# ACC-55E: UNET, Universal Field Bus Adapter Network Board

**Part Number:** 3x0-603485-10x
**Number of slots:** One Slot
**Resources:** One DPRAM IC

This accessory allows the UMAC Turbo system to communicate with other external devices using a field bus communication protocol like Device Net, Profibus, and Can Bus as required. The UNET board can act as a master or a slave in the field bus connections. The UNET board uses the SST company UCS interface board for adaptation to various field buses and, therefore, other field buses could be used as well. **This accessory is intended for UMAC Turbo use only.**

**Options:**

- If ordered with the 3A0 part number prefix, this accessory comes with a front panel attached to the board, but no top or bottom panels. This configuration is appropriate for mounting in an open 3U rack.
- If ordered with the 3R0 part number prefix, this accessory comes with a front panel attached to the board, and top and bottom panels attached (or that can be attached) to one of the Option-P 3U-rack frames. This configuration is appropriate for mounting in the enclosed 3U rack frame supplied by Delta Tau.

**Related Accessories:**

- DEVICENET Master Development Package. Part Number: 3A0-MASTER-DVD. Package includes:
  - Download adapter used for DeviceNet or Pofibus Master Modules
  - DeviceNet Master developer's card
  - Master integration software documentation package
