Polarizing Beamsplitter Prism Cubes

POLARIZING BEAMSPLITTERS

Our prism-cube Polarizing Beamsplitters consist of our AD-Series right-angle prisms cemented together with dielectric coatings on all surfaces. Because these are cemented, they cannot be used with high-energy lasers which may damage the cemented interface. The p-polarized component is transmitted and the s-polarized is reflected at 90°. Extinction ratio of the transmitted p-component and reflected s-component is >2000:1.
