Description

The OMEGA ® DPG500 digital pressure gauge combines the features of a general purpose pressure transducer and a digital meter, offering an attractive alternative to conventional Bourdon tube gauges. A large 1 /2 inch/13 mm LCD display is exceptionally easy to read, eliminating the possibility of parallax error which is commonly found when using dial gauges. The unit has a broad range of -14 to 500 psi, making it ideal for many applications. A 9 volt battery and ac power adaptor are included, enabling both portable and stationary use.
