Cam Operated Valves

C13 & CW13 Cam

Application

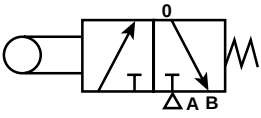

These 3-Way, 2-Position, cam operated spool valves are used to operate single acting cylinders. They can be used as normally closed or normally open, and as a 2-Way.

Mounting

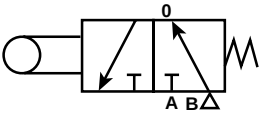

Intended for inline use. Use “C” Series for mounting to horizontal surfaces. Use “CW” Series for mounting to vertical bulkheads.

Operation

De-energized or Spring Returned Position of the Spool – Pressure at inlet port “A” is blocked and port “0” is connected to port “B” exhaust as normally closed valve. Because of the area-balanced construction of the spool, either port “A” or port “B” may be used as the inlet supply port. Pressure to port “A” valve is normally closed valve. Pressure to port “B” valve is normally open valve.

Normally Closed

Normally Open

Model Selection Information

Port Size	Description	Model Number
1/4" NPT	Base Mounted, Roller Cam	**C1325**
3/8" NPT	Base Mounted, Roller Cam	**C1337**

Port Size	Description	Model Number
1/4" NPT	Wall Mounted, Roller Cam	**CW1325**
3/8" NPT	Wall Mounted, Roller Cam	**CW1337**
