# VARILIMIT

NSD put the VARILIMIT into the world market first. The controller an "electronic limit switch controller" which replaces a limit is switch controller or a proximity one.
The reliability and maintenance of VARILIMIT improved dramatically compared with a limit switch, a proximity switch or an incremental format controller.

VARILIMIT has numerous excellent features and flourishes in wide ranges of fields. It also saves the time for the system setting. A multi-turn type ABSOCODER or a linear type ABSOCODER is used.

# VARISWITH

VARISWITCH is an "electronic switch" which outputs ON/OFF signals (Standard: 5 points, maximum: 10 points). The switch is used with a single-turn, a multi-turn, or a linear type of ABSOCODER.

The hand-held pedant or the external display & setting unit is used so as to set or monitor.
