE cabinet, refer to product bulletin 91014.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.

Description	System Compatibility	Product compatibility	W/S
Option 81C from L/LE(23,96)/N/VL/VLE/ XL(24,97)/NT/XN/XT/71 Core and Network Upgrade Package DC	71; L; LE (23, 96); N; NT; VL; VLE; XL (24, 97); XN; XT		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- One NT6D42CD Ringing Generator DC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- For upgrades from an Option 71, this package is compatible only with systems that have been previously upgraded to Option 71, where the common equipment is still cabinet-based. Package U9652 should be used for upgrades from module-based Option 71 systems.
- Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or completely in modules. Mixed network configurations are not supported (i.e. network groups in both cabinets and modules).
- This package contains four NTND14 CNI to 3PE cables and eight NT8D76 IGS to IGM Cables for the first two network groups. Cables for additional groups must be ordered separately.
- Inter-Cabinet cables for connection of network equipment in modules to peripheral equipment in cabinets or modules must be determined and ordered separately.
- This package includes four (Qty 4) QPC441 cards (3PE). If additional 3PE cards are required, they must be ordered separately. Vintage must be "F" or later.
- This package contains two network groups. If network modules for additional groups are required, they should be ordered using package AS1039D.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- The Junctor requires four QPF36 Terminating plugs for each unequipped network group; these must be ordered separately.
- For upgrades removing the existing CPU and continuing to utilize the CPE/PE cabinet, refer to product bulletin 91014.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.

Description	System Compatibility	Product compatibility	W/S
Option 81C from XN/XT/71 Core Upgrade Package AC (Dual Column)	71; XN; XT		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- This package is compatible only with XN and XT systems housed in QCA55 and QCA108 cabinets, and with systems that have been upgraded to Option 71 where the common equipment resides in QCA55 and QCA108 cabinets. Package U9652 should be used for upgrades from module based Option 71 systems.
- This package does not include an additional network group. Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or housed completely in modules. Mixed network configurations are not supported (i.e., network groups in both cabinets and modules).
- This package contains the equipment required to complete a core upgrade from a dual column XN/XT or Option 71 to an Option 81C. For those customers moving their networks to modules, this package does not include the hardware required to equip the network group in the Core/Network Modules. To equip the network group in the Core/Network Modules, AS1250 Option 81C Core/Network Group Package (Qty 1) must be ordered separately.
- This package contains one NTND33DA Option 81C Core-Cabinet Upgrade Cable Kit, Group 0 for inter-cabinet (i.e. cabinet to module) cabling of the first network group and one NTND33CC Core-Cabinet Upgrade Cable Kit, Groups 1-4 that supports cabling of the second network group and will support a third network group if added. For a four-to-five group system one additional NTND33CC Upgrade Cable Kit, Groups 1-4 must be ordered.
- This package includes (Qty 1) NT5D40AA Hybrids Kit to upgrade the QSD39 Network shelf that will house the QPC471 Clock Controller. If the second QPC471 Clock Controller will also be installed in a QSD39 Network Shelf rather than the typical QSD40 Shelf, then an additional NT5D40AA Hybrids Kit (Qty 1) is required and must be ordered separately.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- This package does not include QPC441 (3PE) cards. If additional 3PE cards are required, they must be ordered separately. Vintage must be "F" or later.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- Inter-Cabinet cables for connection of network equipment in cabinets to peripheral equipment in cabinets or modules must be determined and ordered separately.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Description	System Compatibility	Product compatibility	W/S
Option 81C from XN/XT/71 Core Upgrade Package DC (Dual Column)	71; XN; XT		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- One NT6D42CD Ringing Generator DC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- This package is compatible only with XN and XT systems housed in QCA55 and QCA108 cabinets, and with systems that have been upgraded to Option 71 where the common equipment resides in QCA55 and QCA108 cabinets. Package U9652 should be used for upgrades from module based Option 71 systems.
- This package does not include an additional network group. Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or housed completely in modules. Mixed network configurations are not supported (i.e., network groups in both cabinets and modules).
- This package contains the equipment required to complete a core upgrade from a dual column XN/XT or Option 71 to an Option 81C. For those customers moving their networks to modules, this package does not include the hardware required to equip the network group in the Core/Network Modules. To equip the network group in the Core/Network Modules, AS1250 Option 81C Core/Network Group Package (Qty 1) must be ordered separately.
- This package contains one NTND33DA Option 81C Core-Cabinet Upgrade Cable Kit, Group 0 for inter-cabinet (i.e. cabinet to module) cabling of the first network group and one NTND33CC Core-Cabinet Upgrade Cable Kit, Groups 1-4 that supports cabling of the second network group and will support a third network group if added. For a four-to-five group system one additional NTND33CC Upgrade Cable Kit, Groups 1-4 must be ordered.
- This package includes (Qty 1) NT5D40AA Hybrids Kit to upgrade the QSD39 Network shelf that will house the QPC471 Clock Controller. If the second QPC471 Clock Controller will also be installed in a QSD39 Network Shelf rather than the typical QSD40 Shelf, then an additional NT5D40AA Hybrids Kit (Qty 1) is required and must be ordered separately.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- This package does not include 3PE (QPC441) cards. If 3PE cards are required, they must be ordered separately. Vintage must be "F" of later.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. Call Processor memory requirements and X11 software generic requirements are defined in the Call Processor product notes.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- Inter-Cabinet cables for connection of network equipment in cabinets to peripheral equipment in cabinets or modules must be determined and ordered separately.

Option 81C from Option 71 Card Cage Upgrade Package AC/DC	71		W1

Notes:

- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- This package contains the equipment required to complete a core upgrade from an Option 71 to an Option 81C. This package does not include the hardware required to equip the network group in the Core/Network Modules. To equip the network group in the Core/Network Modules, AS1250 Option 81C Core/Network Group Package (Qty 1) must be ordered separately.
- The Option 81C requires (Qty 2) Clock Controller cards QPC471 that are vintage "H" or later. If these cards are not presently equipped in the system to be upgraded, they must be ordered separately.
- This package does not include 3PE (QPC441) cards. If 3PE cards are required, they must be ordered separately. Vintage must be "F" of later.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. See Call Processor notes to determine which Call Processors meet the Option 81C minimum memory requirements for the current software release.
- This package contains four NTND14 CNI to 3PE cables for the first network group. Cables for additional groups must be ordered separately.
- The contents of the package assume that the NT8D29 or NT6D41 Common Equipment Power Supplies from the existing Option 71 will be reused.

Description	System Compatibility	Product compatibility	W/S
Option 81C from XN/XT/71 Core Upgrade Package AC (Single Column)	71; XN; XT		W1

Notes:

- One NT8D21AB Ringing Generator AC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- This package is compatible only with XN and XT systems housed in QCA55 and QCA108 cabinets, and with systems that have been upgraded to Option 71 where the common equipment resides in QCA55 and QCA108 cabinets. Package U9652 should be used for upgrades from module based Option 71 systems.
- This package does not include an additional network group. Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or housed completely in modules. Mixed network configurations are not supported (i.e., network groups in both cabinets and modules).
- This package contains one NTND33DA Option 81C Core-Cabinet Upgrade Cable Kit, Group 0 for inter-cabinet (i.e. cabinet to module) cabling of the first network group and one NTND33CC Core-Cabinet Upgrade Cable Kit, Groups 1-4 that supports cabling of the second network group and will support a third network group if added. For a four-to-five group system one additional NTND33CC Upgrade Cable Kit, Groups 1-4 must be ordered.
- This package includes (Qty 1) NT5D40AA Hybrids Kit to upgrade the QSD39 Network shelf that will house the QPC471 Clock Controller. If the second QPC471 Clock Controller will also be installed in a QSD39 Network Shelf rather than the typical QSD40 Shelf, then an additional NT5D40AA Hybrids Kit (Qty 1) is required and must be ordered separately.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- This package is a single column version of package U9651A, and may be used when sufficient floor space is not available for two columns. With this package, separate power feeds may be provided to the two (2) Core Modules, but the Blower Unit, Power Distribution, and System Monitor are not redundant.
- This package does not include 3PE (QPC441) cards. If 3PE cards are required, they must be ordered separately. Vintage must be "F" of later.
- This package contains the equipment required to complete a core upgrade from a single column XN/XT or Option 71 to an Option 81C. For those customers moving their networks to modules, this package does not include the hardware required to equip the network group in the Core/Network Modules. To equip the network group in the Core/Network Modules, AS1250 Option 81C Core/Network Group Package (Qty 1) must be ordered separately.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. See Call Processor notes to determine which Call Processors meet the Option 81C minimum memory requirements for the current software release.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- Inter-Cabinet cables for connection of network equipment in cabinets to peripheral equipment in cabinets or modules must be determined and ordered separately.

Description	System Compatibility	Product compatibility	W/S
Option 81C from XN/XT/71 Core Upgrade Package DC (Single Column)	71; XN; XT		W1

Notes:

- One NT6D42CD Ringing Generator DC must be added for each IPE Module in which analog type peripheral cards are to be used. Otherwise, one NT7D05AA Filler Panel-Ringing Generator must be equipped.
- NTRB34AA Core-Network Interface Card 3-Port (CNI-3) has replaced NT6D65 Core-Network Interface Card. Only Option 81/81C systems utilizing Release 25 or later software can enable the 3rd port on the faceplate of the CNI 3-Port card.
- This package contains two NTRB34AA Core-to-Network Interface Cards 3-Port (CNI-3). With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- This package is compatible only with XN and XT systems housed in QCA55 and QCA108 cabinets, and with systems that have been upgraded to Option 71 where the common equipment resides in QCA55 and QCA108 cabinets. Package U9652 should be used for upgrades from module based Option 71 systems.
- This package does not include an additional network group. Network groups (whether existing with the current system or added at a later time) must be housed completely in cabinets or housed completely in modules. Mixed network configurations are not supported (i.e., network groups in both cabinets and modules).
- This package contains one NTND33DA Option 81C Core-Cabinet Upgrade Cable Kit, Group 0 for inter-cabinet (i.e. cabinet to module) cabling of the first network group and one NTND33CC Core-Cabinet Upgrade Cable Kit, Groups 1-4 that supports cabling of the second network group and will support a third network group if added. For a four-to-five group system one additional NTND33CC Upgrade Cable Kit, Groups 1-4 must be ordered.
- This package includes (Qty 1) NT5D40AA Hybrids Kit to upgrade the QSD39 Network shelf that will house the QPC471 Clock Controller. If the second QPC471 Clock Controller will also be installed in a QSD39 Network Shelf rather than the typical QSD40 Shelf, then an additional NT5D40AA Hybrids Kit (Qty 1) is required and must be ordered separately.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- This package is a single column version of package U9651D, and may be used when sufficient floor space is not available for two columns. With this package, separate power feeds may be provided to the two (2) Core Modules, but the Blower Unit, Power Distribution, and System Monitor are not redundant.
- This package does not include 3PE (QPC441) cards. If 3PE cards are required, they must be ordered separately. Vintage must be "F" of later.
- This package contains the equipment required to complete a core upgrade from a single column XN/XT or Option 71 to an Option 81C. For those customers moving their networks to modules, this package does not include the hardware required to equip the network group in the Core/Network Modules. To equip the network group in the Core/Network Modules, AS1250 Option 81C Core/Network Group Package (Qty 1) must be ordered separately.
- Option 81C requires two identical Call Processors with the same memory configuration. The Call Processors are not included in the above package and must be ordered separately. See Call Processor notes to determine which Call Processors meet the Option 81C minimum memory requirements for the current software release.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes sixteen NT8D81AA Tip and Ring Cables within the IPE Module.
- Inter-Cabinet cables for connection of network equipment in cabinets to peripheral equipment in cabinets or modules must be determined and ordered separately.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Description	System Compatibility	Product compatibility	W/S
Option 81C from Option 61C Upgrade (Package #1) AC	61C		W1

Notes:

- This package contains sixteen NT8D18AA Tip and Ring cables within the IPE modules.
- This package is for Option 61C systems that are currently equipped with 2 Core/Network Modules (NT5D21) and 2 of IODU/C (NT5D61). This package assumes these will be reused. If the Option 61C is equipped with 2 Core/Network Modules (NT5D21) and either 2 IOP/CMDU or, 2 IOP (NT6D63) and 2 CMDU (NT6D64), U9655A should be ordered. If the Option 61C is equipped with 2 Core/Network Modules (NT9D19), then U9656A should be ordered.
- Additional NT9D18AA Module Side Covers and NT8D49AA Column Spacer Kits to cover all exposed sides of modules and to connect modules side-to-side must be determined and ordered separately.
- This package includes two 3PE (QPC441) cards. If additional 3PE cards are required, they must be ordered separately. Vintage must be "F" or later.
- Upgrades to Option 81C require relocation of Clock Controller cards (QPC471) from the core to a network group. Any network shelf or network module can be used to house the Clock Controllers provided that one clock is located in side zero and one clock is located in side 1. Relocation of clock controllers may impact clock cabling. If existing cabling cannot support the relocated clocks, new clock controller cables (NT8D74 Clock Controller to Junctor and NT8D79 PRI/DTI to Clock Controller) must be ordered separately.
- The Option 81C requires (Qty 2) Clock Controller cards QPC471 that are vintage "H" or later. If these cards are not presently equipped in the system to be upgraded, they must be ordered separately.
- This package assumes that the existing CNI (NT6D65AA) cards will be reused (one for each Core/Network Module) to support the first two network groups. With Release 25 or later software, the CNI-3 cards can support up to three network groups per card. Two additional NTRB34AA cards are required to support network groups three, four and five. The maximum number of network groups supported on Option 81C systems with IGS switching (QPC412 or NT5D30 cards) in the system is five.
- This package assumes that existing NT5D21 Core/Network Modules remain stacked in the same column, Customers wishing to reconfigure their NT5D21 Core/Network Modules (i.e., placing Core/Network Modules side-by-side) to take advantage of separate column redundancy must order the following items: NT1R90BA Field Upgrade Parts Kit Qty 1, NT1R89AA IPE Cardcage Expansion Kit Qty 1, NT8D99AD CPU to Network Cable 6 Ft. Qty 2 and NT8D46AS System Monitor Inter-CPU Cable 30 in. Qty 1. These items are used to perform a cardcage exchange between the new IPE m

General Policy

About this product catalog

The Nortel Networks U.S. Enterprise Solutions Product Catalog is provided to authorized distributors of Nortel Networks products as the prime source of pricing and ordering policy information. The intention of this catalog is to provide the information required for distributors to successfully execute orders.

Catalog distribution policy

Nortel Networks provides distributors with a reasonable number of product catalogs. Each product catalog is proprietary and provided to distributors as a loan. Upon termination of agreements between Nortel Networks and distributors, distributors are to promptly return all product catalogs to the following address:

Nortel Networks
Commercial Offer Management
P.O. Box 833858, MS: 38D / 02 / D11
Richardson, TX 75083-3858

Products supported by this catalog

This product catalog supports the following products:

- Meridian 1 Options 11 - 81C
- Meridian 1 Options 11/11E/11C
- Meridian SL-1

Definition of business day

All references to “days” within this product catalog are in terms of business days and exclude weekends and holidays.

Holidays

Nortel Networks official holidays in the U.S. market are as follows:

2000 Nortel Networks holiday schedule

Date	Holiday
January 3	New Year’s Day
May 29	Memorial Day
July 4	Independence Day
September 4	Labor Day
November 23, 24	Thanksgiving Break
December 25 - 29	Winter Break

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Time zone abbreviations

The following time zone abbreviations are used throughout this catalog:

- CST= Central Standard Time
- EST= Eastern Standard Time
- PST= Pacific Standard Time

Pricing information

Pricing policies

Nortel Networks issues price updates through this Product Catalog. Price updates are effective on orders received on or after the effective date of the Product Catalog. Any prices obtained from the automated pricing tools or included in POs, bulletins, or presentations do not govern or subordinate the prices contained in this catalog. If there is a conflict, the prices in this catalog are used. The product prices listed are Commercial List Prices (CLP).

The pricing sections in this catalog include:

- Product pricing
- Repair pricing
- Support and service fees
- Licensing and transaction fees
- Standard price items

Distributor discounts

Each Nortel Networks authorized distributor of Enterprise Solutions products is granted a Distributor discount. Distributor discounts are identified by a letter designation as shown below:

- I = 50%
- D = 30%
- H = 0%

Distributor discounts are applied to each product's CLP. The resulting price from application of the Distributor discount is the Gross Distributor Price (GDP). Other discounts may be applied to GDP to arrive at Net Distributor Price (NDP).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Gross Distributor Price/Net Distributor Price calculation

How GDP and NDP are calculated

Commercial List Price (CLP)
less
Distributor Discount
equals
Gross Distributor Price (GDP)
less
Other Discounts (% or $) (e.g., volume purchase plan discount, marketing program discount) [discounts are additive]
Other Discounts (% or $) (e.g., system discount, marketing program discount) [discounts are additive]
equals
Net Distributor Price (NDP)

Non-discountable items

The following items can not be discounted.

- Service fees
- Licensing fee
- Transaction fees
- Standard price items
- Documentation
- Freight charges

Standard price item definition

A standard price item is any merchandise or service, other than hardware or software offered to distributors, under the Distributorship Agreement (e.g., Meridian Configurator, training, collaterals, technical support, and Customer Technical Services [CTCTSS]).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Software licenses and right to use fees

The original manufacturer, either Nortel Networks or the third-party manufacturer, offers the end user a license granting the right to use (RTU) certain software.

The Nortel Networks Customer Premises Equipment (CPE) Distributorship Agreement provides that Nortel Networks software is licensed by distributors as Nortel Networks' agent in exchange for a RTU fee. Third-party software is licensed directly to end users in exchange for a RTU fee. The RTU fee entitles and obligates an end user to the Meridian Software License provisions. Distributors have the right to charge end users for such license.

A completed hardware/software registration form for a Meridian 1 system installation is no longer required. Registration of the Meridian 1 system occurs automatically at the time of order acceptance. The PO and Meridian Configurator provides the required system end-user information (name, address, contact name, and phone number).

Any change of system ownership still requires the filing of a Software License Software Transfer Agreement form by the end user.

Old software media must be returned within 45 days of replacement media shipment or applicable software RTU fees are invoiced.

When a system is upgraded and/or the software is updated, and the existing software media is returned to Nortel Networks or third-party manufacturer, the one fee/one system relationship is maintained and the value of all RTU fees on the former system are transferred at existing price levels to the new system.

Meridian Software License Transfer Agreement

End users wishing to transfer Meridian software to another end user must first transfer their license by signing the following "Meridian Software License Transfer Agreement."

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SOFTWARE LICENSE TRANSFER AGREEMENT

NORTEL NETWORKS INC. (“Nortel Networks”) TELECOMMUNICATIONS PRODUCTS

(“TRANSFEREE”)

This Agreement is being executed because TRANSFEREE has purchased one or more voice/data telecommunications system(s) from a previously licensed end-user and requires ancillary rights to use certain Software, proprietary to Nortel Networks or its suppliers, in conjunction with that system or those systems. This Agreement transfers the Software rights of use from the previous end-user to TRANSFEREE and explains the conditions of such transfer.

Nortel Networks has granted a personal, non-exclusive license (1) to use certain Licensed Software, proprietary to Nortel Networks or its suppliers, contained as an integral part of the Hardware; and (2) to install and use each item of Licensed Software not an integral part of the Hardware; and (3) to use the associated documentation. No title, ownership rights, copy rights, patent rights trade secret rights, or other intellectual property right in or to the Licensed Software in whole or in part, have been granted. Such rights shall remain with Nortel Networks or its suppliers. Restrictions such as measured usage of applications based upon number of lines, number of ports, number of terminal numbers assigned, number of users, or other similar measures may limit the right to use Licensed Software. Expansion beyond the specified usage level may require payment of an incremental charge or another license fee.

Nortel Networks considers the Licensed Software to contain “trade secrets” of Nortel Networks and/or its suppliers. Such “trade secrets” include, without limitation thereto, the specific design, structure and logic of individual Licensed Software programs, their interactions with other portions of Licensed Software, both internal and external, and the programming techniques employed therein. In order to maintain the “trade secret” status of the information contained within the Licensed Software, the Licensed Software has been delivered in object code form only.

Nortel Networks or any of its suppliers holding any intellectual property rights in the Licensed Software, and/or any third party owning any intellectual property rights in software from which the Licensed Software was derived, are intended third party beneficiaries of the License. All grants of rights to use intellectual property intended to be accomplished by this transfer of rights are explicitly stated and no additional grants of such rights shall be inferred or created by implication.

TRANSFEREE warrants to Nortel Networks that TRANSFEREE is not purchasing the rights granted by this License transfer in anticipation of reselling such rights.

TRANSFEREE shall:

- Hold the Licensed Software in confidence for the benefit of Nortel Networks and/or its suppliers using no less a degree of care than it uses to protect its own most confidential and valuable information; and
- Keep a current record of the location of each copy of Licensed Software made by it; and
- Use each copy of the Licensed Software only on a single CPU at a time (for this purpose, single CPU shall include systems with redundant processing units); and
- Affix to each copy of Licensed Software made by it, in the same form and location, a reproduction of the copyright notices, trademarks, and all other proprietary legends and/or logos of Nortel Networks and/or its suppliers, appearing on the original copy of such Licensed Software delivered to TRANSFEREE; and retain the same without alteration on all original copies; and
- Issue instructions to each of its authorized employees, agents, and/or representatives to whom software is disclosed, advising them of the confidential nature of such software and to provide them with a summary of the requirements of this license, and
- Return the Licensed Software and all copies through an Authorized Distributor to Nortel Networks at such time as the TRANSFEREE chooses to permanently cease using it.

TRANSFEREE shall not:

- Use the Licensed Software (i) for any purpose other than TRANSFEREE's own internal business purposes and (ii) other than as provided by the transferred License; or
- Allow anyone other than TRANSFEREE's employees, agents and/or representatives with a “need to know” to have physical access to the Licensed Software; or
- Make any copies of the Licensed Software except such limited number of object code copies in machine readable form only, as may be reasonably necessary for execution or archival purposes only; or
- Make any modifications, enhancements, adaptations, or translations to or of the Licensed Software, except for those resulting from those TRANSFEREE interactions with the Licensed Software associated with normal use and explained in the associated documentation; or
- Attempt to reverse engineer, disassemble, reverse translate, decompile, or in any other manner decode the Licensed Software, in order to derive the source code form or for any other reason; or
- Make full or partial copies of any documentation or other similar printed or machine-readable matter provided with Licensed Software unless the same has been supplied in a form by Nortel Networks intended for periodic reproduction of partial copies; or
- Export or re-export the Licensed Software and/or associated documentation from the fifty states of the United States and the District of Columbia.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

TRANSFEREE may assign collectively its rights under this License to any subsequent owner of the Hardware, but not otherwise, subject to the payment of the then current license fee for new users, if any. No such assignment shall be valid until TRANSFEREE (1) has delegated all of its obligations under this License to the intended assignee; and (2) has obtained from such assignee an unconditional written assumption of all such obligations; and (3) has provided Nortel Networks a copy of such assignment, delegation and assumption; and (4) has transferred physical possession of all Licensed Software and all associated documentation to the assignee and destroyed all archival copies. Except as provided, neither the transferred License nor any rights acquired by TRANSFEREE through the License are assignable. Any attempted assignment of rights and/or transfer of Licensed Software not specifically allowed shall be void and conclusively presumed a material breach of the License.

If Nortel Networks (i) claims a material breach of the License, and (ii) provides written notice of such claimed material breach to TRANSFEREE and (iii) observes that such claimed material breach remains uncorrected and/or unmitigated more than thirty (30) days following TRANSFEREE's receipt of written notice specifying in reasonable detail the nature of the claimed material breach, then TRANSFEREE acknowledges that the License may be immediately terminated by Nortel Networks and TRANSFEREE further acknowledges that any such termination shall be without prejudice to any other rights and remedies that Nortel Networks may have at law or in equity.

THE LICENSE DOES NOT CONFER OR GRANT ANY WARRANTY TO CUSTOMER FROM OR BY NORTEL NETWORKS THE LICENSED SOFTWARE IS PROVIDED BY NORTEL NETWORKS "AS IS" AND WITHOUT WARRANTY OF ANY KIND OR NATURE, WRITTEN OR ORAL, EXPRESS OR IMPLIED, INCLUDING (WITHOUT LIMITATION) THE IMPLIED WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE. THIS LIMITATION OF WARRANTIES WAS A MATERIAL FACTOR IN THE ESTABLISHMENT OF THE LICENSE FEE CHARGED FOR EACH SPECIFIC ITEM OF SOFTWARE LICENSED.

IN NO EVENT WILL NORTEL NETWORKS AND/OR NORTEL NETWORK'S SUPPLIERS BE LIABLE TO OR THROUGH CUSTOMER FOR INCIDENTAL, SPECIAL, CONSEQUENTIAL, PUNITIVE, OR EXEMPLARY DAMAGES OF ANY KIND, INCLUDING LOST PROFITS, LOSS OF BUSINESS, OR OTHER ECONOMIC DAMAGE, AND FURTHER INCLUDING INJURY TO PROPERTY, AS A RESULT OF BREACH OF ANY WARRANTY OR ANY OTHER TERMS OF THIS LICENSE, REGARDLESS OF WHETHER NORTEL NETWORKS AND/OR NORTEL NETWORK'S SUPPLIERS WERE ADVISED, HAD OTHER REASON TO KNOW, OR IN FACT KNEW OF THE POSSIBILITY THEREOF. CUSTOMER ACKNOWLEDGES THAT THE FOREGOING SENTENCE REFLECTS AN INFORMED, VOLUNTARY ALLOCATION BETWEEN THE PARTIES OF THE RISKS (KNOWN AND UNKNOWN) THAT MAY EXIST IN CONNECTION WITH THE LICENSE, THAT SUCH VOLUNTARY RISK ALLOCATION WAS A MATERIAL PART OF THE BARGAIN BETWEEN THE PARTIES, AND THAT THE ECONOMIC AND OTHER TERMS OF THE LICENSE WERE NEGOTIATED AND AGREED TO BY THE PARTIES IN RELIANCE ON SUCH VOLUNTARY RISK ALLOCATION.

PLEASE COMPLETE THE REVERSE SIDE

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Warranties

Hardware warranty period

Hardware under normal use and service is free from defects and faulty workmanship for a period as follows.

Meridian 1 and third-party manufacturer hardware warranty

Code	Warranty period
W0	No Warranty
W1	Whichever period expires first: a. 15 months from date of shipment to distributors b. 12 months from date placed in service with end user
W2	90 days from date of shipment
W3	Warranty provided by third-party manufacturer

Software warranty period

Meridian 1 and third-party manufacturer software warranty

Software Group	Warranty Period
1 & 2	Whichever period expires first: a. 15 months from date of shipment to distributors b. 12 months from date placed in service with end user
3 & 4	Whichever period expires first: a. 150 days from date of shipment to distributors b. 90 days from date placed in service with end user
5	Warranty provided by third-party manufacturer

Damage caused by abuse or natural causes such as flood, lightning, fire, etc., is not covered under Enterprise Solutions product warranty and is non-repairable.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Ordering Process, Policies, and Procedures

Order placement

Order placement methods

Nortel Networks accepts orders placed by any of the following methods:

- Mail
- Facsimile
- Electronic Data Interchange (EDI)

Purchase orders (POs) are processed by assigned Nortel Networks Customer Response Center Representatives or Repair Service Representatives.

Order transaction types

Nortel Networks processes different transaction order types. Each order type requires distributors to contact the appropriate Nortel Networks facility to successfully process an order.

Appropriate order types and contacts are listed in the following tables.

Custom orders	Stock orders	Service orders
Meridian 1 systems (Options 11-81) System upgrades Software updates Meridian 1 application products	Merchandise components Sales collateral	Repair orders Remanufactured equipment Training Technical Support Field Audits Meridian Configurator

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Legend: R = Required A = If applicable O = Optional				

Order restrictions

All custom orders have order restrictions (e.g., special information, purchase requirements). Refer to specific pricing sections and/or reference notes for applicable purchase requirements. Refer to specific ordering procedures in this document for special information requirements.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Order forms

Depending on the order transaction type, Nortel Networks may also require additional Nortel Networks forms from distributors. Contact your Customer Response Center Representative to ensure all forms are completed prior to ordering.

Order acknowledgment

Nortel Networks may acknowledge order acceptance via verbal communication, written notification and/or electronically. Order acknowledgment includes ship date, content, and official pricing.

Minimum POs

Distributor POs for all new hardware/software must be for a minimum amount of $100.00 at NDP. On any regular sales order of less than $100.00, a $75.00 handling fee will apply (SERV0024). The SERV0024 code must appear on distributor's Purchase Order. This policy does not apply to emergency orders placed after normal business hours or to Sales Collateral orders.

Order changes

Product order change requests

Order change requests are accepted without penalty to distributors if received at least ten days prior to the original scheduled ship date. Change requests must be made to the appropriate Customer Response Center Representative by submitting a PO change notice.

The following conditions apply to change requests received within ten days of the schedule ship date:

Stock product

Stock product change requests may be applied at the discretion of Nortel Networks. A $200.00 handling charge applies to change requests received between two and ten days prior to scheduled ship date. Purchase Order changes are not accepted later than two days prior to the scheduled ship date. The PO change notice must reference the handling charge ordering code (SERV0021).

Custom product

A reconfiguration/re-engineering charge of $1,000.00 (SERV0022) per order plus $1.00 per equipped line and trunk (SERV0023) applies to change requests received within ten days of the scheduled ship date. This policy also applies to software feature changes on new system orders. Change requests resulting in a rescheduled ship date are subject to carrying charges described under "Order rescheduling."

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Change request charges

Codes	Change Request	Price
SERV0021	Stock Product Handling Charge	$200
SERV0022	Custom Product Reconfiguration/Reengineering Charge	$1,000
SERV0023	Custom Product Reconfiguration/Reengineering Per Line Charge	$1.00/Line

Order rescheduling

Distributors may reschedule an order one time (for up to 90 days beyond the original ship date). No penalty is applied to the reschedule provided the request is received a minimum of ten days prior to the original ship date. Reschedule requests received within ten days of the original ship date are subject to carrying charges. Further revisions are treated as cancellations with appropriate cancellation charges applied (refer to Order Cancellation within this section).

Reschedule requests must be submitted to the appropriate Customer Response Center Representative through a PO change notice. Purchase order change notices received within ten days of the original scheduled ship date must include the amount of the appropriate carrying charge.

Carrying charges

Carrying charges apply when distributors delay shipment of an order through a reschedule or reconfiguration received by Nortel Networks within ten days of the original scheduled ship date. Carrying charges are 2% of the NDP and apply to each fiscal month or portion thereof that shipment is delayed.

Order cancellation

A PO change notice is required to cancel an order. The PO change notice must be submitted to the appropriate Customer Response Center Representative.

Cancelled orders are subject to cancellation charges of 15% of the NDP. These charges are applicable on all distributor initiated cancellation requests received after order acceptance by Nortel Networks.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Product delivery

New system orders are shipped to an address within the distributors' territory, as defined in the Nortel Networks CPE Distributorship Agreement, unless previous approval has been obtained. Contact Nortel Networks at the following address to receive pre-approval:

Nortel Networks
Distribution Management
2221 Lakeside Blvd
Richardson, TX 75082
(972) 684-1496

Note: Any exception must be pre-approved.

Standard shipment leadtime

The Nortel Networks standard shipment leadtime is the expected interval between Nortel Networks' official acceptance of an order and the expected date of shipment to distributors, indicated in business days. The following table details the standard shipment leadtime for Enterprise Solutions products.

Enterprise Solutions product	Standard shipment leadtime
Meridian 1 systems	
Option 21E	5 business days
Option 51C/61C/81C	10 business days
Option 11C system/component	5 business days
Option 11C system with application products	10 business days
Meridian 1 software	
Updates	5 business days
System conversions	10 business days
Meridian 1 application products	10 business days
Meridian 1 components	5 business days
Meridian 1 upgrades	10 business days
Repair	10 business days
Enterprise Solutions sales collaterals	5 business days

Partial shipments

Nortel Networks products

If Nortel Networks is unable to completely fill a distributor's order, the order is partially shipped, unless distributors have specified in writing that orders are to be held for complete shipment.

Products manufactured by third parties

Third-party hardware components are shipped to the end user separately from the software and are provided during the installation of the system.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Shipping methods

Nortel Networks ships products FOB (freight on board) factory of origin. Hardware title passes to distributors and acceptance occurs when Nortel Networks surrenders possession to the common carrier, or, if Nortel Networks is acting as carrier, upon departure from its loading dock.

Standard shipping method is “best way” surface freight, unless distributors specify air or other commercially available shipping method; Nortel Networks invoices freight accordingly.

Nortel Networks prepays the common carrier and invoices distributors for all Meridian 1 shipping charges.

Shipment/Order discrepancies

An order discrepancy exists when Nortel Networks shipping documents and/or the equipment received do not agree with distributor’s receiving documents (including references to backorders). Any discrepancies must be filed with the appropriate Customer Response Center Representative within 30 days of distributors receipt of shipment. To resolve order discrepancies, be prepared to provide the PO number or Nortel Networks reference number.

Proof-of-delivery

Proof-of-delivery (POD) is provided upon request. Nortel Networks accepts distributors POD requests up to 90 days from the initial shipping date. No POD requests are considered after the 90-day period.

Product availability limitations

Product availability status

During the product life, it may become necessary for Nortel Networks to limit product availability. The following product statuses indicate limitations on product availability.

Product availability limitations

Product status	Definition
Controlled release	Product available on limited basis only. Distributors must secure controlled release approval from product management prior to order acceptance.
New system sale	Product available with new system sales only
Additions & maintenance	Product available for installed base sales only
Manufacture Discontinued	Product is no longer sold in the US Market. The product is available for repair if it is a repairable item.

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Controlled release products

Nortel Networks reserves the right to release product and/or product improvements under the controlled-release program and to allocate such product to Distributors as best suits the needs of Nortel Networks' product development and testing programs.

Distributors must submit a controlled-release application and a site profile (if applicable) to Santa Clara Customer Response Center. Completed controlled-release applications and applicable site product files should be sent to the following address.

Nortel Networks
Customer Response Center
2305 Mission College Blvd.
Santa Clara, CA 95054-1599

FAX (408) 565-2530

Written acceptance/rejection of controlled-release applications are sent to the originator from Santa Clara Customer Response Center within approximately ten business days of receipt of the application.

Shipment leadtimes for controlled release products

Standard shipment leadtimes do not apply to products on controlled release. The following leadtimes apply instead:

- Standard shipment lead times for controlled-release items are provided on a per quote basis.
- Contact your Customer Response Center Representative for specific ship dates for backorder items.
- Controlled-release items may be differentiated by ship date upon order acknowledgment.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Return Policies and Procedures

Software return policy

When replacement media is received for a Meridian 1 SL-1 or Meridian Applications Product software update, existing floppy disks, tapes, and data cartridges (software media) must be returned to Nortel Networks within 45 days of shipment of the replacement material, referencing the Return Authorization (RA) number provided at the time of order placement. Distributors are charged for any missing software media.

Ship all return software materials to the following address:

Nortel Networks
M1 Credit & DOA Returns
917 Airpark Center Drive
Dock Door J **ONLY**
Nashville, TN 37217
Attn: RA#_____
1-800-321-2649

Equipment return options

Nortel Networks offers various types of product return options:

- Restocking—return of new unused equipment for credit within 60 days of ship date
- Repair—return of damaged or defective equipment for repair
- Advance Replacement—replacement equipment shipped in support of emergency repairs and some updates/upgrades
- Defective on Arrival (DOA) Replacement—replacement equipment shipped in support of DOAs

Restocking policies

Restocking charges

The restocking charge applies when customer orders are placed in error, or in excessive quantities for systems or new merchandise, and a return is requested by distributors. Restocking charges apply when a distributor returns new unused products.

Nortel Networks charges a 15% restocking fee for new unused equipment returned within 60 days of ship date. The 15% restocking fee is applied at NDP. Nortel Networks does not accept restocking returns greater than 60 days from ship date.

Restocking process

Nortel Networks issues an RA number from the appropriate Customer Response Center Representative (see previous table) when a distributor requests that materials be returned for credit. Distributors must mark this number on all packages being returned for credit; without it, Nortel Networks cannot issue credit and packages are returned to sender.

The following information is required for a restocking credit return number:

- Distributor name
- Distributor customer billing number
- Original NTI number
- Original PO number
- List of parts to be returned. Include the following items in the list of parts:
  - — order code
  - — quantity

All products must be returned in the original packaging. If the return claim is for a system and/or packaged components, all components, software cartridges, and power supplies must be returned as originally shipped. If returned equipment is not in protective packaging and/or parts or components are missing, or if equipment designated as new unused is returned and appears to be used equipment, Nortel Networks returns the item to distributors. Improper packaging, resulting in obvious damage to equipment, voids the warranty and the equipment is returned to sender.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Repair policies and procedures

Repair and service responsibilities

Distributor responsibility

Nortel Networks assumes no responsibility for service or installation to the ultimate end user of the Enterprise Solutions products. **To ensure continuous service to the end user, distributors are responsible for maintaining sufficient spare stock to replace units which are in the repair or warranty claim process**.

Repair warranty

Nortel Networks warrants Enterprise Solutions hardware and system software for periods outlined in the Warranty section of this document as follows:

- All Repaired equipment carries a full 12-month warranty from the date repaired.
- Standard repair turn around time is 10 working days from receipt of equipment at our warehouse.
- Standard shipping method is surface freight.
- Repair of defective equipment is on a “like-for-like” basis, unless otherwise stated in the product catalog.
- Repair includes cosmetic reconditioning of all items.
- Damage caused by abuse or natural causes such as flood, lightning, fire, etc., is not covered under Enterprise Solutions product warranty and is non-repairable.

Nortel Networks shall provide, at GDP, functionally equivalent repair hardware and/or software to support distributor’s installed base for the product support period specified by the contract annex or new product bulletin. This support continues from the date the product is manufacture discontinued unless otherwise specified.

Products manufactured by third parties

During these product(s) life, their manufacturer(s) may discontinue the product(s). Nortel Networks makes no guarantee as to the availability of any of these products, whether for new system sales or for installed base sales or whether the product(s) is/are available in the U.S. market. However, these products are available for repair if they are repairable items.

Non-repairable parts

Certain items may be determined by the Repair and Distribution Center to be non-repairable. If a non-repairable item fails within the stated warranty period 15 months from the date of shipment to distributor or 12 months from date placed in-service with an end user, whichever period expires first), the equipment is replaced at no charge by Nortel Networks. **If non-repairable equipment fails after the warranty period has expired, distributors may purchase replacement equipment.**

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Repair pricing

In-warranty

There is no charge for repair of Enterprise Solutions hardware and system software that are covered under the standard warranty period. Distributors are charged for any piece parts that are missing from the hardware, software tapes/ cartridges, assembly parts, etc.

Out-of-warranty

For Enterprise Solutions hardware and system software that are not covered by the standard Enterprise Solutions warranty period, distributors are charged according to the repair prices established in the Enterprise Solutions Product Catalog. Distributors are charged for any piece parts that are missing from the hardware, software tapes/cartridges, assembly parts, etc.

Repair agents

Nortel Networks Repair and Distribution Center, Nashville, TN, acts as the sole authorized factory repair agent for the United States market. All Enterprise Solutions equipment claimed to be defective, whether in-warranty or out-of-warranty, is to be shipped prepaid to the following address.

Nortel Networks
Repair and Distribution Center
640 Massman Drive
Nashville, TN 37210

Repair contacts and schedules

The following table shows appropriate contacts and schedules for service repair information.

Repair services

Service type	Schedule
Repair and Distribution Center	7:00 a.m. to 6:00 p.m. CST, Monday - Friday
Information and equipment repair status	(615) 883-9220 or 1-800-321-2649 choice 5
After hours emergency repair	(615) 883-9220 or 1-800-321-2649 Select voice prompt for emergency “Hot Line”

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Repair procedures

Return for Repair Numbers (RR#'s) are not required. Simply send the repair equipment, including a PO and packing list, to the Repair and Distribution Center as outlined in the following steps. If a tracking number is desired or special handling is needed, begin with step 1 for obtaining a RR#, otherwise begin with step 2.

1. Contact the Repair and Distribution Center in Nashville, TN, to secure a Return for Repair number (RR#). Phone 1-800-321-2649 choice 5.

   When requesting a Return for Repair number, please have the following information available:

   - ordering code
   - quantity
   - item description
   - PO number (original and/or new)
   - address where repaired equipment is to be returned
   - distributor's bill to address.

2. All shipments must include a PO and packing slip from distributors with the following information:

   - Distributor's ship to address
   - Return for Repair # (if necessary)
   - Quantity and ordering code of the items being returned
   - PO number
   - Special instructions, if applicable

3. Ship equipment prepaid to the following address.

   Nortel Networks
   Repair and Distribution Center
   640 Massman Drive
   Nashville, TN 37210

   Note: To ensure proper tracking, the RR# must appear on the outside of all packages.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

4. All equipment being returned to Nortel Networks must have a repair tag attached to it. Obtain repair tags from the Nortel Networks Repair and Distribution Center or distributors may use any repair tag of their choice containing similar information. Distributors must be as specific as possible when reporting the exact nature of the problem with the defective equipment.

Emergency repair

1. If a distributor requests equipment to be repaired on an emergency basis, the Repair and Distribution Center expedites the equipment through the repair shop.
2. Shipment is made within two working days of receipt of defective equipment at the Repair and Distribution Center.

   Note: Limitations exist for large volumes.

3. Nortel Networks charges a $100.00 emergency handling fee (SERV0006) to distributors for each emergency repair. Premium freight is the responsibility of distributors (non-discountable).

After Hours Emergency Advance Replacement Policy

If the distributor requires after hours advance replacement of repair parts, they may contact the repair center after normal business hours. The after hours voice menu will instruct the distributor how to contact after hours support within Nortel Networks.

Advance replacement is available only for “service affecting” out of service equipment. Lead-time for advance replacement is 24 hours. **Damage caused by abuse or natural causes such as flood, lightning, fire, etc., is not covered under Nortel Networks product warranty and is non-repairable.** The Distributor should determine the nature of the failure prior to requesting service. If the advance-replaced defective equipment is not returned within 30 days to the Repair and Distribution Center in Nashville, the distributor will be invoiced for the advance replacement at the current non-return billing price. The non-return billing price is determined by the Nashville Repair and Distribution Center and is subject to change depending on equipment availability.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

When requesting equipment, please provide the following information:

- Address where equipment should be shipped
- Contact name and phone number, (fax number and email if available) and after hours point of contact name and phone number
- Bill to address
- Quantity and ordering code of each item
- Special instructions

  Note: Purchase Order shall be provided within the next two business days. Failure to provide a valid Purchase Order could result in the suspension of after hour's service.

An After Hours Service Fee (SERV0005) of $225.00 will be charged per order with an additional Service Fee (SERV0005) of $25.00 per line item. Premium freight is the responsibility of the distributor and is non-discountable.

Repair advance replacement

Repair advance replacement policies

Repair advance replacement equipment is available only for "service affecting" out-of-service equipment. Lead time for advance replacement equipment is 24 hours.

If any advance replaced equipment is not returned within 30 days to the Repair and Distribution Center in Nashville, the distributor is invoiced for the advance replacement at a non-return billing price. The non-return billing price is determined by the Nashville Repair and Distribution Center and is subject to change depending on equipment availability.

Repair advance replacement procedures

Please use the following outlined procedures when requesting an advance replacement.

1. Contact the Repair and Distribution Center in Nashville, TN at 1-800-321-2649, choice 5, to request an Advance Replacement Number (AR#).
2. When requesting an AR number, please have the following information available:
   - Ordering code
   - Item description
   - Nature of the problem
   - PO number
   - Address where equipment should be shipped
   - Distributor's bill-to address.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

3. Upon arrival of the advance replacement equipment at the requested site, immediately return the defective equipment to the following address:

   Nortel Networks
   Repair and Distribution Center
   640 Massman Drive
   Nashville, TN 37210
   Attn: AR#_____
   1-800-321-2649

   Note: The RA number must appear on the outside of all advance replacement equipment that is being returned, otherwise Nortel Networks returns the shipment and the equipment at the distributor's expense.

4. All equipment returned to Nortel Networks requires a repair tag attached to it. Repair tags are available through the Repair and Distribution Center or distributors may use any repair tag of their choice containing similar information. Distributors must be as specific as possible in reporting the exact nature of the problem with the defective equipment. This explanation assists Nortel Networks in identifying and analyzing the reported problem.
5. All shipments must include a packing slip from distributors with the following information:
   - Distributor's address
   - AR number
   - Quantity being returned
   - Ordering code of items being returned
   - PO number

Defective on arrival (DOA)

DOA policies

DOA equipment is new product identified within 90 days of shipment as inoperable at the time of initial installation. DOAs are those items having obvious material defects detected when the item is unpacked, or electronic failures discovered when (or before) the item is placed in-service. DOAs are repaired or replaced by Nortel Networks

- DOAs reported within 90 days from original ship date are replaced with new products and given priority shipment.
- DOAs reported AFTER 90 days are handled under normal warranty coverage. See "Repair warranty" under the "Return Policies and Procedures" section.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

If any DOA replaced equipment is not returned within 45 days to the Repair and Distribution Center in Nashville, the distributor is invoiced for the replacement equipment at the current NDP of the equipment. Returns received after invoicing has occurred are subject to a minimum 15% restocking charge.

In the event of a DOA, distributors are contact the Santa Clara Customer Response Center. Please identify DOA equipment when requesting replacement.

Meridian 1 DOA procedures

The DOA procedures are listed as follows:

1. Contact Customer Response Center at 1-800-321-2649, choice 3, to report a DOA.
2. Provide the following information:
   - Ordering code
   - Item description
   - Original PO number (or NTI number)
   - Address where equipment is to be shipped
   - Distributor bill to number or address
   - PO number for the DOA replacement shipment
3. Upon arrival of the DOA replacement equipment at the requested site, immediately return the defective equipment to the following address:

Nortel Networks
M1 Credit & DOA Returns
917 Airpark Center Drive
Dock Door J **ONLY**
Nashville, TN 37210
Attn: RA#_____
1-800-321-2649

Note: The DOA RA number must appear on the outside of all DOA replacement equipment that is being returned, otherwise the shipment and the equipment are returned at distributor's expense.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

4. All shipments must include a packing slip from distributors with the following information:
   - Distributor's address
   - DOA RA#
   - Quantity of items being returned
   - Ordering code of items being returned
   - PO number
5. Advance replaced DOA equipment must be returned in the original packaging. If the parts or components are missing or if equipment appears to be used, distributors are invoiced. If the advance replacement is an upgrade/ update, distributors are responsible for proper packaging. Improper packaging resulting in obvious damage to the equipment causes the warranty to be voided. If such damage occurs, equipment is returned to the distributor. Contact a Repair Representative at 1-800-321-2649 if new packaging materials are needed.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Standard Price Items

Warranties and disclaimers of warranties

Nortel Networks warrants the services provided under this section are to be provided in a good and workman-like manner.

The warranties and remedies contained in this section constitute the only warranties with respect to the services provided hereunder. The stated warranties are in lieu of all other warranties, written or oral, statutory, express, or implied, including, without limitation thereto, the warranty of merchantability and the warranty of fitness for a particular purpose. Nortel Networks is not be liable to the user or purchaser of such service (whether distributor or end user, as the case may be) for any special, incidental, or consequential damages, of any nature or for any reason, arising out of the performance of the services described hereunder, even if Nortel Networks has been advised of the possibility of such damages.

Technical support

Technical support for authorized distributors is available through the following groups (see Technical Support section for detailed policies, procedures, and fees):

- Customer Technical Services (CTS)
- Enterprise Solutions Field Service (Enterprise Solutions FS) installation and maintenance support
- Customer Quality Engineering Support

Meridian 1 Customer Owned and Maintained System (COAMS)

Objective

Ensure the system integrity of Customer Owned and Maintained Meridian 1 systems through management of a Maintenance Qualification Program for all customer-service technicians.

Note: For a detailed flow of the COAM Program Process, see Appendix A in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document.

Definitions

The following terms are commonly used COAMS terminology.

Customer in Good Standing

A customer meeting the COAMS responsibilities and their financial responsibilities to Nortel Networks.

Customer Owned and Maintained Systems (COAMS)

Meridian 1/SL-1 and associated Nortel Networks hardware and software options and features, owned and maintained by the customer.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Customer Service Report (CSR)
The documenting and tracking of technical problems reported to CTS.

Customer Technical Services (CTS)
Nortel Networks technical support provided to customers for emergencies, cutovers, software updates, and product verification.

Maintenance Qualification Program
Recognized Nortel Networks training courses that must be completed by bonafide employees of the customer, prior to being qualified to maintain a COAMS status. Individual employees must complete required minimum courses. Site specific option training must be completed if utilizing any of the optional features.

Nortel Networks
The Nortel Networks logo and abbreviated name.

Nortel Networks Practices (NTPs)
The NTP documentation system provides operating and maintenance information to Nortel Networks systems users, information for internal functions, and a record of part and current system designs. Included is documentation covering hardware, software, and firmer products, and the methods of assembling, installing, interconnecting, and operating the Nortel Networks products.

Quality Audits
Quality Audits can be performed by Nortel Networks or a certified authorized distributor. A COAMS applicant may need to provide with the COAMS Registration Form, a copy of a Quality Audit Report (if not installed by an Authorized Meridian 1 Distributor) and all outstanding issues must be confirmed or resolved.

Quality Audited Systems
Meridian 1 systems installed by bonafide employees, who have completed the requisite installation training required by the quality certified authorized distribution channel or a Meridian 1 system that has passed a quality audit from a certified quality auditor.

Quality Certified Authorized Distribution Channel
Any Authorized Distributor that has satisfied the requirements to perform Quality Audits and is certified by Nortel Networks.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

COAMS responsibilities

Nortel Networks' COAMS program establishes a business transactional relationship with Nortel Networks' CTS function as it relates to service recovery during the maintenance cycle. The self-maintained end users who elected to participate in the COAMS program are responsible for the following items.

- Maintain a customer in good standing status.
- Maintain the required levels of training to remain qualified for the maintenance qualification program. Training to current level as system evolution dictates and training must be completed prior to the commencement of upgrading.

  Note: See Appendix 2 in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for a complete list of available training courses.

- Establish a service relationship with an Authorized Distributor for products the self-maintained customer, participating in the COAMS program, has elected not to self-support. (Customer elects not to be trained on one product, i.e., Meridian Mail.)
- Provide a modem (2400 baud minimum, 9600 baud minimum for Option 81) to all remote access.
- Maintain product documentation at the current level and releases, as defined by systems profiled.
- Maintain the spare parts essential to maintaining the COAMS specific equipment operational. (See NTP 553-3001-153, Spares Planning section in the *System Planning and Engineering Guide*.)
- Capability of maintaining and servicing the product for the full feature functionality/options, based on Nortel Networks training level.
- Reapply for COAMS participation annually. This may require a certification renewal fee and quality audit, if proper records have not be maintained. (See Attachment 3 in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for Renewal Application form).
- Keep the software release level of the system at or above the sustained level published by Nortel Networks. (See Appendix 8 in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for Hardware and Software Status.)
- Provide critical information about individual sites.

  Example: Site is the hub of a ten-switch network.

  Example: Hospital/24-hour business

- Provide the COAMS company's escalation procedures.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

COAMS policy

The COAMS end user must comply with the procedures provided in this policy to obtain CTS and training support.

Note: Technical support is limited to only the product supported by Meridian 1 CTS.

1. The system(s) must be purchased through, installed, and maintained throughout the warranty period, except for the quality audited systems (see item 4 within this section) by an authorized Meridian Distribution channel.
2. The maintenance must be provided by bonafide employees of the customer, (not including consultants; agents, unless otherwise contractually agreed to by Nortel Networks; subcontractors or any other kind of independent contractor) who have fulfilled all requirements of the Maintenance Qualification Program.

   Note: See Appendix 3, Warranty Information, in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for more warranty information.

3. Used systems must be installed and/or maintained for one year, with the exception of quality audited systems (see item 4 within this section), by an authorized Meridian distribution channel, and must be upgraded to the minimum supported release.
4. Quality audited systems need not be installed and/or maintained by an authorized Meridian distribution channel, however the distribution channel must be currently certified by Nortel Networks to perform quality audits, must support all installation efforts, and must perform a quality audit upon the completion of the installation. A copy of the Quality Audit Report certifying full compliance within Nortel Networks guidelines must be filed by the customer, along with a COAMS registration form, prior to support being rendered by Nortel Networks CTS.

   Note: Quality audit reports must have performed within three months of the COAMS registration request.

5. Only registered employees of COAMS end user, who meet the maintenance qualification program requirements, may maintain COAMS status and obtain support from Nortel Networks CTS and Nortel Networks training departments.

   Note: Registered employees are those identified on the COAMS registration form.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

6. Each COAMS, i.e., PBX, must be registered with Nortel Networks, via individual COAMS registration form (see Attachment 1, COAMS Registration Form in the *MCS Service Customer Owned and Maintained Systems [COAMS] Program* document), which must be signed by an authorized signatory of the COAMS end user and updated whenever the system is upgraded or any other changes to the information required on the form occur. Certification renewal is required annually for each installation site registered as COAMS (see Attachment 3, COAMS Renewal Application Form in the *MCS Service Customer Owned and Maintained Systems [COAMS] Program* document).
7. Provide critical site information.

   Example: Site is hub of a ten-switch network

   Example: Hospital/24-hour business
8. All Meridian 1 software must be obtained through authorized Meridian distribution channels; the relationship with which, is the responsibility of the COAMS end user.

   SL-100 hardware and software repair and return may be obtained directly from Nortel Networks.
9. The current Maintenance Qualification Program Courses and associated courses for options and features contained within the COAMS will be administered by Nortel Networks or its affiliates only.

   Note: See Appendix 2, Training Courses Available, in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for a complete list of training courses offered.
10. All CTS support, including warranty period support, if applicable, is billable, to the customer, at the then current rates and is subject to change without notice. See Appendix 4, Technical Support COAMS, in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document. A valid PO must be provided to CTS, by fax, at the time the service request is placed.

    Note: Additional information must be provided as indicated in the Nortel Networks' Meridian 1 CTS Service Request Guide.
11. Nortel Networks reserves the right to modify or terminate this policy at any time upon written notice to customer.
12. COAMS participants must maintain the required spares, as outlined in the NTP documentation for their specific system type.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

COAMS training

The following training courses are required to be taken, as a minimum, by the system support technicians of any customer who applies for the COAMS program status. Only technicians identified on the COAMS Registration Form, who have taken the appropriate courses for the systems and applications designated on the form is eligible for CTS support.

As additional features and courses become available from time to time, it is the responsibility of the COAMS end user to ensure current training is maintained. Course numbers and titles change periodically.

> ***Note:*** See Appendix 2, Training Courses Available, in the *MCS Service Customer Owned and Maintained Systems (COAMS) Program* document for a complete list of training courses offered.

Minimum course requirement for COAMS participation

The following table provides a listing of the minimum courses required for COAMS participation.

Meridian 1 Options 11-81 switch maintenance

Course number	Course name	Length of course
200	Meridian 1 Familiarization	3 days
263	Meridian 1 Options 21-81	10 days
300	X11 Feature Administration OR Data Base for Technicians	7 days 5 days
320	BARS Feature Administration	8 days
Note: The BARS option may not be used in limited cases. Training requirements for this option are reviewed on an individual basis.		

Training courses available (Meridian 1)

Meridian 1 Options (if equipped)

Course number	Course name	Course length
260	Meridian Data Service Installation, Operation, and Maintenance	5 days
261	Meridian 1 Digital Interface Products	3 days
262	ISDN PRA Installation & Maintenance	3 days
265	ISDN BRI Installation & Maintenance	3 days
266	Meridian Link Installation, Operation, and Maintenance	3 days
321	Network Automatic Route Selection Feature Administration	10 days
340	ACD A-C2 Feature Administration	5 days
343	Meridian MAX Feature Administration	5 days

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Meridian 1 Options (if equipped) (Continued)

Course number	Course name	Course length
346	Meridian MAX Installation, Operations and Maintenance	3 days
348	CCR Installation, Operation and Maintenance	3 days
353	CCR Scripting	3 days
361	Meridian Mail Feature Administration	7 days
362	Meridian Mail Installation, Operations and Maintenance	10 days
364	Meridian IVR System Installation and Maintenance	3 days
371	Meridian Mail Network Services	3 days
383	Meridian Administration Tool (MAT)	3 days
224	Option 11 - Installation and Maintenance	5 days
240	Meridian 1 Options 21-81 Maintenance	5 days
253	Option 61C/81 Maintenance and upgrades	4 days
275	Meridian 1 Systems Engineering	3 days
276	Meridian 1 Applications Engineering	3 days
301	X11 Station Moves, Adds, and Changes	4 days
304	X11 Update Seminar - Release 12 to Current	3 days
341	Meridian 1 ACD A-C2 Feature Overview	3 days
354	NAC Feature Administration	3 days
356	Meridian Link/CCR Installation, Operation and Maintenance	5 days
363	Meridian Interactive Voice Response (IVR) Overview and Administration	5 days
366	Meridian IVR Advanced Application	3 days
367	Meridian Mail Release 9 Update	3 days
390	IDSN PRI Application and Feature Administration	5 days

COAMS technical support fees

COAMS technical support fees depend on Meridian 1 product status. See “Meridian 1 hardware/software status” section to determine hardware/software status.

Telephone support

The following table provides the schedule and fees applicable to telephone support.

Telephone support for Meridian 1 (Options 11-81C)

Schedule	Current/active/sustained	Manufacture discontinued
7 a.m. to 7 p.m. CST Monday thru Friday	$300.00 per hour	$600.00 per hour

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Meridian Administration Tools

The following list of Meridian Administration Tools (MAT) standard price item packages has been developed for use by authorized Meridian 1 distributors. These packages are not to be resold to end-user customers.

NTZK37AA and NTZK37BA are intended for use by Distributor service personnel who perform pre- or post-installation station administration database programming of Meridian 1 systems.

Order code NTZK37AA requires that a “Meridian Software License for MAT Single Location with Multiple Users” be on file with Nortel Networks for each package purchased. This license is intended to grant the right to make copies of MAT software for use by Customer Service Representatives (CSRs) within a single Customer Service Center location. Please see the referenced software license for complete details.

Order code NTZK37BA requires that a “Meridian Software License for MAT Multi-Location with Multiple Users” be on file with Nortel Networks for each package purchased. This license is intended to grant the right to make copies of MAT software for CSRs supporting any Customer Service Center location within the Distributors’ organization within the fifty states and the District of Columbia. Please see the referenced software license for complete details.

Order codes NTZK46AA and NTZK46BA provide an upgrade to MAT Release 3. See the “Reference Notes” section of the Enterprise Solutions product catalog for complete details.

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

The MAT new sales and upgrade packages and associated pricing are described as follows:

MAT matrix of distributor packages

Order Code	Description	Package contents	CLP (Note 1)
NTZK37AA (Note 2,3)	Single Location Station Administration	Distributor Common Services Station Administration Module Common Services User Guide Station Administration Module User Guide	$3,230
NTZK37BA (Note 2,3)	Multiple Location Station Administration	Distributor Common Services Station Administration Module Common Services User Guide Station Administration Module User Guide	$60,000
NTZK46AA (Note 2,4)	Single Location Station Administration Upgrade	Distributor Common Services Upgrade Station Administration Module Upgrade Common Services User Guide Station Administration Module User Guide	$325
NTZK46BA (Note 2,4)	Multiple Location Station Administration Upgrade	Distributor Common Services Upgrade Station Administration Module Upgrade Common Services User Guide Station Administration Module User Guide	$10,000

Note 1: No discounts apply.

Note 2: For distributor use only. Not to be resold to end-user customers. MAT Release 3 is compatible with X11 Release 14, 17, 19, 20, and 21 on Options 21 through 81. For Option 11, MAT Release 3 is compatible with X11 Release 18, 20, and 21.

Note 3: "MAT Software License for Single Location with Multiple Users" must be on file with Nortel Networks.

Note 4: Upgrades MAT Distributor Common Services and Station Administration Module to Release 3.

Meridian 1 Security Services Offerings

The Meridian 1 Security Services consist of the following items.

- Meridian 1 Security Audit
- Meridian 1 Security Consulting Services
- Meridian 1 Security Seminar

Meridian 1 Security Audit

The audit provides an evaluation of current system configuration providing detailed remote analysis of all sets and trunks on a Meridian 1/SL-1 system. Also included is analysis of the following data.

- Customer
- Configuration
- Route
- Basic/Network Automatic Route Selection
- Direct Inward System Access
- New Flexible Code Restriction

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

- Code Restriction
- System Speed Call
- Automatic Call Distribution
- Basic/Network Authorization Code
- Multi-Tenant information stored in the system data blocks

An analysis of Meridian Mail is also performed which consists of the Voice Menus, Thru-Dialers, FAX on demand, Voice Security Options Screens, and Voice Mailboxes.

Audit results consist of a written report detailing findings of current system configuration and possible vulnerabilities. Accompanying the findings are detailed recommendations for increasing security.

The Meridian 1 Security Audit is performed on customer or distributor provided copies of the required database information. As an option Nortel Networks can download this information, at an additional hourly charge, for customers or distributors who do not have the available resources to download the system data. Meridian Mail data cannot be downloaded into a readable format on a capture file and must be accessed and evaluated on-line. A 1200 baud modem (minimum) is required at the customer's site for system access. Hourly rates apply.

Meridian 1 Security Consulting

Nortel Networks Security Consultants can help develop a corporate security policy or review existing policies and test compliance. We can supplement existing corporate security activities by providing a view from the outside. For large companies we can even provide on-site training for telecommunications managers enabling them to audit their own systems. Our security consulting services are available at a daily rate plus travel and expenses.

Meridian 1 Security Seminars

Nortel Networks Security Consultants also provide Security Seminars. Our program consists of a six hour workshop that details what to review in the Meridian 1 and Meridian Mail systems to ensure that both are secure. The charge for the seminar is provided at the current rate of $1,750.00 as well as travel and living expenses.

For these services contact Global Professional Services 918-971-4811 (ESN 450-5468).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Meridian Mail Factory Upgrade Services

The following table provides the available Meridian Mail upgrade services.

Meridian Mail Support Service Packages

Order code	CPC	Description	Unit CLP	Dist. Disc.	Repair CLP
SV000098	A0666818	MM Functionality Service Fee	$1000	H	N/A
SV000099	A0666819	MM 2-24 Upgrade Service Charge	$2,000	H	N/A
SV000100	A0666820	MM 25-48 Upgrade Service Charge	$4,000	H	N/A
SV000101	A0666821	MM 49-64 Upgrade Service Charge	$6,000	H	N/A
SV000102	A0666822	MM 65-96 Upgrade Service Charge	$8,000	H	N/A
Note: Order these service products from Santa Clara.					

Product Catalog

Nortel Networks provides each distributor a reasonable number of product catalogs on CD free of charge. If any distributor experiences any difficulty using the CD, please contact Nortel Networks at 800 321-2649, select 6, then 5.

Along with Nortel Networks' effort to be environmentally responsible, Enterprise Solutions elected to eliminate the paper distribution of the Product Catalog. The Product Catalog is available on CD free-of-charge. The CD format is multi-platform allowing both PC and Macintosh use from one CD. Each CD includes the browser and is password protected.

If you still require a paper copy of the Product Catalog you may order one using the following order codes and the Product Catalog order form provided.

Note 1: Purchase order must be included with your order form.

Note 2: Please send or fax order form to location shown on form as product catalog orders can not be entered via EDI.

Product Catalog order codes

Order Code	Description	Unit price
NT2K33AA	Meridian 1 Product Catalog binder set	$50.00
NT2K34AA	Meridian 1 Product Catalog contents	$150.00

Support/Installation and Maintenance

Nortel Networks provides support to authorized distributors on the Meridian 1 family of products. The types of support offered are as follows:

- CTS technical support
- Customer quality engineering support
- Field service installation and maintenance

Meridian 1 CTS technical support

Meridian 1 Customer Technical Support (CTS) organization provides comprehensive third-level support for Meridian 1 family of products through Nortel Networks' authorized distributor network. CTS works with distributor authorized callers to assist in problem recovery. Third-level support services include the following items:

- Remote assistance in problem recovery
- On-site assistance in problem recovery
- Patch insertion

CTS is available for service affecting and non-service affecting problem recovery during regular business hours; Monday through Friday from 7:00 a.m. to 6:00 p.m. excluding Nortel Networks holidays. CTS is available for emergency problem recovery 24 hours a day, seven days a week. Service affecting and non-service affecting problems can be raised to emergency priority outside of regular business hours and will be billed accordingly. A valid PO must accompany these escalation before problem recovery can commence.

CTS support can be obtained by calling 1-800-766-ETAS (1-800 766-3827) and selecting the appropriate menu choice. The call will route automatically.

Technical support fees

The priority of the problem, software status, and business hours determine technical support billing. Software status is defined as follows:

- Current
- Active
- Sustained
- Retired

The following table identifies CTS system support for Meridian 1 family of products based on product status:

CTS software status support

Status	CTS support
Active or Sustained	CTS will diagnose and resolve software problems.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

CTS software status support

Retired	CTS support is limited to problem diagnosis.

Refer to “Meridian 1 hardware/software status” section for specific hardware/software component status.

The following table provides the schedule and fees for telephone support.

Emergency telephone support

Schedule	Current/active/sustained	Manufacture discontinued
Normal business 7 a.m. to 6 p.m. Monday thru Friday	$150.00 per call	$150.00 per hour
After hours 6 p.m. to 7 a.m. Monday thru Friday	$150.00 per hour	$300.00 per hour
Saturday, Sunday and Holidays	$150.00 per hour	$300.00 per hour

The following table provides schedule and fees for support on service affecting and non-service affecting reported problems.

Non-emergency telephone support

Schedule	Current/active/sustained	Manufacture discontinued
Normal business 7 a.m. to 6 p.m. Monday thru Friday	$150.00 per call	$150.00 per hour
After hours 6 p.m. to 7 a.m. Monday thru Friday	$300.00 per hour	$450.00 per hour
Saturday, Sunday and Holidays	$300.00 per hour	$450.00 per hour
Note: A valid purchase order must accompany after-hours escalations before problem recovery can commence.		

The following table provides schedule and fees for on-site support.

On-site support

Schedule	Current/active/sustained	Manufacture discontinued
Normal business 7 a.m. to 6 p.m. Monday thru Friday	$150.00 per hour	$300.00 per hour
After hours 6 p.m. to 7 a.m. Monday thru Friday	$300.00 per hour	$600.00 per hour
Saturday, Sunday and Holidays	$300.00 per hour	$600.00 per hour
Note: Minimum eight hours billing per day, plus travel and living expenses.		

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

The following table provides schedule and fees for installation and upgrade support.

Scheduled Remote Installation and Upgrade Technical Support (Minimum 7 days notice)

Software Only (includes consultation and system review)	Pre-Support $200.00	w/Standby $300.00	w/On-Line Dedicated $600.00
Basic Hardware/ Software (includes consultation and system review)	Pre-Support $300.00	w/Standby $400.00	w/On-Line Dedicated $700.00
Hybrid Hardware/ Software (includes consultation and system review)	Pre-Support $500.00	w/Standby $800.00	w/On-Line Dedicated $1,300.00

Un-scheduled Remote Installation and Upgrade Technical Support

Schedule	Current/active/sustained	Manufacture discontinued
Normal business 7 a.m. to 6 p.m. Monday thru Friday	$150.00 per hour	$300.00 per hour
After hours 6 p.m. to 7 a.m. Monday thru Friday	$300.00 per hour	$600.00 per hour
Saturday, Sunday and Holidays	$600.00 per hour	$900.00 per hour

Meridian 1 Customer Quality Engineering Support

A Nortel Networks Customer Quality Engineering System Evaluation consists of an assessment of the Meridian 1 system and applications for conformance to Nortel Networks NTP recommended installation specifications. A detailed checklist is used to review the core system and auxiliary applications in following areas:

- environmentals
- power
- grounding
- batteries
- modules
- cabling
- preventive maintenance
- system operation
- software

Installation discrepancies and recommended actions are presented in a follow-up report.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Evaluation requests should be directed to the Manager of Nortel Networks Customer Quality Engineering at 408 565-2789. A PO should be provided at the time the request is made. Billing for a customer Quality Evaluation may be waived if the customer is currently working with CTS and the evaluation is required for problem isolation and/or resolution. Evaluations are billed at the following rates.

Customer Quality Engineering Evaluation fee schedule

Schedule	Hourly fee
8 a.m. to 5 p.m. Monday thru Friday	$150.00 per hour
5 p.m. to 8 a.m. Monday thru Friday	$225.00 per hour
Saturday/Sunday/Holiday	$300.00 per hour
Note: Minimum of eight hours billing per day, plus travel and living expenses.	

For additional information regarding the Customer Quality Engineering System Evaluations, please contact the Customer Quality Manager, located at Nortel Networks - Mission Park in Santa Clara, CA at (408) 565-2789.

Field Service Installation and Maintenance

This section describes some of the possible key service activities performed by Nortel Networks with the purchase of installation and/or maintenance services. These fee-based support services are conducted by the Enterprise Solutions Field Services (ESFS) organization.

Nortel Networks' ESFS organization, headquartered in Minnetonka, Minnesota, provides the following types of on-site support services for Meridian products, depending on the product ordered:

- Installation
- Maintenance

Installation and Maintenance quotes

Installation and maintenance are quoted to meet the specific requirements for that location and equipment configuration. Quotes can be obtained by contacting ESFS Marketing Management at the following location:

Enterprise Solutions Field Services
Marketing Management
9701 Data Park
Minnetonka, Minnesota 55343
(612) 932-8110
(FAX) 612-932-8440

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Technical Support services

The ESFS Customer Support Center provides telephone support (i.e. Help Desk, Answers ‘98).

Service locations

Authorized Distributors may order on-site installation and maintenance services from Nortel Networks for products installed within the Continental United States (CONUS).

Locations eligible for Nortel Networks’ support services must be located within 125 miles of a Nortel Networks Service Center. Nortel Networks ESFS Marketing Management, on a case-by-case basis reviews requests for support services for sites further than 125 miles from a Nortel Networks Service Center for eligibility. Call the ESFS Marketing Management at (612) 932-8110.

Nortel Networks Service Center locations can be found in the *Enterprise Solutions Field Services Zone Manual*. Zone Manuals can be obtained by calling Enterprise Solutions FS Account Management at (612) 932-8110.

On-site installation

Pre-Installation services

Pre-installation services may include the following items:

- Coordinate installation activities from system order to the day the equipment arrives
- On-site survey conducted by installation specialist
- Discussion of the preliminary site plan and additional equipment with the Customer’s facilities and space planning personnel for each installation site
- Review interfaces to CPE
- Coordinate the CPE pre-installation activities through the chairmanship of conference calls (between all parties involved in the installation process) to assure all site requirements are met
- Review the installation site environmental conditions (i.e., space location, commercial power, cabling, and grounding)
- Verify the product order
- Verify other factors critical to the installation
- Discuss implementation schedule
- Discuss roles and responsibilities of Distributor/End-User personnel

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Installation services

Installation services may include the following items:

- Physical installation and setup of the product and related peripherals
- On-site verification activities
- System acceptance testing
- System Design Specialist (SDS services may be requested and quoted separately from installation)

A detailed statement of work is developed as part of the product implementation.

Union labor

A thirty percent (30%) surcharge is added to Nortel Networks' current installation prices for installations in locations where union labor is required. Areas affected by this surcharge may include, but are not limited to, New York, Northern New Jersey, Connecticut, Rhode Island, New Hampshire, Massachusetts, Maryland, Washington D.C., and the Chicago, Illinois metropolitan area.

On-site Maintenance definition

The maintenance services provided by Nortel Networks consist of (1) keeping equipment in serviceable condition or (2) restoring equipment to serviceable condition.

Maintenance service levels

The two available service levels are as follows:

- Standard service level
- 7x24 service level is determined case by case.

The Principal Period of Maintenance (PPM) for "standard" service level corrective maintenance is defined as the hours between 8:00 a.m. and 5:00 p.m., local time, Monday through Friday, excluding Nortel Networks' holidays. A "7x24" Service-Level option may be purchased in place of the "standard" service level. The PPM for "7x24" service-level corrective maintenance is defined as 24 hours per day, 7 days per week, 365 days per year.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Maintenance activities

Scheduled maintenance

Pre-planned actions performed to keep equipment in a specified operating condition by means of systematic inspection, detection, and prevention of a failure. Scheduled maintenance is also referred to as preventive maintenance.

Technical/Telephone software support

The ESFS Customer Support Center provides telephone software support. Telephone software support includes the following items:

- End-user/system administrator support for clarification of documentation
- Problem identification and correction
- Delivery of software updates
- Use and navigation of the system User-Machine Interfaces
- Operational measurements
- Starting, stopping, and unloading applications

Standard Technical Software Support is available during normal working hours (8:00 a.m. to 5:00 p.m. Monday to Friday local time) excluding Nortel Networks' holidays. An unlimited number of calls are accepted from the system administrator (one person and alternate per Meridian 1 private branch exchange [PBX], regardless of the number of Client PCs using the TSAPI system) regarding the Meridian Link TCP/IP line, the Meridian 1 NTS Drive, and/or VISIT FastCall.

Remote diagnosis

Nortel Networks provides remote diagnosis to customers regardless of the level-of-service package purchased. Remote diagnosis permits Field Service personnel to dial into a customer's system to obtain the following items.

- pull reports
- collect data
- run diagnostic tests

Remote diagnosis allows ESFS personnel to perform these functions without disruption to the customer's system. The customer is responsible for maintaining the remote access connections at their site to enable the various Nortel Networks support agencies to conduct remote diagnosis.

Corrective maintenance

Corrective maintenance performed, as a result of system failures will have equipment restored to its original condition.

Repair

The restoration or replacement of equipment components as necessitated by wear, tear, damage, or failure to return the equipment to normal operating condition.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Response time targets

Initial response to all service requests is made by telephone to the end-user site contact.

Emergency response time

Response time targets in emergency or critical situations and service affecting/ major situations during the PPM are as follows:

Emergency response time targets

Site Distance	Phone	On-site
0-75 Miles	2 hours	4 hours
76-125 Miles	2 hours	6 hours
Greater than 126 Miles	2 hours	next day
Note: Nortel Networks uses reasonable efforts to provide on-site, same-day service during emergencies when services are required.		

Non-emergency response time

Response time targets in non-service affecting/minor situations during the PPM are as follows:

Non-Emergency response time targets

Site Distance	Phone	On-site
1-75 Miles	4 hours	Next day
76-125 Miles	4 hours	Next day
Greater than 126	4 hours	TBD

Requests for maintenance when an emergency does not exist, shall be deemed a request for corrective maintenance.

On-site service response time

The local Nortel Networks Field Service Manager has sole responsibility for determining availability of Nortel Networks' Service personnel, reporting on-site, during the period after 5:00 p.m. Monday through Friday, on weekends, and designated Nortel Networks' holidays.

Non-contracted emergency service

Nortel Networks provides emergency-related service for customers not desiring or qualifying for Nortel Networks' contracted service and maintenance, during or outside of the PPM, on an "as available" basis only. Current hourly billable rates and trip charges are assessed for such service.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

DEPOT - Maintenance Services

Plan summary

The Depot plan is designed to provide spare parts and phone support only for our customers. Products supported by the Depot plan are, i.e. Meridian Norstar, Meridian 1 and Companion equipment.

On-site service

When requested, Nortel Networks ESFS will respond to onsite requests for maintenance at T&M rates.

Moves, additions, and changes

Time and Material Labor Schedule for Core M1, Norstar and Companion

(includes Meridian Mail and Norstar Mail)

	Hourly Rate	Overtime Rate	Trip Charge
Sites under warranty/ maintenance with ESFS	$65/hour	$97.50/hour	$60/trip
Sunday and Holiday		$130/hour	$85/trip
Note: On-Site Support is a two hour minimum plus travel charge. Travel and Living charges incurred for sites greater than 125 miles, from the nearest service city, will be additional. Help Desk Phone Support is a one hour minimum at the above rates.			

	Hourly Rate	Overtime Rate	Trip Charge
Sites NOT under warranty/ maintenance with ESFS	$75/hour	$112.50/hour	$75/trip
Sunday and Holiday		$150/hour	$100/trip
Note: On-Site Support is a two hour minimum plus travel charge. Travel and Living charges incurred for sites greater than 125 miles, from the nearest service city, will be additional. Help Desk Phone Support is a one hour minimum at the above rates.			

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Time and Material Labor Schedule for Applications

(includes Symposium Call Center Server, Messenger, Web Response Server, Agent, Open Integrated Voice Response, Meridian Mail Net Gateway, TAPI Server, Meridian Integrated Meeting Services, Digital Networking, CallPilot, Desk Top Messaging, etc.).

	Hourly Rate	Overtime Rate	Trip Charge
Sites under warranty/ maintenance with ESFS	$100/hour	$150/hour	$100/trip
Sunday and Holiday		$200/hour	$125/trip
Note: On-Site Support is a two hour minimum plus travel charge. Travel and Living charges incurred for sites greater than 125 miles, from the nearest service city, will be additional. Help Desk Phone Support is a one hour minimum at the above rates.			

	Hourly Rate	Overtime Rate	Trip Charge
Sites NOT under warranty/ maintenance with ESFS	$115/hour	$172.50/hour	$115/trip
Sunday and Holiday		$230/hour	$140/trip
Note: On-Site Support is a two hour minimum plus travel charge. Travel and Living charges incurred for sites greater than 125 miles, from the nearest service city, will be additional. Help Desk Phone Support is a one hour minimum at the above rates.			

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

System/Software Orders and Upgrades

New system orders

This section outlines the ordering procedures when placing a new system order. Included are the following requirements:

- Distributor information
- Minimum new system order
- Special new system software ordering

When placing a new system order, both hardware and software components must be specified.

New system orders contain the hardware and software required to complete a functioning system configuration.

Meridian 1 Options 11C-81C

Hardware/software registration forms for Meridian 1 installations are not required. Distributors are registered automatically at the time of order acceptance.

General requirements

The general requirements for Meridian 1 Options 11C-81C orders are as follows:

- All new Meridian 1 Option 11C-81C systems must be ordered with software.
- New Meridian 1 systems utilize usage-based software.
- Minimum terminal number (TN) requirements are as follows.
  - 200 TNs for Options 11C, 51C and 61C
  - 1000 TNs for Option 81C
- Hardware and terminal provisioning must be within the guidelines set forth in the “Nortel Networks Publications” (NTPs).
- For each **new system, Meridian Mail and Meridian MAX order**, a hard copy of Report 9 from Meridian Configurator can accompany distributor’s PO.

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

System and application software orders

One copy per central processor unit (CPU) of system software material is shipped with each system. The cost of additional diskette copies is $500 per set.

> ***Note:*** Additional copies of the QMM42 (Security Data Cartridge) are not provided.

Additional diskette order code

Code	Diskette type
SERV0002	3-1/2 inch Diskette Set

Each new system shipment includes one copy of the application software material including the installation program and a blank set of software media. Following installation, create a complete backup copy. Keep the original media unaltered and use it for maintenance.

System/software upgrades

System upgrades can include changes to hardware and/or software.

Software updates

Software update orders

Software update orders extend the capabilities of existing software, including updating to new/current releases, adding features, or expanding system capabilities.

Nortel Networks continually generates new software releases, these software enhancements and new features are implemented to meet growing end-user requirements. Nortel Networks recommends generic software updates meet newest capabilities whenever possible.

Software update orders can be grouped into the following five types. These are discussed in detail later in the section:

- Generic updates
- Release updates
- Feature additions/deletions
- Software capacity changes
- Software media replacement

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Software update charges

Changes (system upgrades, generic updates, release updates, feature additions/deletions, and/or software capacity increase/decreases) to existing software incur software service transaction fees. The number of software service transaction units (599SL1-1) associated with software enhancements determine the software update charges. The software update charge addresses the costs associated with software changes or system upgrades and may include one or more of the following service fees.

- Software Service Transaction
- In-house conversion transaction
- Software RTU

Some examples of software update charges are as follows:

Example of software update charge services

Service	Example
System Upgrade	SL-1LE to Meridian 1 Option 61C
Generic Update	301 to 6111
Release Update	011.13.62 to 1011.13.71
Issue Update	011.12 to 1011.13
Feature Addition/Deletion	Add a Feature
Capacity Change	Add 100 TNs
Software Media Replacement	Worn or damaged tape/disk/cartridge

In-house conversion charge

Nortel Networks performs an in-house conversion if requested by the Distributor. The charge for this conversion (SERV0031) is $100 per software service transaction unit.

Factory Service Program

The following support service package fees are as follows.

Order Code	Description	Unit CLP	Dist. Disc.	Repair CLP
SERV0055	Switch to Switch Conversion Fee	750.00	H	N/A
SERV0056	Loops requiring conversion/balancing	27.50 per loop	H	N/A
SERV0058	Loop Conversion Fee	850.00	H	N/A
SERV0057	Engineered Upgrades	Quoted only	H	N/A

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Enhanced In-house conversions

Enhanced in-house conversions provide special manipulation of an existing data base versus creating an entirely new data base (see Engineered Upgrades within this section). As part of an enhanced in-house conversion, Nortel Networks can solve simple to complex time-consuming tasks, as shown in the following examples.

Switch conversion pricing and order codes

Order code	Description	Unit Price	Quantity	Total
599SL-1	SW Service Transaction fee	$640.00	steps	
SERV0031	Basic In-house Conversion fee	$100.00	steps	
SERV0055	Switch to Switch Conversion fee	$750.00		$750.00
			Grand Total	

Loop conversion pricing and order codes

Order code	Description	Unit Price	# of Loops	Total
SERV0056	Loops Requiring Conversion/Balancing	$27.50		
SERV0058	Loop Conversion fee	$850.00		$850.00
			Grand Total	

What is included at this price?

Nortel Networks assigns a factory engineer to handle your conversion requirements and provides verbal assistance to your technical staff for the preparation of the customers data. Nortel Networks provides a pre-installation conference call to ensure all the necessary information is obtained, performs the actual conversion for you, and provides a post-installation call to ensure a successful software installation.

What needs to be provided by the Distributor?

Include with your conversion PO a completed Factory Service Checklist. This form can be obtained by called 408-565-2001 or 408-565-1779. Order entry forwards this form onto Factory Services to initiate the work.

Post ordering, the Distributor is required to provide directly to Factory Services the following items:

- Data dump on backup media (LD43), if applicable
- Configuration printout of source switch
- Table indicating the target switch loop configuration, i.e. from > to and new
- Description of cards in each card slot in each loop (needed for before and after verification)

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Send the information to the following address:

Nortel Networks
Enterprise Solutions
2305 Mission College Blvd.
Santa Clara, CA 95052-8173

Attn: Factory Service
M.S. B2440

Engineered Upgrades - Quote basis

If you need assistance with creating a new data base configuration, data base engineering or you are adding feature, e.g.; ACD, BARS, NARS, etc.) to an existing system call Nortel Networks Factory Services fax-on-demand for a quote form (408) 565-1779. Once Factory Services has all the information, we will call you with a custom quote. If the quote is acceptable to you, the checklist and PO are forwarded (via FAX or EDI) to Customer Service in Mission Park with the order code SERV0057.

Applicable systems

The Basic In-house Conversion and Enhanced In-house Conversion target machine types are 21E, 51, 51C, 61, 61C, 71, 81, and 81C. Nortel Networks has the ability to upgrade from previous X11 machine types to the current version of these target systems.

Conversion ordering information

The following table lists the conversion order codes and descriptions.

Order code	Description
599SL-1	Software Service Transaction Unit
SERV0031	Basic In-House Conversion
SERV0055	Switch to Switch Conversion
SERV0056	Loops Requiring Conversion/Balancing
SERV0058	Loop Conversion
SERV0057	Engineered Upgrades - Free Custom Quote > Order Service SERV0057

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Generic/release updates

Generic update

A software generic is the feature base and system option that a certain family of software is related. The X11 generic software family is the only software generic family that has “releases.” A Generic update is when software capabilities are expanded by changing the software family.

Release update

Within the X11 software generic, a software release is a particular set of features/functionality. A release is a version of software within the X11 generic family. A release update entails a release change within the same generic family.

Generic/release software issues

During the active and sustained software phases, Nortel Networks releases new software issues (or versions) that enhance features and quality in the release. Issue numbers are not necessarily sequential.

The following table lists the latest generic/release available by system type:

Available generic/release types

System	Last software release supported
L, VL, A	X05
M	X11 Release 7
LE, VLE, XL	X11 Release 9
S	X11 Release 12
MS, N	X11 Release 13
XN	X11 Release 14
ST	X11 Release 17
21	X11 Release 17
RT, NT, XT	X11 Release 21
STE, 21E	X11 Release 21
51, 61, 71	X11 Release 21

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Available generic/release types

System	Last software release supported
51C, 61C, 81, 81C	Current Release

Option 11/11E/11C available generic/release types

System	Last software release supported
Option 11	X11 Release 18
Option 11E	X11 Release 21
Option 11C	Current Release

Software service transaction matrix

The software service transaction fees for generic/release updates are based on the generic/release update software service transaction matrix.

Use the following generic/release software service transaction matrix to determine the number of software service transaction units required with generic/release updates. Identify the applicable transaction block on the matrix to determine the appropriate software update charge. The number within each block denotes the software service transaction units required for each type of update. **Each software service transaction unit is multiplied by the rate of $650.**

Generic/release update software service transaction matrix

From	X11.17 (Note 1)	X11.19 (Note 1)	X11.21 (Note 1)	X11.22 (Note 1)	X11.23 (Note 2)	X11.24 (Note 4)	X11.25 (Note 5)

X11.24						1	1
X11.25							1

Note 1: Requires 3-1/2 inch 4-Megabyte floppy-disk operation.
Note 2: Available on either 3-1/2 inch 4-Megabyte floppy disks or CD-ROM (CD-ROM requires IODU/C card [NT5D61]).
Note 3: Requires database reconstruction for all systems upgrading from these releases.
Note 4: Requires IODU/C card (NT5D61).
Note 5: Requires IODU/C card (NT5D61) or the CP PII Multi-Media Disk Unit (NT4N43).

Feature addition or deletion

Feature additions are the addition of new features available within software generic/release or in conjunction with generic/release updates. Charges for adding features include the current price (RTU fees) of the feature added, plus the applicable software service transaction fee (minimum $650).

Existing features may be deleted to free additional memory if the feature is no longer required. In this case, the minimum software service transaction fee of $650 applies (599SL1-1). Nortel Networks offers no credit for deleted features. Nortel Networks tracks system features purchased and deleted by system serial number. The end user can reestablish a deleted feature at the minimum software service transaction fee of $650, plus RTU charges due to TN, Automatic Call Distribution (ACD) Agent, or Digital Subscriber Loop (DSL) growth.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Capacity change

System software capacity

Capacity changes are the expansion or reduction of TNs, ACD Agents, and/or DSLs. This can be done within existing system type and software generic/ releases, or in conjunction with release updates and/or system updates.

"Size" the software at a reasonable level to support at least a system's "equipped" port (TN) and ACD-agent capacity as indicated in the following chart.

Terminal Number (TN)

A TN is the software designation of a logical termination point, either physical or virtual, defined in the Meridian 1 software.

Example TNs per interface requirements

Quantity	Interface	TNs
700	Voice Lines	700
128	Trunk Lines	128
3	Consoles	6
325	Voice/Data Lines	650
4	PRA Links	96
12	Meridian Mail Ports	12
20	BRI DSL	40
	TOTAL TNs	1,632

ACD Agent

ACD agent is any TN with a directory number (DN) designated as an ACD DN in Meridian 1 software.

DSL

The software designation of a Basic Rate Interface (BRI) physical connection that accommodates two B-channels.

Capacity expansion/reduction charges

Charges for expanding TN, ACD Agent, and/or DSL capacity include the current price (RTU fees) of all applicable features, plus the software service transaction fee (minimum $650).

For TN, ACD Agent, and/or DSL capacity reductions, the minimum software service transaction fee of $650 applies. Nortel Networks offers no credit for reducing capacities and RTU value is forfeited.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Software media replacement

Replacement of worn or damaged software media is invoiced at the minimum software service transaction fee of $650 (599SL1-1). Return all software media (damaged or not) or applicable RTU fees for current features are invoiced. If the software media is lost, Nortel Networks provides replacement media when requested in writing. Media type is based on system type and software release as follows:

- Systems with software below X11 Release 10 were shipped with tapes.
- Systems with X11 Release 10-14 software were either shipped with or have been upgraded to 5-1/4 inch floppy disk drives.
- Systems with X11 Release 15-17 software were either shipped with or have been upgraded to 3-1/2 inch floppy disk drives.
- Systems with X11 Release 18-22 software were either shipped with or have been upgraded to 3-1/2 inch 4-Mbyte floppy disk drives.
- Systems with X11 Release 23 software are shipped with either 3-1/2 inch 4-Mbyte floppy disk drives or CD-ROM drives.
- Systems with X11 Release 24 software are shipped with CD-ROM drives.
- Systems with X11 Release 25 software are shipped with CD-ROM drives or the CP PII Multi-Media Disk Unit.

At times replacement software is replaced with a higher issue; e.g., one damaged X11 Release 15.51 diskette is replaced by a whole set of Release 15.57 diskettes.

Upgrades

Norstar upgrades vary by product type.

Upgrade packages for Norstar are available for all cartridge-based systems. Order the upgrade package for the systems current software level (DR2, DR3, DR4 or Centrex) to get the DR5 or Centrex+ capabilities.

Meridian 1 Option 11 upgrades

Updates are used as follows:

- Move a system from one feature set to another (e.g., General Business to Enhanced Business)
- Move a system from one software release/issue to another (e.g., from Release 21 to Release 22).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Ordering software update

When ordering a software update, you must provide the order information listed in the “Ordering Process and Procedures” section under “Required order information.” Contact Customer Response Center for the appropriate form.

Order one of the software updates using the appropriate order code(s) for the activity requested. For either of the previously mentioned software update activities use one of the software update order codes not a new system order code. When updating a system with one or more additional levels of software (100 TN increments above the base level of 200 TNs) the order codes for both the update and the additional increments(s) must be ordered.

Depending on the Option 11 system type (i.e., Option 11/11E or Option 11C), when a software update is purchased, a new cartridge or new software keycodes may be shipped and an RA number is provided for the return of the used cartridge (Option 11/11E only). Invoicing for the new cartridge/software keycodes and any additional TN increments occurs upon shipment. When the used software cartridge is returned, Nortel Networks issues credit for the then current price of the returned cartridge and any associated additional TNs.

Please refer to the Option 11 Reference and Pricing Reference sections for detailed descriptions of software ordering procedures and codes.

Replacing damaged cartridges (Options 11 and 11E only)

To replace a damaged cartridge, please specify the appropriate order code for a software update/replacement and, if applicable, the order code for the additional TN increments on your PO, then Nortel Networks can ship new cartridge to you. Invoicing for the new cartridge and additional TN increments occurs upon shipment. When the damaged software cartridge is returned to Nortel Networks credit is issued for the current price as listed in the Product Catalog for the returned cartridge and incremental TNs, where applicable.

Replacing damaged Option 11C daughterboards

For an Option 11C daughterboard failure, a blank NTDK21AA daughterboard can be programmed from a PCMCIA card. The security device and keycode can be reused. In the event of a DOA, the complete software package, i.e., NTSF8001, must be replaced.

Updating Meridian Mail Card option

See “Message Processing Products” chapter in the Meridian 1 catalog for detailed information.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Meridian 1 Options 21 - 81C upgrades

Applicable RTU fees

Pre-X11 Rel. 23 upgrades to Rel. 23 on CD-ROM media - Special Policy

With the introduction of the IODU/C card and CD-ROM delivery of software on Release 23, a special policy is introduced to ensure the correct software media type is shipped to Option 51C-81C upgrade systems. All Option 51C-81C systems that upgrade to Release 23 from previous releases receive automatically a Release 23 on 4-Mbyte media unless a a new SERV0080 code is ordered to indicate the desire for Release 23 on CD-ROM software. Once this new SERV0080 code has been ordered, all subsequent releases of software will be shipped via CD-ROM format. Only customers who have purchased or plan to purchase an IODU/C card either separately or as part of a system upgrade package should use the SERV0080 order code. The SERV0080 code is offered at no charge.

Pre-X11 Release 22 to X11 Release 22 updates

The end user receives all features on their existing system plus additional options available in the latest equivalent feature offering at no additional charge when updating from pre-X11 Release 22 to X11 Release 22.

Pre-X11 Release 15

Pre-X11 Release 15 software RTU fees are one-time charges to use a feature in conjunction with a specific SL-1 system type/CPU. This one fee/one system relationship necessitates return of all existing software media when a software update order takes place.

X11 Release 15 or 16 to X11 Release 17 - special policy

A special policy exists for X11 Release 15 or 16 systems that exceeded their registered TN capacity allowing for an update to Release 17 at no additional software RTU fee(s). This special policy increases the software TN capacity level supporting the existing number of system TNs meeting end-user’s expectations relative to perceived software capacity.

This policy does not apply, if growth beyond the registered TN capacity has not occurred. Software update orders to these systems are processed in a normal fashion.

This special policy only affects TN capacity. When updating to Release 18, the ACD Agent level must still be selected as described in “Selecting TN and ACD levels for software updates.”

Selecting TN and ACD levels for software updates

When updating software from pre-Release 15 to Release 22, distributors must select the TN level required in all cases and the ACD agent level required when ACD is utilized. When updating to Release 22 from Release 15-17, the ACD agent level must be selected when ACD is utilized in the current system. These levels must be specified when the software update is ordered.

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Exceeding TN/ACD limits on original system

For software updates, additional software RTU charges apply if the TN and/or ACD agent levels selected are greater than the limits (based on the original system type). Refer to the following Software Update/System Capacity Matrix for these limits.

Software update/system capacity matrix

Note 1: Transition policies for TNs are not applicable for Options 21-71 since these systems were introduced with X11 Release 15.

Note 2: Transition policies are not applicable for Options 21E, 51C, 61C, 81, and 81C since these systems were introduced with or after X11 Release 18.

Note 3: Transition policies are not applicable for SL-1 STE since it was introduced with X11 Release 18. This system type cannot be purchased new; it is achieved through upgrading an ST system.

Updating Release 15/16 to Release 17/18

This policy applies to systems updating to Release 17 or 18 from Release 15 or 16 with growth beyond the registered TN capacity. As mentioned previously, existing policies for earlier releases updating to Release 17 or 18 remain unchanged. If you have any questions, call your Nortel Networks Customer Response Center Representative.

Customers who have exceeded their registered TN capacity must provide a software update order form including the system TN count (specific to the current Release of the system) before updating to Release 17 or 18.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

TN count for X11 Rel 15.55 and later through Rel 16 (all issues)

Print out the Incremental Software Management (ISM) information from Overlay 22 to determine the number of system TNs. The actual number of TNs is the sum of the used TNs and ACD agents (AGNT).

Code

TNs	2000	Left	16	Used	1984
AGNT	100	Left	56	Used	44
ACDN	50	Left	16	Used	34

In this example, the system shows the number of TNs to be 1984, but the actual number is 2028, the sum of the TNs and AGNT counts. Therefore, additional TNs are required for this system to run on Release 17 or 18. The solution is to increase the total TN capacity from 2000 to 2500, the next increment. Although ACDNs are listed in the example, they are not used for pricing. Submit the ISM printout with the software update order.

TN count for X11 Release 15 (pre Release 15.55)

The previous example is not a true example as ISM was not implemented until Release 15.55. In releases earlier than X11 Release 15.55 the ISM information that prints the total number of TNs and ACD agents (AGNT) is not available. Instead, we request the complete TN Build (TNB) list printed from Overlay 20 and totaled. Only the first page of the TNB list must be submitted with the order. Do not send the entire TNB list unless requested by Customer Response Center; use the TNB only as a guide for counting the total number of TNs.

Placing software update order

Use the following steps to place a software update order.

1. Find the system TN count.
2. Complete the update order form or indicate directly on the PO the total number of system TNs installed on the system and the new TN capacity required due to growth beyond the registered and purchased capacity.

   Note: The actual number of system TNs is the sum of the used TNs and ACD agents shown on the ISM listing from Overlay 22.

3. In addition, indicate the end user's X11 software release and the current registered (and purchased) TN capacity.
4. Send the Overlay listing described above, the PO, and the completed form.

   Note: In lieu of using the form, include the required information directly on the PO.

Software update order form

Use the following form before updating to Release 17, 19,21, 22, or 23.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

X11 Release 15/16 to Release 17, 19, 21, 22, or 23 software update - TN capacity

This form is only required if registered TN capacity has been exceeded. Include appropriate Overlay listing described in special policy

Provide the following information:

Date:_____ Name: _____

Distributor's Name: _____

Address: _____

Phone Number: _____

End User Name:_____

Current X11 Software Release and Registered TN Capacity:_____

Part 1. Actual System TN Count

Pre-X11 R15.55
TOTAL SYSTEM TN COUNT* _____
REQUIRED TN CAPACITY _____
*From manual total of TNB list

Pre-X11 R15.55 - R16
System TNs** _____
ACD Agents** _____
Total system TNs*** _____
REQUIRED TN CAPACITY
** From Overlay 22 ISM Printout
*** Sum of System TNs and ACD Agent

Part 2. Customer Selected ACD Application Parameter

Only applicable when updating to Release 19 and ACD is being utilized on existing system.

Current System ACD Agent Capacity _____

Selected ACD Agent Capacity _____

The customer can specify the ACD Agent capacity of their current system (refer to Software Update/System capacity Matrix) or a lesser number at no additional charge for their current features. Specifying the number of agents higher than their system maximum and / or adding features will be charged based on current prices. The ACD Agent capacity can not exceed the system TN capacity.

Please complete one form per Meridian 1 location.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Web Based Services

In keeping with our commitment to “Customer Value” we have aggressively enhanced our list of “Global” web based services for our business partners to include a Keycode Retrieval System (KRS). By working with members of the Distributor Alliance Council (DAC) we have developed the most intuitive and comprehensive web application to date for the retrieval of Customer Keycodes.

We are confident that the use of this tool will better fulfill our commitment to our partners for quality customer service and improved order management. This tool provides our partners the ability to retrieve both current and historical keycodes for their customers with 24 x 7 availability. In addition, we provide a complete set of tools with which to manage keycodes, including the capability to compare keycodes.

To access this application you must first complete the registration process which begins by completing the form found at the following URL http://www.nortelnetworks.com/servsup/krs/ after the registration form is completed we will notify you with your User ID and Password.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Meridian Applications - Special Policies

This section contains exceptions to the general policies, process, and procedures described in other sections of this product catalog. These exceptions apply only to the following specific Meridian 1 product applications:

- SYMPOSIUM Agent
- SYMPOSIUM TAPI Server
- SYMPOSIUM WebResponse Server
- Open IVR
- Meridian Mail Reporter (MMR) Service Plan
- SYMPOSIUM Messenger
- Meridian Passport Software Policy

SYMPOSIUM Agent

This section describes the services provided by the Enterprise Solutions Field Service and SYMPOSIUM Professional Services in conjunction with SYMPOSIUM Agent. SYMPOSIUM Agent is software that is installed on customer-provided Windows computers to enables call center agents to provide more intelligent and personalized customer.

SYMPOSIUM Agent Software Support (SV000149)

One year of software support is provided with the SYMPOSIUM Agent. The service is effective 10 business days after the product is shipped by Nortel Networks. To continue receiving this support, SV000149 can be purchased for each installation site on an annual basis. Access to this service is obtained by calling 1-612-932-8343. This software support includes the following services:

- Assisting end users or distributor support personnel with general answers to questions about the installation of SYMPOSIUM Agent.
- Accepting the first call for help from a distributor support technician or end user's lead operator.
- Assisting end users in general use of SYMPOSIUM Agent operation. Assistance with the implementation of SYMPOSIUM Agent integrations with end user's applications and databases is not included.
- Accepting problem reports and design change requires submitting them to the appropriate Nortel Networks design organization.
- Provision of any generally release up-issues or problem fixes.

Telephone assistance is available during normal 8 a.m. to 5 p.m. business hours (Central time).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SYMPOSIUM Agent INSTALL - PREP (SV000147)

This support includes up to 8 hours of remote coordination of the installation of SYMPOSIUM Agent application software on the agent's desktop PCs. This support does not cover TAPI Server installation, client server connectivity, installing TAPI Remote Service Provider software on client PCs, or any integration with third-party applications (such as using DDE, OLE, or Keystroke macros). Included is:

- One conference call to review the completed pre-installation checklist prior to the start of the installation.
- Assistance via phone while the distributor or end user performs the installation of the five (5) initial clients at a new site. General answers to questions about the installation of SYMPOSIUM Agent will be answered however, this does not includes specific questions about implementation with SYMPOSIUM Agent and end user's databases.
- Installation assistance is performed during normal 8 a.m. to 5 p.m. business hours (Central time).

SYMPOSIUM Agent INSTALL - PRO (SV000148)

The INSTALL-PRO provides a Nortel Networks Professional Services Engineer (PSE) on site for one eight hour day to install SYMPOSIUM Agent and/or to provide installation assistance to the end user's/distributor's field technicians. Included are:

- At least one conference call to review the completed pre-installation checklist prior to Nortel Networks performing on-site installation.
- Installation coordination from receipt of order through completion of installation.
- Installation of SYMPOSIUM Agent using Windows 95 Note Pad as the database to provide operational verification. Assistance with the implementation of SYMPOSIUM Agent integrations with end user' applications and databases is not included.
- Normally 5 to 8 seats of SYMPOSIUM Agent can be installed in one day.
- On-site installation is performed during normal business hours.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SYMPOSIUM Professional Services Order Process

If the end user requires integration services (SYMPOSIUM Agent with Customer's application via DDE, OLE or Keystrokes macros) or customization of CallGuides, then the SYMPOSIUM Professional Services group may be contacted.

- Distributor calls 1-800-467-0273 to request SPS support.
- Distributor completes requirements checklist and qualifies the lead information.
- SPS provides a quote and the authorization/contracts documents.
- Distributor accepts the work order and submits a Purchase Order within 5 days.
- SPS performs implementation of authorized work effort.

SYMPOSIUM Professional Services (SPS) can provide customization and integration for SYMPOSIUM Agent.

For more information, call 1-800-467-0273

SYMPOSIUM TAPI Server

This section describes the services provided by the Enterprise Solutions Field Service organization in conjunction with SYMPOSIUM TAPI Server. The SYMPOSIUM TAPI Server is software that is installed on a customer-provided Windows NT server which allows the customer to implement TAPI 2.X compliant application, such as SYMPOSIUM Call Manager or SYMPOSIUM Agent in client-server network environments. Other TAPI-compliant applications developed by Nortel Networks, SYMPOSIUM Partner Program Vendors, or Nortel Networks' Business Affiliates may also be used. The Nortel Networks Business Affiliate Action Line can be contacted at 972 684-1564 for a current list of developers and applications.

TAPI Server Software Support Services (SV000091)

One year of Nortel Networks provided, telephone software support service is provided with the SYMPOSIUM TAPI Server base package. Software support includes the following services:

- Answering general installation questions.
- Accepting the first call for help from a distributor support technician or end user's lead operator.
- Assisting end users in general system operation
- Referring the end user to user manuals when appropriate.
- Accepting problem reports and design change requests submitting them to the appropriate Nortel Networks design organization.
- Provision of any generally release up-issues or problem fixes.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Access to this service is obtained by calling 1-612-932-8303. The service becomes available ten business days after the product is shipped by Nortel Networks. Software Support can be renewed on an annual basis by ordering the Service Package, SV000091.

CTS does not provide technical support services for TAPI Server software but can be called upon to support Meridian Link or other system problems.

> ***Note:*** Nortel Networks' Enterprise Solutions Field Services offer Meridian Link INSTALL ASSIST (SVC1035) which will provide Nortel Networks support via telephone to the Distributor's field technicians as the Distributor's field technicians install Meridian Link.

TAPI Server INSTALL-PREP (SV000088)

Installation requires detailed planning before the first piece of equipment reaches the customer site. If a single item in the installation process is delayed, the entire installation is delayed, diminishing customer satisfaction and reducing profits. Nortel Networks' INSTALL-PREP pre-installation verification service is intended to help ensure a smooth, on-time installation. The INSTALL-PREP service package includes:

- At least one conference call to assist the end user/distributor in understanding the guidelines specified in the Pre-Installation Checklist (i.e.: Meridian 1 PBX minimum release levels, Meridian Link/SCCS Link Upgrades, Windows NT Server/LAN requirements and Client Desktop specifics) prior to the start of the installation
- Installation coordination from receipt of order through scheduling the installation.
- Assistance via phone while the Distributor/End User performs the following:
  - — Installation and configuration of the Meridian Link. This includes the loading and configuring of the Meridian Link software.
  - — Installation and configuration of the Meridian 1 TAPI Server software on the dedicated Windows NT server.
  - — Final system configuration, testing and system operational "fine-tuning" as necessary.
  - — Installation assistance is performed during normal 8 to 5 business hours.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

TAPI Server INSTALL-PRO (SV000089)

The INSTALL-PRO service package consists of everything within the INSTALL-PREP package plus a Nortel Networks Professional Services Engineer (PSE) performing the on-site installation and/or providing on-site installation assistance to the end user's/distributor's field technicians. The INSTALL-PRO service package includes:

- An ENFS Professional Services Engineer will travel to the end user location to provide three eight hour days of the following on-site installation activities:
  - — Assist the Distributor's Technician in the installation and configuration of the Meridian Link. This includes the loading and configuring of the Meridian Link software.
  - — Assist the Distributor/End User's LAN Administrator in the installation and configuration of the Meridian 1 TAPI Server software on the dedicated Windows NT server.
  - — Assist the Distributor/End User personnel in final system configuration, testing and system operational "fine-tuning" as necessary.
  - — Verify Maintenance Modem functionality (call to CSC for remote test).
  - — Installation activities will be considered complete when the Distributor/ End User signs the Nortel Networks "Order Acknowledgment".
- On-site installation is performed during normal business hours.

Installation Support Limitations

Purchase of either SYMPOSIUM TAPI Server INSTALL-PREP or PRO is strongly recommended to ensure smooth installation. If neither INSTALL-PREP or PRO are purchased, Enterprise Field Service will provide fee-based installation support to Distributor personnel who have attended TAPI Server Installation training.

SYMPOSIUM WebResponse Server

Use the following order codes to request the various services offered by Nortel Networks Enterprise Solutions.

Installation and support options

Order code	Description	Option type
SV00018	SYMPOSIUM WebResponse Server Installation Service	Installation
SV000183	SYMPOSIUM WebResponse Server Annual Telephone Support	Post-warranty support
SV000182	SYMPOSIUM WebResponse Server Additional One-day Installation Services	Installation

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SV000184

Symposium WebResponse Server Installation Services

At least two pre-installation conference calls will be chaired by a Nortel-EN/ Field Services Technical Specialist to assist the end user/Distributor in readying the customer-provided Windows NT Server, the end user's LAN/WAN/Internet environment, and the client PCs for use with Symposium WebResponse Server. Complete Symposium WebResponse Server installation activities will be performed by a fully trained Nortel-EN/Field Services Professional Services Engineer. The on-site installation service includes a maximum of five days of labor on the end user's premises to verify the customer supplied Windows NT Server has a working TCP/IP network connection. A Nortel Professional Services Engineer then loads and configures the Sybase software and the Symposium WebResponse Server software onto customer supplied Windows NT Server. Installation also includes the loading and configuring of approximately five client end users with the Symposium WebResponse Server client software, the Sybase Client Software, and build a basic configuration of one Web form on the Client. The end user/Distributor is responsible for the configuring of additional Symposium WebResponse Server Clients. On the Web site server, the Nortel Professional Services Engineer will assist the customer as they load and configure the CGI software onto the customer's Web site and also assist the customer as they load and configure the Entrust software. The Nortel Professional Service Engineers will verify that a “Web surfer” can complete the generic form/transaction and then verify that this generic form/transaction is received at the Symposium WebResponse Server Client PC and that the Client PC can process the form/transaction to closure.

SV000183

Symposium WebResponse Server Annual Telephone Support

The Nortel-EN/Field Services Customer Support Center (CSC) will accept all requests for assistance from the customer's Symposium WebResponse Server administrator. The CSC can assist the end users in diagnosing Symposium WebResponse Server operational problems and then recommend the appropriate course of action to remedy them. The CSC will also use remote access when appropriate. This cursory level of telephone support will involve general answers to questions about the operation of the Symposium WebResponse Server product and direct the callers to the appropriate documentation when applicable. The telephone support will not provide specific answers about the implementation of Symposium WebResponse Server product in that end user's environment. This service is available between the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday. If expert support is required, the caller will be directed to Nortel's Symposium Professional Services organization where a quote for these expert services can be provided.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SV000182
Symposium WebResponse Server Additional One-Day Installation Services
Includes one eight hour day of on-site software installation activity performed by a fully trained Nortel-EN/Field Services Professional Services Engineer. The installation charges include installation of Symposium WebResponse Server Client Software and the Sybase Client Software onto the end user PCs. The Professional Services Engineer will then perform the appropriate operational verification. Normally 5 to 8 seats can be installed in one day. On-site installation is performed during normal business hours.

Open IVR

This section describes the services provided for Open IVR by the following organizations:

- Enterprise Solutions Field Services (ESFS)
- Enterprise Solutions Customer Support Services (CSS) Applications Development Services (ADS)

See the "Technical Support" section in this catalog for general information about ESFS. Enterprise Solutions/CSS ADS services are described later in this section.

Enterprise Solutions Field Service support

Ordering policy

Open IVR requires the purchase of installation and first-year maintenance. Enterprise Solutions FS provides installation and first-year maintenance. Contact and place orders through Enterprise Solutions FS in Minnetonka, MN, at (612) 932-8110.

Pricing of the ESFS Open IVR services requires custom quoting. Contact ESFS Account Management at (612) 932-8110 to for pricing. Nortel Networks develops the detailed statement of work as a portion of the Open IVR product implementation.

Support services

Available support services for Open IVR are as follows:

- INSTALL-PREP
- INSTALL-PRO
- First-Year Maintenance

  Note: The Open IVR service offerings apply to the Meridian 1 marketplace until Field Introduction, First-Market Applications, or verification-office activities are complete for other Nortel Networks product markets (e.g., SL-100, DMS).

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

INSTALL-PREP

Installation requires detailed planning before any equipment reaches the customer site. If a single item in the installation process is delayed, the entire installation is delayed, diminishing customer satisfaction and reducing profits. Nortel Networks' INSTALL-PREP pre-installation verification service ensures a smooth on-time installation.

The INSTALL-PREP service package includes such things as coordination of pre-installation activities by Nortel Networks technical specialists/field engineers. For a list of pre-installation activities see "Technical Support" section in this catalog.

INSTALL-PRO

The INSTALL-PRO service package consists of everything within the INSTALL-PREP package plus the PSE performing the on-site installation and/or providing on-site installation assistance to the end user's/distributor's field technicians.

For a list of pre-installation and installation activities see "Technical Support" section in this catalog.

Yearly maintenance services

Open IVR requires maintenance support services. Maintenance support services typically includes the following services:

- Accepting the first call for help from the end user's lead administrator
- Assisting end users in general system operation
- Referring the end user to user manuals when appropriate
- Keeping equipment in serviceable condition or restoring it to serviceable condition
- Dispatching Nortel Networks PSEs when on-site assistance is required

Open IVR requires Standard Service Level. The "7x24" Service Level is also available. For more information about support levels, see "Technical Support" section in this catalog.

Post-sales IVR applications development support

Enterprise Solutions/CSS ADS provides the post-sales on-demand IVR applications support. ADS fees are based on the Meridian 1 (Options 11-81) CTS Technical Support fees described in the Meridian 1 Product Catalog, "Technical Support" section. Call 1-800-766-ETAS (1-800-766-3827) to reach ADS.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Support services

Senior Support Engineers, who are experts in the supported product comprise the Enterprise Solutions/CSS ADS organization. These engineers have in-depth experience and qualifications related to C, C++, and UNIX languages, plus relational databases and Novell CNE training. The function is supported by extensive, dedicated, and fully supported lab facilities equipped with various interconnected Meridian 1 Call Center products.

Ordering process

Under the Customer Premises Equipment (CPE) Distributor Agreement, the distributor must initiate requests to the Enterprise Solutions/CSS ADS for end-user IVR application development support. Enterprise Solutions/CSS ADS invoices the distributor for service rendered to end users.

A distributor submit a PO to initiate the IVR post-sale development support services provided by Enterprise Solutions/CSS ADS. Nortel Networks requires a customer (i.e., business affiliate, distributor, VAD/VAR) to submit credit authorization if the customer has not previously conducted business with Nortel Networks and does not have a customer identification (ID) number.

Meridian Mail Reporter (MMR) Service Plan

Meridian Mail Reporter (MMR) includes a 90-Day Service Plan and offers an optional MMR One-Year Extended Service Plan. If the MMR One-Year Extended-Service Plan is purchased with a new system, or during the initial 90-day period, total support services include 90 days plus 12 months for a total of 15 months. If purchased outside of the initial 90-day period, the plan provides support services for 12 months from the purchase date.

MMR service plan provides the following types of services.

- Defect resolution
- Limited installation support
- Navigation support
- Interpretation

Defect resolution

Defect resolution provides analysis and resolution for the following items.

- MMR Data Corruption
- Documentation inconsistencies
- Software design fault
- Software out-of-box failure

Limited installation support

The limited installation support provides remote telephone support for problems relating to software installation ensuring the application loads properly in the PC and presents an application-launch screen.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Navigation support

Navigation support provides assistance with the methodology for effective manipulation/utilization of the application. Navigation supports includes the following items.

- Location
- Report generation
- Configuration

Interpretation

Interpretation provides analysis and derivation of subsequent actions suggested by the results of a particular report. The customer makes the decisions regarding what action to take, but Service Connection provides information so the customer can understand the report output implications.

Support service availability

Nortel Networks provides all MMR support services during normal business hours by the Service Connection Advisory Group located in Richardson, Texas. Normal business hours are Monday through Friday from 8:00 a.m. to 5:00 p.m. CST, excluding Nortel Networks holidays. Part of the Nortel Networks Enterprise Solutions/Customer Support Services organization, Service Connection is dedicated to providing support for desktop applications, network applications, and call-center applications. Contact the Service Connection at 1-800-766-ETAS (1-800-766-3827).

Warranty-period repair and replacement service

Nortel Networks manages the repair and replacement of defective SYMPOSIUM Messenger system hardware covered by warranty. Nortel Networks performs such repair and replacement at the end user's location.

Software returns contact

Ship all SYMPOSIUM Messenger return software materials to the following address.

Nortel Networks
9701 Data Park
Minnetonka, MN 55343
(612) 932-8000

Installation and service

The SYMPOSIUM Messenger System solution provides a single point of contact for SYMPOSIUM Messenger System hardware, software, installation, and hardware maintenance needs. The price of the SYMPOSIUM Messenger system includes one year of basic maintenance (8:00 a.m. to 5:00 p.m. service coverage).

Nortel Networks provides an option to purchase an installation option that includes the following installation services at a schedule mutually agreed upon. SYMPOSIUM Messenger system installation consists of placing the integrated SYMPOSIUM Messenger system hardware and the SYMPOSIUM Messenger system software at the end user’s installation location ready for in-service usage.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Installation includes the following services.

- Installation of the integrated SYMPOSIUM Messenger system hardware and SYMPOSIUM Messenger system software at the specified location.
- Installation and connection of the short haul modem from the SYMPOSIUM Messenger system to the appropriate Meridian Mail ACCESS port.
- Installation and connection from the SYMPOSIUM Messenger System to the appropriate LAN.
- Installation and connection from the SYMPOSIUM Messenger System to the appropriate FAX lines.
- Testing of components.
- Demonstration of basic SYMPOSIUM Messenger System Software applications functionality.

  Note: Distributor is subject to charges listed in the following Technical Assistance Service Fees section, if delays are encountered beyond Nortel Networks' control.

Meridian Application Server Support and Service Overview

All Distributors of Nortel Networks's Meridian Application Server and its applications (Messenger and Assistant) will now have the option of purchasing the services the Distributor requires.

Nortel Networks's Enterprise Solutions / Field Services (EN/Field Services) organization will offer the following services for the Meridian Application Server:

- On-site installation
- On-site system administrator and end-user training
- Telephone Support
- On-site service

The following order codes can be used to request the various services being offered by Nortel Networks Enterprise Solutions / Field Services.

MAS Application Service order codes

Order code	Description	Option type
SV000019	Messenger: Meridian Application Installation and Setup	Installation
SV000112	Installation Telephone Support while the Distributor performs the on-site installation of the Messenger Meridian Application Server	Installation
SV000115	Installation Telephone Support while the Distributor performs the on-site installation of the Assistant Meridian Application Server	Installation
SV000021	Meridian Application Server Installation, Setup and Messenger Administration & User Training	Installation and Training

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Installation Only Options

The following options exist for installation only options.

SV000019

Meridian Application Server Installation and Setup

Currently, installation service must be ordered with every MAS Server.

A pre-installation checklist to the end user's location is coordinated by Nortel Networks technical specialists and performed by an Nortel Networks-EN/Field Services Field Engineer to assist the end user/Distributor in readying the Meridian 1, the Meridian Mail system, the LAN environment and the client PCs for the Meridian Application Server. Complete Meridian Application Server installation activities are performed by a fully trained Nortel Networks-EN/ Field Services Professional Services Engineer. Installation includes set up on the end user's premises of the Meridian Application Server and connection of the server to the specified LAN and Meridian Mail System. Installation also includes the loading and configuring of approximately three client end users with the Messenger/ Assistant client software. Nortel Networks also provides “basis” Windows coaching to ensure that the Messenger/ Assistant client software was loaded and configured properly. Nortel Networks also provides “basis” Windows assistance to improve system performance and overall ease of operation. The end user/Distributor is responsible for the addition of subsequent Messenger/ Assistant clients to the Meridian Application Server.

SV000112

Installation Telephone Support while the Distributor performs the on-site installation of the Messenger Meridian Application Server

This is a future offering as the Distributors are trained to install Messenger.

A pre-installation conference call is coordinated by Nortel Networks technical specialists to assist the end user/Distributor in readying the Meridian 1, the Meridian Mail system, the LAN environment and the client PCs for the Meridian Application Server. Telephone assistance during the installation is provided by a fully trained Nortel Networks-EN/Field Services Professional Services Engineer.

SV000115

Installation Telephone Support while the Distributor performs the on-site installation of the Assistant Meridian Application Server

This is a future offering as the Distributors are trained to install Assistant.

A pre-installation conference call is coordinated by Nortel Networks technical specialists to assist the end user/Distributor in readying the Meridian 1, the Meridian Mail system, the LAN environment and the client PCs for the Assistant Meridian Application Server. Telephone assistance during the installation is provided by a fully trained Nortel Networks-EN/Field Services Professional Services Engineer.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SV000181
Installation Telephone Support while the Distributor performs additional user client license installation
This is an offering used when ordering additional user client licenses.

A pre-installation conference call is coordinated by Nortel Networks technical specialists to assist the end user/Distributor in readying the Meridian 1, the Meridian Mail system, the LAN environment and the client Pcs for Messenger User Client Licenses. Telephone assistance during the installation is provided by a fully trained Nortel Networks-En/Field Services Professional Services Engineer.

Installation and Training Options
The following installation and training options are available.

SV000021
Meridian Application Server Installation, Setup and Messenger Training
A pre-installation checklist to the end user's location is coordinated by Nortel Networks technical specialists and performed by an Nortel Networks-EN/Field Services Field Engineer to assist the end user/Distributor in readying the Meridian 1, the Meridian Mail system, the LAN environment and the client PCs for the Meridian Application Server. Complete Meridian Application Server installation activities are performed by a fully trained Nortel Networks-EN/Field Services Professional Services Engineer. Installation includes set up on the end user's premises of the Meridian Application Server and connection of the server to the specified LAN and Meridian Mail System. Installation also includes the loading and configuring of approximately three client end users with the Messenger client software. Nortel Networks provides “basic” Windows coaching to ensure that the Messenger client software was loaded and configured properly. Nortel Networks provides “basic” Windows assistance to improve system performance and overall ease of operation. The end user/Distributor is responsible for the addition of subsequent Messenger clients to the Meridian Application Server.

A Nortel Networks-EN/Field Services Professional Services Engineer provides on-site Messenger 3.0 training for the customer's system administrator at each end user's location immediately after installation of the Meridian Application Server. Also included is basic end user training for approximately three client end users. EN/FS uses the Nortel Networks approved System Administrator Training Materials.

> ***Note:*** Limit the class to a maximum of two end-user System Administrators and three client end users.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

A Nortel Networks-EN/Field Services Professional Services Engineer provides on-site Messenger/Assistant training for the customer's system administrator at each end user's location immediately after installation of the Meridian Application Server. Also included is basic end-user training for approximately three client end users. EN/FS uses the Nortel Networks approved System Administrator Training Materials.

> ***Note:*** Limit the class to a maximum of two end user System Administrators and three client end users.

Training Only Options

The following options are available for training.

SV000020

Messenger System Administrator and Client End User Training - Instructor Led

A Nortel Networks-EN/Field Services Professional Services Engineer provides on-site Messenger training for the customer's system administrator at each end user's location immediately after installation of the Meridian Application Server. Also included is basic end user training for approximately three client end users. EN/FS uses the Nortel Networks approved System Administrator Training Materials.

> ***Note:*** Limit the class to a maximum of two end-user System Administrators and three client end users.

SV000022

Assistant 1.0 System Administrator and Client End User Training - Instructor Led

A Nortel Networks-EN/Field Services Professional Services Engineer provides on-site Assistant 1.0 training for the customer's system administrator at each end user's location immediately after installation of the Meridian Application Server. Also included is basic end user training for approximately three client end users. EN/FS uses the Nortel Networks approved System Administrator Training Materials.

> ***Note:*** Limit the class to a maximum of two end-user System Administrators and three client end users.

Warranty Service Options

The following warranty service options are available.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

SV000024
Upgraded First Year Extended Phone Support to 7 X 24
The Nortel Networks-EN/Field Services Customer Support Center (CSC) accepts all requests for assistance from the customer's Meridian Application Server administrator. The CSC can assist the end users in diagnosing Meridian Application Server operational problems and then recommend the appropriate course of action to remedy them. The CSC uses remote access when appropriate. If a hardware failure is assumed, the CSC assists the System Administrator in determining the failing component and sends a replacement part to the System Administrator for use in the repair. This warranty service is provided on a seven day a week, twenty-four hour a day basis.

SV000025
8 to 5 Phone Support with 8 to 5 On-site Hardware Repair Service
The Nortel Networks-EN/Field Services Customer Support Center (CSC) accepts all requests for assistance from the customer's Meridian Application Server administrator. The CSC can assist the end users in diagnosing Meridian Application Server operational problems and then recommend the appropriate course of action to remedy them. The CSC uses remote access when appropriate. If a hardware failure is assumed, the CSC dispatches a Nortel Networks-EN/Field Services Field Engineer to the site for on-site trouble-shooting assistance. If a hardware failure occurs, the Nortel Networks-EN/Field Services Field Engineer replaces the failing component and verifies complete Meridian Application Server operation. This warranty service is available between the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday.

Post Warranty Service Options
The following post warranty service options are available.

SV000026
8 to 5 Phone Support with 8 to 5 On-site Hardware Repair Service
The Nortel Networks-EN/Field Services Customer Support Center (CSC) accepts all requests for assistance from the customer's Meridian Application Server administrator. The CSC can assist the end users in diagnosing Meridian Application Server operational problems and then recommend the appropriate course of action to remedy them. The CSC uses remote access when appropriate. If a hardware failure is assumed, the CSC dispatches a Nortel Networks-EN/Field Services Field Engineer to the site for on-site trouble-shooting assistance. If a hardware failure occurs, the Nortel Networks-EN/Field Services Field Engineer replaces the failing component and verifies complete Meridian Application Server operation. This post warranty service is available between the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday.

SV000113
Assistant 8 to 5 Phone Support
The Nortel Networks-EN/Field Services Customer Support Center (CSC) accepts all requests for assistance from the customer's Assistant system administrator. The CSC can assist the end users in diagnosing Meridian Application Server and Assistant operational problems and then recommend the appropriate course of action to remedy them. The CSC uses remote access when appropriate. If a hardware failure is assumed, the CSC assists the System Administrator in determining the failing component and sends a replacement part to the System Administrator for use in the repair. This post warranty service is available between the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday.

SV000114
Assistant 7 X 24 Phone Support
The Nortel Networks-EN/Field Services Customer Support Center (CSC) accepts all requests for assistance from the customer's Assistant system administrator. The CSC can assist the end users in diagnosing Meridian Application Server and Assistant operational problems and then recommend the appropriate course of action to remedy them. The CSC uses remote access when appropriate. If a hardware failure is assumed, the CSC assists the System Administrator in determining the failing component and sends a replacement part to the System Administrator for use in the repair. This post warranty service is provided on a seven days a week, twenty-four hour a day basis.

Software support and basic maintenance

Nortel Networks provides the following types of support to assist the distributor in restoring the SYMPOSIUM Messenger system to the pre-incident level of functionality:

- “Software Support” for the SYMPOSIUM Messenger system software
- “Basic Maintenance” Services for SYMPOSIUM Messenger system hardware

Support services

Support consists of the following services:

- Interpretation of documentation that Nortel Networks may initiate related to service problems.
- Assistance in interpreting results of problem diagnostics by telephone.
- Determination of the action required to resolve the incident.
- On-site support as described in the “On-site support,” section.

Nortel Networks attempts to determine the cause of any reported problem using the remote access embedded in the SYMPOSIUM Messenger system software, provided the end user agreed to provide the necessary business-phone access to the SYMPOSIUM Messenger system. Support personnel uses the results of the remote examination to determine the action required to resolve the situation.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Telephone support schedule

Nortel Networks provides software support and basic maintenance for a system during the warranty period during the PPM for problems within the scope of the warranty. The PPM is 8:00 a.m. to 5:00 p.m. local time, Monday through Friday excluding Nortel Networks holidays.

For problems reported during the PPM, Nortel Networks provides technical assistance within two hours from the time Nortel Networks receives the call from the end user.

On-site support

If deemed necessary by Nortel Networks, on-site support for problems within the scope of the warranty is available at no additional charge during the PPM.

If Nortel Networks determines on-site support is required, Nortel Networks contacts the nearest Nortel Networks Service Center. Nortel Networks bases the following on-site estimated response times on the distance from the end-users installation location to the nearest Nortel Networks Service Center

> ***Note:*** Response time represents the average elapsed time starting from the point in time when Nortel Networks and the end user determine on-site support is required and Nortel Networks initiates a call to the closest Nortel Networks Service Center and ending when the Nortel Networks field service engineer arrives on-site. Do not construe response time as the time required to “fix” the problem or as Nortel Networks's guaranteed response time.

Distance	Response Time
0 - 75 miles	4 hours
76 - 125 miles	6 hours
126 miles and over	next day

Technical Assistance Service fees

Nortel Networks provides telephone support and/or on-site support for the SYMPOSIUM Messenger system per the following fees specified. Problems deemed outside the scope of the warranty include, but are not limited to, the following items:

- System incorrectly re-installed by other than Nortel Networks.
- Configuration does not conform to Nortel Networks specifications.
- Warranty period has expired.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Nortel Networks charges the following prices for telephone support and/or work done on-site, when the support required is not included in the scope of work previously described.

Telephone support

Hours	Cost
8 a.m. to 5p.m. Monday thru Friday	$150.00 per hour
5 p.m. to 8 a.m. Monday thru Saturday	$225.00 per hour
Sunday/Holiday	$300.00 per hour
Note 1: Hours are based on the local time. ***Note 2:*** The minimum charge for telephone support is one hour. ***Note 3:*** Telephone/data links incur additional charges.	

The following table provides schedule and fees for on-site support.

On-site support

Hours	Cost
8 a.m. to 5 p.m. Monday thru Friday	$150.00 per hour
5 p.m. to 8 a.m. Monday thru Saturday	$200.00 per hour
Sunday/Holiday	$200.00 per hour
Note 1: Hours are based on the local time. ***Note 2:*** Travel time to and from the installation location are charged at the applicable rate per hour plus reasonable expenses including, but not limited to, travel, meals, and accommodations.	

Hardware and Software Packaging

Messenger is a turnkey solution that fits perfectly with Meridian Mail systems. It is compatible with popular local area network (LAN) operating systems such as Novell NetWare or Microsoft LAN Manager, using networking options such as Ethernet or Token Ring.

Meridian Mail requirements

- Meridian Mail Release 11
- ACCESS Enable Software Option
- RSM Package or Utility Card

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Messenger PC Requirements (Clients)

- IBM PC or compatible with Pentium 75 or greater
- Microsoft DOS 3.3 or greater
- 16 MB RAM
- VGA monitor
- 22 MB disk space for Unified Client
- 4 MB disk space for Inbox Client

Client Operating Systems Supported

- Microsoft Windows 95
- Microsoft Windows 98
- Microsoft Windows NT 4.0

  Note: Windows 3.x is no longer supported.

LAN requirements

Messenger operates in Ethernet or Token Ring LANs that utilize Winsock 1.1 compliant TCP/IP protocol stacks. Since voice messages are recorded and played through the telephone, LAN traffic is held to a minimum.

- LAN architectures
  - — Ethernet or Token Ring
- LAN protocols
  - — TCP/IP (no NetBIOS requirement)

Packaging

Package content

The SYMPOSIUM Messenger package contains the following components:

- SYMPOSIUM Messenger Server (hardware, software, installation, and warranty period maintenance services)
- LAN interface (hardware and software)
- Client software
- Standard set of Nortel Networks documentation

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

System configuration

Customers purchase SYMPOSIUM Messenger by making component selections based on answers to a series of questions. The first question determines the service offering desired and, therefore, determines the SYMPOSIUM Messenger Server. Next, the customer defines the LAN Interface and selects the number of client users of the SYMPOSIUM Messenger system. Finally, optional items are selected to complete the system definition.

Based on the customer-provided system definition, Nortel Networks configures the appropriate SYMPOSIUM Messenger Server, adds the appropriate LAN interface package, and documents the Site-License selection. Optional hardware, service application, and documentation selections are also provisioned for shipment. When shipped to the customer, all the system software is pre-configured to the customer requirements and loaded on the server hard disk. A backup of the system software is included on a tape cartridge and/or additional floppies.

Policies

Server hardware is packaged as one of two SYMPOSIUM Messenger Server options based on the service offerings of either of the following options:

- SYMPOSIUM Messenger Visual Voice Messaging
- SYMPOSIUM Messenger Visual Voice and Fax Messaging

The following concerns apply to the SYMPOSIUM Messenger Server options.

- Both SYMPOSIUM Messenger Server options are sold with a standard short-haul modem connection to Meridian Mail.
- SYMPOSIUM Messenger Fax on Demand application can be installed only with the SYMPOSIUM Messenger Visual Voice and Fax Messaging service offering and the optional Large Disk Drive as a prerequisite.
- SYMPOSIUM Messenger Fax on Demand application and user configurations with larger than normal storage requirements necessitate pre-sales engineering to ensure the correct system sizing. This is based on the following items:
  - — service offering selection
  - — number of client users
  - — parameters of application storage and port usage.
- Client software is sold as a site license with specific upper limits for both new system sales and for system expansions.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

New system orders (hardware and software)

New system orders must be accompanied by a completed SYMPOSIUM Messenger Configuration Guide and Pre-Installation checklist. A copy may be obtained from the Nortel Networks Information Center. The order fulfillment does not begin until this form is provided. When placing a new system order, both server hardware and client software components must be specified.

Use the following guidelines for new system orders:

- Meet site environment prerequisites
- Select the appropriate service offering
- Select the appropriate LAN connectivity option
- Order the appropriate site license

Meet site environment prerequisites

Nortel Networks requires the customer to meet the site environment prerequisites as previously cited. All SYMPOSIUM Messenger systems require Meridian Mail. If Meridian Mail is not in place, order a new Meridian Mail EC or Modular GP system using the normal ordering procedures.

Select the appropriate service offering

Select one of the following service offerings:

- Visual Voice Messaging
- Visual Voice and Fax Messaging

Select the appropriate LAN connectivity option

Select one of the following connectivity options:

- Ethernet - TCP/IP protocols
- Token Ring - TCP/IP protocols

Order the appropriate site license

Order one of the following licenses:

- 25 user configuration
- 50 user configuration
- 100 user configuration
- 200 user configuration
- 500 user configuration
- 1,000 user configuration
- 2,000 user configuration

Combinations of the above can be ordered. Configurations greater than or equal to 1,000 users require engineering assistance from Nortel Networks.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

New system software

Client software is sold as a site license with specific upper limits. New systems ship with one copy of the appropriate client software material to be used as a "golden master" for loading onto individual user PCs.

System upgrades, expansions, and merchandise orders

Client expansion

The expansion from one user level to another does not require a dedicated kit with associated part number. Rather, order the appropriate end-user site license; which are the same as for a new installation. Multiple part numbers can be ordered to bring a customer Site License up to the appropriate number of end user client packages.

Charges for system expansion include the current price (RTU Fees) of all applicable client site license packages, plus the software service transaction fee ($650).

> ***Note:*** Orders must clearly identify the current total clients under site license and the desired new total clients under site license.

Combination client expansion and system upgrade

Customers desiring to both increase the number of client users (expansion) and add Fax Messaging functionality to a Voice Messaging only system (upgrade) will be required to effect a two step order.

1. Order upgrade for existing client site license level
2. Order the desired client expansion to go to the new desired client site license level for Voice and Fax Messaging services.

Charges for a combination client expansion and system upgrade include the price of (RTU fees) all applicable client site license packages, plus software transaction fee ($650).

> ***Note:*** Orders must clearly identify the current total clients under site license and the desired new total clients under site license.

Upgrade to Visual Voice and Fax Messaging Service

To upgrade from Visual Voice Messaging to Visual Voice and FAX Messaging Service, the new functionality will be delivered on a new client diskette as with an initial system purchase.

Upgrade software

In addition to the client Site License Agreements, the customer will be required to upgrade the original Visual Voice Messenger server platform. Additional Fax Modem Cards and memory may be required, dependent upon the size of the intended expansion.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Optional software

Once the customer has chosen the Visual Voice and Fax Messaging Service option, they will be able to select the Fax on Demand application. Fax on Demand will require the large disk drive hardware option regardless of the number of client users.

Meridian Passport Software Policy

The Meridian Passport Software Policy differs from Meridian 1 in that the software used with Meridian Passport is very closely tied to the Nortel Networks Magellan Passport Software. Meridian Passport software is delivered on CD-ROM as an individual software product containing a single stream release. Product improvements and new features are made available in subsequent releases. Routine fixes and software maintenance are delivered on a new issue of a release and are scheduled at regular intervals. Subscribers are advised of new software release and subsequent up issues through Product Bulletins issued by Meridian Passport Product Line Management.

Software Upgrades

Meridian Passport requires that software in all operational machines be maintained on an active or sustained release.

Meridian Passport Product Management plans two releases of software along with one up-issue per release per year. There is an annual mandatory charge of $650.00 per system per year for Software upgrades and up-issues after the first year.

Payment of the annual fee entitles the subscriber to the following items.

- Load the new release and activate the currently owned features.
- Further extends the software warranty by 12 months.

Hardware Upgrades

If hardware upgrades are required with a new release of software, then a Product Bulletin is issued to identify the new components.

Software Release Numbering

Meridian Passport

The software numbering for Meridian Passport follows the Magellan Passport format. The format consists of a release number; e.g., Rls 3.5, followed by an issue number; e.g., S5. It is usually written Rls 3.5.S5 or Rls 3.5.5.

Meridian Passport Manager

The software number for Meridian Passport Manager consists of a Release number and a version number; e.g., 2.2 0.82.3 is Release 2.2 and version 0.82.3.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Software Ratings

Meridian Passport software has the following ratings.

- Active
- Sustained
- Retired

Active

The Active software rating is the software release that is currently shipped with new Meridian Passport systems. It has full CTS support, “bug-fix” activity, and all documentation is available.

Sustained

The Sustained software rating is a software release that was previously active and is no longer available on new Meridian Passport systems. It has limited CTS support, replacement CDs and documentation are available.

Retired

The Retired software is obsolete software where the customer should upgrade to an Active release, additional features cannot be added, CTS support is limited, no “bug fix” activity, and documentation is no longer available.

CTS Support Pricing

Existing Meridian 1 support pricing applies, regional, for Meridian Passport support.

> ***Note:*** All support activity with other than authorized support personnel will be handled as billable, with applicable CSR fees applied.

Authorized Support Personnel

Nortel Networks Meridian Passport Support works with Authorized Distributor Support Engineers, who have the required skills for installation and support of the Meridian Passport product. A submission form can be obtained by contacting the CTS support group.

For use only by Nortel Networks and Nortel Networks’ authorized distributors. Not for public disclosure.

Meridian 1 Hardware/Software Status

Software status

Software support based on status

Nortel Networks has developed a software system to provide quality status support. Refer to the following tables for available software product support:

Software support availability

Status	New Parts Available	System CTS Support	Engineering Changes	Repair Parts Available
Current	Yes	Full	Yes	Yes
Active	Yes	Full	Yes	Yes
Sustained	No	Full	Yes	Yes
Retired	No	Limited	No	Limited

Software support matrix

Product	Current	Active	Sustained	Retired
New Systems	Yes	No	No	No
System Upgrades	Yes	No	No	No
Release Updates	Yes	Yes	Yes	No
Additional Features/ Expanded Capacity (Note 1)	Yes	Yes	Yes	No (Note 2)
Additional Bug Fixes Planned	Yes	Yes	No	No
Replacement Tapes/Disks Available	Yes	Yes	Yes	Yes
CTS Support	Full (Note 3)	Full (Note 3)	Limited (Note 4)	Limited (Note 4)

Note 1: If addition of feature requires you to go to a generic/release which is not supported on your system, you must go to the current software release.

Note 2: If additional features or capacity are required, software must be brought to a sustained, active, or current release status.

Note 3: CTS diagnoses and resolves software problems.

Note 4: CTS support is limited to problem diagnosis.

For use only by Nortel Networks and Nortel Networks' authorized distributors. Not for public disclosure.

System/software compatibility matrix

Base Software (Note 2)	System Supported (Note 3)	Meridian Mail	Meridian MAX (AM)	ACD-MAX	ACD-D	Meridian Link	CCR

Note 2*:* Some features may not be supported by all releases of application software: Check the Software section of the Product Catalog, the Engineering Handbook, the Controlled Release Bulletin and/or the NTPs for specific features supported.

Note 3*:* All other systems require hardware update to “current” release. Hard drive mandatory for XT and Option 71.

Note 4*:* Systems supported depends on specific release.

Note 5: For additional information on all note items, please refer to section 1, “Ordering Procedures.

Enhanced Business Software (Add. 100 TNs) 92, 1251, 1516, 1699
Enhanced Business Software (no DISA) 699, 1429, 1613
Enhanced Business Software Update 92, 1252, 1516, 1699
Enhanced Call Center Management 101, 112, 124, 132, 140, 147, 1242, 1515
Enhanced Call Center Routing 101, 112, 124, 132, 140, 147, 1243, 1515, 1697
Enhanced Call Treatment 154, 1240, 1515
Enhanced Card Option 2 Basic Service Ports - Ports 5 and 6 or 9 and 10 237, 1044, 1469
Enhanced Card Option 2 Basic Service Ports - Ports 7 and 8 or 11 and 12 237, 1044, 1469
Enhanced IVR Reports 275, 1196, 1511
Enhanced Mass Storage Interface Card 1419, 1607
Enhanced Meridian Mail Card Option 4-12 Ports, 5/10/24/54 Hours Package 235, 1043, 1469
Enhanced Meridian Mail EC Option 28-48 Port 26/54/84/114/200/400 Hour Package AC 255, 1291, 1519
Enhanced Meridian Mail EC Option 28-48 Port 26/54/84/114/200/400 Hour Package DC 255, 1293, 1519
Enhanced Meridian Mail EC Option 3 Node Migration, 28-48 Port 30/60/90/120/200/400 Hour Package AC 255, 1294, 1519
Enhanced Meridian Mail EC Option 3 Node Migration, 28-48 Port 30/60/90/120/200/400 Hour Package, DC 255, 1295, 1519
Enhanced Meridian Mail EC Option 4-24 Port 11/24/36/54/100/200 Hour Package AC 255, 1289, 1519
Enhanced Meridian Mail EC Option 4-24 Port 11/24/36/54/100/200 Hour Package DC 255, 1290, 1519
Enhanced Meridian Mail EC Option 52-72 Port 45/90/120/180/300/600 Hour Package AC 255, 1297, 1519
Enhanced Meridian Mail EC Option 52-72 Port 45/90/120/180/300/600 Hour Package DC 255, 1298, 1519
Enhanced Meridian Mail EC Option 76-96 Port 60/120/180/240/400/800 Hour Package AC 256, 1300, 1519
Enhanced Meridian Mail EC Option 76-96 Port 60/120/180/240/400/800 Hour Package DC 256, 1301, 1519
Enhanced Meridian Mail EC11 1 to 2 Node Expansion Package 247, 1045, 1469
Enhanced Meridian Mail EC11 24-48 port, 26/54/84/114/200/400 Hour Package 245, 1311, 1519
Enhanced Meridian Mail EC11 8-24 Port, 11/24/36/54/100/200 Hour Package 245, 1310, 1519
Enhanced Meridian Mail Modular EC Node Expansion 1st Position Package AC 260, 1046, 1469
Enhanced Meridian Mail Modular EC Node Expansion 1st Position Package DC 260, 1046, 1469
Enhanced Meridian Mail Modular EC Node Expansion 2nd Position Package AC 261, 1047, 1469
Enhanced Meridian Mail Modular EC Node Expansion 2nd Position Package DC 261, 1048, 1469
Enhanced Meridian Mail Modular EC Node Expansion 3rd Position Package 261, 1048, 1469
Enhanced Meridian Mail Modular GP 16-24 Port 26/54/84/114/200/400 Hours Package DC 256, 1304, 1519
Enhanced Meridian Mail Modular GP 28-32 Port 30/60/90/120/200/400 Hours Package DC 256, 1305, 1519
Enhanced Meridian Mail Modular GP 36-48 Port 45/90/120/180/300/600 Hours Package DC 256, 1307, 1519
Enhanced Meridian Mail Modular GP 4-12 Port 11/24/36/54/100/200 Hours Package DC 256, 1302, 1519
Enhanced Meridian Mail Modular GP 52-64 Port 60/120/180/240/400/800 Hours Package DC 256, 1308, 1519
Enhanced Meridian Mail Modular GP MMP40 1 to 2 Node Expansion Package DC 261, 1049, 1470
Enhanced Meridian Mail Modular GP MMP40 2 to 3 Node Expansion Package DC 261, 1049, 1470
Enhanced Meridian Mail Modular GP MMP40 3 to 4 Node Expansion Package DC 261, 1050, 1470
Enhanced Meridian Mail Modular GP MMP40 4 to 5

OIVR 2.x Hardware - Continuous Speech Recognition - 2 Ports 280, 541, 1399
OIVR 2.x Hardware - Continuous Speech Recognition - North American Vocabularies Package 1637
OIVR 2.x Hardware - Continuous Speech Recognition 2 Port Expansion 280, 541, 1399
OIVR 2.x Hardware - CPU Module Battery for MRS 274, 285, 416, 1372
OIVR 2.x Hardware - CPU Module with 32MB Memory 274, 284, 412, 1371
OIVR 2.x Hardware - CPU Module with no Memory 274, 284, 412, 1371
OIVR 2.x Hardware - Digiboard DTE 8 Port DB25 Male Cable 274, 284, 412, 1371
OIVR 2.x Hardware - Digital Prompt Tool Package 1632
OIVR 2.x Hardware - Discrete Speech Recognition - 4 Port Expansion 280, 540, 1399
OIVR 2.x Hardware - Discrete Speech Recognition - 4 Ports 280, 540, 1399
OIVR 2.x Hardware - Discrete Speech Recognition - North American Vocabularies Package 1637
OIVR 2.x Hardware - Drive LED Panel for AP or MRS/AP 273, 284, 305, 408, 1370
OIVR 2.x Hardware - Ethernet Controller for MRS 274, 284, 411, 1371
OIVR 2.x Hardware - Expansion RAM - 16MB SIMM with Parity 273, 283, 305, 406, 1370
OIVR 2.x Hardware - Expansion RAM - 8MB SIMM with Parity 273, 283, 406, 1370
OIVR 2.x Hardware - Fan (100cfm) 273, 284, 305, 408, 1370
OIVR 2.x Hardware - Floppy Cable for MRS 274, 285, 417, 1372
OIVR 2.x Hardware - Floppy Disk Drive for MRS 274, 285, 418, 1372
OIVR 2.x Hardware - Floppy Drive, 3.5 In. 274, 413, 1371
OIVR 2.x Hardware - Installation and Maintenance Guide 1599
OIVR 2.x Hardware - International System Prompts 1637
OIVR 2.x Hardware - IVR Development Documentation Package 1584
OIVR 2.x Hardware - IVR Documentation Package 1584
OIVR 2.x Hardware - IVR Operational Documentation Package 1584
OIVR 2.x Hardware - IVR Options Documentation Package 1584
OIVR 2.x Hardware - Keyboard 41, 222, 285, 307, 856, 1446
OIVR 2.x Hardware - Keylock Adapter 274, 285, 417, 1372
OIVR 2.x Hardware - Loopstart Interface Cable (DB25F to RJ23X) 274, 285, 416, 1372
OIVR 2.x Hardware - MRS System Recovery Software Ethernet 272, 285, 537, 1398
OIVR 2.x Hardware - MRS System Recovery Software Token Ring 272, 285, 537, 1399
OIVR 2.x Hardware - MRS to Terminal Cable (DB25F to DB25M) 274, 285, 416, 1371
OIVR 2.x Hardware - MRS/AP or AP 32MB Memory Upgrade 1585
OIVR 2.x Hardware - MRS/AP or AP Ethernet LAN Interface 275, 536, 1398
OIVR 2.x Hardware - MRS/AP or AP Token Ring LAN Interface 275, 285, 536, 1398
OIVR 2.x Hardware - MRS/AP or AP Uninterruptible Power Supply 1586
OIVR 2.x Hardware - MRS/Rack AC Spares Kit 273, 284, 343, 407, 1370
OIVR 2.x Hardware - MRS/Rack DC Spares Kit 273, 283, 343, 407, 1370
OIVR 2.x Hardware - MRS/Rack Fan Assembly 274, 285, 418, 1372
OIVR 2.x Hardware - MRS/Tower Air Filter 274, 285, 416, 1372
OIVR 2.x Hardware - MRS/Tower or MRS/Rack Disk Drive (1.05GB) 273, 285, 1123, 1477
OIVR 2.X Hardware - MRS/Tower or MRS/Rack Ethernet Lan Interface 272, 285, 538, 1399
OIVR 2.x Hardware - MRS/Tower or MRS/Rack Token Ring LAN Interface 272, 285, 538, 1399
OIVR 2.x Hardware - MRS/Tower Spares Kit 273, 283, 342, 407, 1370
OIVR 2.x Hardware - Open IVR System Prompts - North America 1637
OIVR 2.x Hardware - Operational NTP Assembly 1586
OIVR 2.x Hardware - Power Supply, 525W for AP or MRS/AP 274, 284, 305, 415, 1371
OIVR 2.x Hardware - Prompt Management Software 1559

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

OIVR 2.x Hardware - Redundant DC Power Supply for MRS/Rack 274, 284, 414, 1371
OIVR 2.x Hardware - Riser Board for AP or MRS/AP 275, 285, 419, 1372
OIVR 2.x Hardware - Runtime to Development Upgrade AP or MRS/AP (excludes Prompt Manager) 1632
OIVR 2.x Hardware - Runtime to Development Upgrade AP or MRS/AP (includes Prompt Manager) 1632
OIVR 2.x Hardware - SCSI Disk Controller for MRS 274, 284, 410, 1371
OIVR 2.x Hardware - Serial I/O Controller for MRS 274, 284, 410, 1371
OIVR 2.x Hardware - Tape Drive (2.5GB) 273, 283, 402, 1369
OIVR 2.x Hardware - Text-to-Speech 4 Port Expansion 280, 541, 1399
OIVR 2.x Hardware - Text-To-Text Speech - North American Vocabularies Package 1637
OIVR 2.x Hardware - Token Ring Controller for MRS 274, 284, 411, 1371
OIVR 2.X Hardware - Video DRAM Expansion (512KB to 1MB Expansion) 273, 283, 406, 1370
OIVR 2.x Hardware - Voice and Data Storage (1GB) for MRS/AP or AP 275, 542, 1399
OIVR 2.x Hardware - VRP Voice Recognition Card 273, 284, 410, 1371
OIVR 2.x Hardware - VT100 Communications Board (16 ports) & Cable 1559
OIVR 2.x Hardware Fax Support - 2 Ports 280, 539, 1399
OIVR 2.x Hardware Fax Support - 4 Ports 280, 539, 1399
OIVR 2.x Hardware Fax Support - 8 Ports 280, 540, 1399
OIVR 2.x Hardware UPS for AP and MRS/AP 28
