EASY MOUNTING AND MAINTENANCE

The clutch field is mounted to the rotor with ball bearings, providing easy installation and reducing maintenance requirements.

ZERO BACKLASH

By mounting the armature to the hub via leaf springs, backlash is minimized, and armature rattle is eliminated.

CONTROLLABLE RESPONSE TIME

Variations in acceleration or deceleration times and slip torque can be achieved by controlling the applied current.

FAST RESPONSE

Elimination of splines provides faster response and high performance by overcoming friction in the armature and hub.

HIGH HEAT DISSIPATION

The AM series units perform relentlessly year after year, even in heavy duty applications, due to their excellent heat dissipation.

AMC-E version now available - Newer E version is lower in cost, lighter in weight, is RoHS compliant and has a reduced wattage so energy consumption is lower, but still has equivalent performance to the AMC clutches.

Model No.	Ogura P/N	Static Torque (ft-lbs)	max RPM	Bore (inch)	Volts/ Watts	Keyway	Wgt (lbs)
AMC-2.5	25144500	0.183	3600	6mm	24/3	2x7	0.30

Model No.	Ogura P/N	Static Torque (ft-lbs)	max RPM	Bore (inch)	Volts/ Watts	Keyway	Wgt (lbs)
