### Pre-terminated Cables Simplify Connection of Terminal Blocks to PLC Modules

- Reduce setup time with cables pre-terminated for the exact PLC module in use
- No need to make custom connectors
- Crimp hook-terminated cables connect XW2B terminal blocks with PLC modules and input boards from any manufacturer

## Specifications

## ■ RATINGS/CHARACTERISTICS

Item	Rating
Rated current	1 A at 20°C (68°F)
Rated voltage	125 VAC
Contact resistance	20 mΩ max. with 100 mA at 20 mV max. (See Note 1)
Insulation resistance	100 MΩ min. at 500 VDC
Dielectric strength	500 VAC for 1 minute with a current leakage of 1 mA max. (See Note 2)
Enclosure rating	IP00
Electrical protection	Class 0
Ambient temperature	Operating: -25°C to 80°C (-13°F to 176°F)

Note: 1. The resistance indicated is the contact resistance of the connector.

2. The voltage indicated is the dielectric strength of the connector.

2. The Input or Output Modules above have two connectors, so each one can use up to two Terminal Blocks and two dedicated cables.
3. The XW2C is a dedicated Input Terminal Block. If the XW2C is connected to a PLC module that handles both input and output signals (modules with "MD" in the part number), only the input portion of the PLC module can be used.

Connection diagram	 <p>                     I(III) XW2B-40G5 II(IV)                 </p> <p>                     CN1 (CN2)                 </p> <p>                     The diagram shows the internal wiring of the XW2B-40G5 terminal block. It features two main sections, I(III) on the left and II(IV) on the right. Each section has 16 channels, numbered 1 to 16. Channel 0 is the common terminal (COM). Channels 1-15 are normally open (NO) contacts. Channels 16-31 are normally closed (NC) contacts. The diagram shows how these contacts are connected to the terminal block pins and how they are wired to the PLC modules. Power sources (+) are indicated for each channel.                 </p>
